100% Pass Quiz 2026 High Hit-Rate FCSS_SASE_AD-24: FCSS - FortiSASE 24 Administrator Detail Explanation

BONUS!!! Download part of ITCertMagic FCSS_SASE_AD-24 dumps for free: https://drive.google.com/open?id=1AVowCq4IMQLIWQn4KUpoooo-RitNxSeK

In addition to our FCSS_SASE_AD-24 exam questions, we also offer a Fortinet Practice Test engine. This engine contains real FCSS_SASE_AD-24 practice questions designed to help you get familiar with the actual FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) pattern. Our FCSS - FortiSASE 24 Administrator (FCSS_SASE_AD-24) exam practice test engine will help you gauge your progress, identify areas of weakness, and master the material.

Fortinet FCSS_SASE_AD-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• SASE Architecture and Components: This section measures the skills of Network Security Engineers and covers the architecture and components of FortiSASE. It includes integrating FortiSASE into a hybrid network, identifying its components, and constructing deployment cases to effectively implement SASE solutions.
Topic 2	• SIA, SSA, and SPA" This section focuses on the skills of Security Administrators in designing security profiles for content inspection and deploying SD-WAN and Zero Trust Network Access (ZTNA) using SASE. Understanding these concepts is crucial for securing access to applications and data across the network.
Topic 3	• Analytics: This domain evaluates the skills of Data Analysts in utilizing analytics within FortiSASE. It involves identifying potential security threats using traffic logs, configuring dashboards and logging settings, and analyzing reports for user traffic and security issues to enhance overall security posture.
Topic 4	• SASE Deployment: This domain assesses the capabilities of Cloud Security Architects in deploying SASE solutions. It includes implementing various user onboarding methods, configuring administration settings, and applying security posture checks and compliance rules to ensure a secure environment.

FCSS_SASE_AD-24 Practical Information - FCSS_SASE_AD-24 Reliable Test Price

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect FCSS_SASE_AD-24 Latest Dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our FCSS_SASE_AD-24 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying.

Fortinet FCSS - FortiSASE 24 Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45
Your organization is currently using FortiSASE for its cybersecurity. They have recently hired a contractor who will work from the HQ office and who needs temporary internet access in order to set up a web-based point of sale (POS) system.
What is the recommended way to provide internet access to the contractor?

- A. Configure a VPN policy on FortiSASE to provide access to the internet.
- B. Use zero trust network access (ZTNA) and tag the client as an unmanaged endpoint.
- C. Use a proxy auto-configuration (PAC) file and provide secure web gateway (SWG) service as an explicit web proxy.
- D. Use FortiClient on the endpoint to manage internet access.

Answer: B

Explanation:
The recommended way to provide temporary internet access to the contractor is to use Zero Trust Network Access (ZTNA) and tag the client as an unmanaged endpoint . ZTNA ensures that only authorized users and devices can access specific resources, while treating all endpoints as untrusted by default. By tagging the contractor's device as an unmanaged endpoint, you can apply strict access controls and ensure that the contractor has limited access to only the necessary resources (e.g., the web-based POS system) without exposing the internal network to unnecessary risks.

NEW QUESTION # 46
Which techniques should be implemented to optimize content inspection within security profiles?
(Choose Two)
Response:

- A. Use of minimal data sets for testing
- B. Regular updates to inspection algorithms
- C. Application of AI-based analytics tools
- D. Continuous monitoring of inspected content

Answer: B,D

NEW QUESTION # 47
When viewing the daily summary report generated by FortiSASE. the administrator notices that the report contains very little data.
What is a possible explanation for this almost empty report?

- A. Log allowed traffic is set to Security Events for all policies.
- B. There are no security profile group applied to all policies.
- C. Digital experience monitoring is not configured.
- D. The web filter security profile is not set to Monitor

Answer: A

Explanation:
If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.
* Log Allowed Traffic Setting:
* The "Log allowed traffic" setting determines which types of traffic are logged.

* When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.
* Impact on Report Data:
* If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.
* This results in reports with minimal data, as only security-related events are included.
References:
FortiOS 7.2 Administration Guide: Provides details on configuring logging settings for traffic policies.
FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

NEW QUESTION # 48
Customizing FortiSASE dashboards allows security analysts to focus on the most critical data relevant to their role.
Response:

- A. False
- B. True

Answer: B

NEW QUESTION # 49
Which two statements describe a zero trust network access (ZTNA) private access use case?
(Choose two.)

- A. The security posture of the device is secure.
- B. All FortiSASE user-based deployments are supported.
- C. All TCP-based applications are supported.
- D. Data center redundancy is offered.

Answer: A,C

Explanation:
Zero Trust Network Access (ZTNA) private access use cases focus on providing secure and controlled access to private applications without exposing them to the public internet. The following two statements accurately describe ZTNA private access use cases:
The security posture of the device is secure (Option A):
ZTNA enforces strict access controls based on the principle of least privilege. Before granting access to private applications, ZTNA evaluates the security posture of the device (e.g., whether it is patched, compliant, and free of malware). Only devices that meet the required security standards are granted access, ensuring that the device is secure before allowing private access.
All TCP-based applications are supported (Option C):
ZTNA supports all TCP-based applications, enabling secure access to a wide range of private applications, including legacy systems and custom-built applications. This flexibility makes ZTNA suitable for organizations with diverse application environments.

NEW QUESTION # 50
......

To make your review more comfortable and effective, we made three versions of FCSS_SASE_AD-24 study guide as well as a series of favorable benefits for you. We are concerted company offering tailored services which include not only the newest and various versions of FCSS_SASE_AD-24 Practice Engine, but offer one-year free updates services with patient staff offering help 24/7. It means that as long as our professionals update the FCSS_SASE_AD-24 learning quiz, you will receive it for free.
