

# HPE7-A08 Interactive Practice Exam - HPE7-A08

## Answers Real Questions

Answer: D

### Question: 4

You need to run a packet capture on a CX switch and be able to view the full output on a remote device in real-time. What is the best way to do this?

- A. Configure a mirror session using ERSPAN to a computer running Wireshark
- B. Inspect the summary of the packets in real time on the switch using tcpdump
- C. Configure a mirror session with another port on the switch as the destination
- D. Configure a mirror session to the CPU, use tshark to capture it to a PCAP file

Answer: A

### Question: 5

When configuring a multicast solution on HPE Aruba Networking CX switches, what needs to be configured on the access switch to enable efficient traffic flow?

- A. PIM on VLAN
- B. IGMP-snooping on VLAN
- C. IGMP on VLAN
- D. IGMP-snooping on SVI

Answer: B

There are different ways to achieve the same purpose, and it's determined by what way you choose. A lot of people want to pass HP certification HPE7-A08 exam to let their job and life improve, but people participated in the HP Certification HPE7-A08 Exam all knew that HP certification HPE7-A08 exam is not very simple. In order to pass HP certification HPE7-A08 exam some people spend a lot of valuable time and effort to prepare, but did not succeed.

## HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.</li> </ul>

## Demo Version and HP HPE7-A08 Free Questions Updates for Up to 12 Months

Three versions of HPE7-A08 test materials are available. You can choose the one you prefer to have a practice. HPE7-A08 PDF version is printable, and if you prefer to practice on paper, this version will be your best choice. You can print them into hard one, and take them with you. HPE7-A08 Soft test engine can stimulate the real exam environment, and this version will help you to relieve your nerves. HPE7-A08 Online test engine supports all web browsers, with this version you can have a brief review of what you have finished last time.

## HPE Aruba Networking Switching Professional Exam Sample Questions (Q262-Q267):

### NEW QUESTION # 262

What is the benefit of implementing ACLs on Aruba switches?

Response:

- A. Enhances security by filtering traffic
- B. Improves multicast efficiency
- C. Increases network speed
- D. Reduces VLAN traffic

**Answer: A**

### NEW QUESTION # 263

Which Aruba CX switch series is best suited for a multi-tenant cloud environment?

- A. Aruba CX 8400
- B. Aruba CX 10000
- C. Aruba CX 9300
- D. Aruba CX 6200

**Answer: B**

Explanation:

The CX 10000 integrates Pensando SmartNIC, enabling distributed firewalling and microsegmentation, making it ideal for cloud data centers and multi-tenant architectures.

#### NEW QUESTION # 264

Which Aruba CX feature ensures non-disruptive software updates with minimal downtime?

- A. Multi-Chassis Link Aggregation (MC-LAG)
- B. Virtual Switching Framework (VSF)
- C. Live Upgrade
- D. Zero Touch Provisioning (ZTP)

**Answer: C**

Explanation:

Live Upgrade allows Aruba CX switches to perform software updates without rebooting, ensuring continuous network operation and minimizing downtime during maintenance.

#### NEW QUESTION # 265

Which two actions help remediate a duplex mismatch issue? (Select two)

- A. Enable VLAN trunking on both ends
- B. Change one end to half-duplex and the other to full-duplex
- C. Manually set both ports to the same duplex mode
- D. Configure both sides to auto-negotiate

**Answer: C,D**

Explanation:

Duplex mismatches cause packet loss and slow performance, so setting both interfaces to the same mode-either auto-negotiation or manual configuration-ensures proper communication.

#### NEW QUESTION # 266

An administrator in a company of 349 users has a pair of AOS-CX switches with connections to external networks. Both switches are configured for OSPF. The administrator wants to import external routes on both switches, but assigns different seed metrics to the routes, as well as imports them as external type-1 routes.

What is the best way for the administrator to accomplish this?

- A. Create a classifier policy with the correct route type and metrics
- B. Define the route type and metrics in the OSPF process
- C. Define a class and policy map with the correct route type and metrics
- D. Create a route map with the correct route type and metrics

**Answer: D**

Explanation:

To change the LSA metric-type (type 1 or 2), you must use a route map.

#### NEW QUESTION # 267

.....

We have special online worker to solve all your problems. Once you have questions about our HPE7-A08 latest exam guide, you can directly contact with them through email. We are 7\*24\*365 online service. We are welcome you to contact us any time via email or online service. We have issued numerous products, so you might feel confused about which HPE7-A08 study dumps suit you best. You will get satisfied answers after consultation. Our online workers are going through professional training. Your demands and thought can be clearly understood by them. Even if you have bought our high-pass-rate HPE7-A08 training practice but you do not know how to install it, we can offer remote guidance to assist you finish installation. In the process of using, you still have access to our after sales service. All in all, we will keep helping you until you have passed the HPE7-A08 exam and got the certificate.
