## SAP Certified Associate - Security Administrator Sample Questions (Q69-Q74):

### NEW QUESTION # 69

Which application in SAP S/4HANA Cloud Public Edition allows you to upload employee information independent of the customers' HR system?

- A. Display Technical Users app
- B. Maintain Business User app
- C. Identity and Access Management app
- D. Manage Workforce app

**Answer: D**

Explanation:

The Manage Workforce app in SAP S/4HANA Cloud Public Edition enables administrators to upload employee information independently of the customer's HR system. This app provides a user-friendly interface for managing workforce data, such as employee profiles, roles, and organizational assignments, without requiring integration with an external HR system like SAP SuccessFactors. It supports manual uploads or imports of employee data, making it ideal for scenarios where HR system integration is not available or desired. The Maintain Business User app is focused on managing user authorizations and roles, not employee data. The Identity and Access Management app deals with authentication and access policies, and the Display Technical Users app is limited to viewing technical user accounts. The Manage Workforce app's functionality ensures flexibility in workforce management, allowing organizations to maintain employee information efficiently while adhering to security and compliance requirements in SAP S/4HANA Cloud Public Edition.
