

# Regualer JN0-460 Update - JN0-460 Latest Exam Pdf

DOWNLOAD the newest VCE4Plus JN0-460 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1iIsF6kd91Ymc9dKL72Gi1-PH96LnxDQ>

With the simulation test, all of our customers will get accustomed to the JN0-460 exam easily, and get rid of bad habits, which may influence your performance in the real JN0-460 exam. In addition, the mode of JN0-460 learning guide questions and answers is the most effective for you to remember the key points. During your practice process, the JN0-460 test questions would be absorbed, which is time-saving and high-efficient. Concentrated all our energies on the study JN0-460 learning guide we never change the goal of helping candidates pass the exam. Our JN0-460 test questions' quality is guaranteed by our experts' hard work. So what are you waiting for? Just choose our JN0-460 exam materials, and you won't be regret.

## Juniper JN0-460 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Campus EVPN-VXLAN:</b> This section of the exam measures the skills of Data Center Network Engineers and explores the key principles of VXLAN and EVPN technologies. Candidates learn about Layer 2 tunneling, data and control plane operations, and the functions of VTEPs and VXLAN gateways. Additionally, it covers advanced EVPN concepts such as multipath routing, route types, and identifiers. The section concludes with a focus on MAC learning and policy applications to ensure efficient, scalable, and resilient network fabrics.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Wired Assurance Fundamentals:</b> This section of the exam measures the skills of Network Support Engineers and covers the foundational elements of Wired Assurance within the MistAI ecosystem. It introduces candidates to key concepts such as supported devices, solution architecture, and the main features and components that define Wired Assurance functionality. Additionally, it highlights how MistAI accounts, analytics, and subscriptions integrate to deliver intelligent insights for network performance and operations.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Provisioning or Deployment:</b> This section of the exam measures the skills of Network Deployment Specialists and focuses on the provisioning and deployment processes of Wired Assurance. It includes the essential steps and options involved in setting up networks, from configuration templates to deployment methodologies. Candidates learn about provisioning procedures, supported architectures, and the use of site variables to streamline automation and consistency across wired infrastructures.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Campus Fabric Architecture:</b> This section of the exam measures the skills of Network Design Engineers and focuses on understanding and deploying Campus Fabric Architectures. It introduces essential design concepts such as EVPN multihoming, IP Clos architecture, and micro-segmentation. The section also compares CRB and ERB models, explains scaling requirements, and highlights how the Campus Fabric Core-Distribution design supports high-performance, scalable, and secure enterprise networks.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Wired Assurance Management or Operations:</b> This section of the exam measures the skills of Network Operations Engineers and focuses on the management and operational aspects of Wired Assurance. It covers switch management, port profiles, and dynamic port configuration to ensure optimal network performance. The section also explores service-level expectations, client insights, and the use of APIs for improved monitoring and automation. Candidates gain an understanding of how MistAI enables proactive management and predictive troubleshooting to maintain service quality.</li> </ul>

## JN0-460 Latest Exam Pdf, Latest JN0-460 Test Cram

The objective of VCE4Plus is to provide Mist AI Wired, Specialist (JNCIS-MistAI-Wired) (JN0-460) exam applicants with JN0-460 actual questions they require to expeditiously crack the Juniper JN0-460 Exam Dumps. Customers can be sure they are obtaining the updated JN0-460 PDF Questions, customizable practice exams, with 24/7 customer assistance. Purchase Juniper JN0-460 study material right away to get started on the road to success in the real exam.

## Juniper Mist AI Wired, Specialist (JNCIS-MistAI-Wired) Sample Questions (Q10-Q15):

### NEW QUESTION # 10

Which service level expectation (SLE) metric measures congestion on the uplink interface of a switch?

- A. Asymmetric Uplink
- **B. Throughput**
- C. Switch Health
- D. Successful Connect

### Answer: B

#### Explanation:

According to Juniper Mist documentation, the Throughput Service Level Expectation (SLE) is the primary metric used to represent the ability of wired users to pass traffic across the network without impedance. This SLE provides a comprehensive oversight of network performance by identifying issues that degrade the user experience, such as storm control events, interface anomalies, and specifically uplink congestion.

Within the Throughput SLE, the Congestion classifier (also referred to as Congestion Uplink) is specifically designed to monitor for buffer saturation and packet drops (Tx Drops). When traffic arriving at an interface exceeds its processing or forwarding capacity, packets are queued in a buffer; if this buffer becomes full, the switch begins dropping packets. Juniper Mist utilizes a specific formula considering the ratios of Tx Drops to Tx Packets, Transmitted bps to Link Speed, and Received Speed to Link Speed to determine if a "Bad User Minute" has occurred due to congestion.

A critical feature of Wired Assurance is the automatic identification of uplink interfaces. Mist identifies these high-capacity ports by analyzing switch telemetry for characteristics such as having a switch or router as an LLDP neighbor, being designated as a Spanning Tree Protocol (STP) root port, or exhibiting significantly higher packet counts compared to access ports. When congestion is detected on an interface identified as an uplink, the system recognizes that this bottleneck impacts every user on that switch. By correlating these drops with the Throughput SLE, network administrators can proactively identify when a site requires more bandwidth or a different fabric architecture to handle current traffic demands, rather than simply monitoring if the link is physically

"up" or "down".

#### NEW QUESTION # 11

What is the primary goal of Wired Assurance?

- A. To enhance network visibility and troubleshooting.
- B. To reduce network bandwidth.
- C. To increase network security protocols.
- D. To offer financial assurance services.

**Answer: A**

#### NEW QUESTION # 12

Which two statements are correct about switch adoption?(Choose two.)

- A. Brownfield switch adoption requires manual adoption and is used for switches that do not have a claim or activation code.
- B. Switch adoption uses SSH over TCP port 443.
- C. Switch adoption requires Mist AP.
- D. Greenfield switch adoption requires cloud-enabled switches with a claim or activation code.

**Answer: A,D**

Explanation:

In Juniper Mist, Greenfield adoption applies to new, cloud-ready switches (such as EX4100, EX4400, and QFX series) using a claim or activation code to securely connect to the Mist cloud.

Brownfield adoption, however, supports switches already deployed or not factory-fresh. These are manually onboarded by configuring outbound management connectivity and adopting them through the Mist portal.

This distinction enables both new and legacy EX/QFX environments to be cloud-managed under Wired Assurance.

#### NEW QUESTION # 13

You have connected a new EX4400 series switch to an existing network.

Without logging into the switch, how would you determine the connectivity status of the switch?

- A. Look at the color of the me0 port LED and count the number of times it blinks
- B. Look at the color of the connected port LED and count the number of times it blinks
- C. Look at the color of the Cloud LED and count the number of times it blinks
- D. Look at the color of the power LED and count the number of times it blinks

**Answer: C**

#### NEW QUESTION # 14

EVPN Multihoming is best described as:

- A. A feature that allows a single device to form peering relationships with multiple devices
- B. A process to limit devices to a single upstream connection
- C. The practice of connecting a device to multiple gateways for increased reliability
- D. A method to reduce network traffic efficiency

**Answer: C**

#### NEW QUESTION # 15

.....

VCE4Plus is an excellent IT certification examination information website. In VCE4Plus you can find exam tips and materials about

Juniper certification JN0-460 exam. You can also free download part of examination questions and answers about Juniper JN0-460 in VCE4Plus. VCE4Plus will timely provide you free updates about Juniper JN0-460 exam materials. Besides, the exam materials we sold are to provide the answers. Our IT experts team will continue to take advantage of professional experience to come up with accurate and detailed exam practice questions to help you pass the exam. In short, we will provide you with everything you need about Juniper Certification JN0-460 Exam
