Pass Your SAP C-C4H56-2411 Exam with Excellent C-C4H56-2411 Latest Exam Registration Certainly

We will give you full refund if you fail to pass the exam after buying C-C4H56-2411 exam torrent from us. We are pass guarantee and money back guarantee if you fail to pass the exam. And money will be returned to your payment account. In addition, C-C4H56-2411 exam dumps are high- quality, and you can pass your exam just one time if you choose us. We offer you free update for 365 days for C-C4H56-2411 Exam Dumps, and the latest version will be sent to your email automatically. We have online service, if you have any questions, you can have a chat with us.

SAP Certified Associate - Implementation Consultant - SAP Service Cloud Version 2 Sample Questions (Q67-Q72):

NEW QUESTION # 67
Which of the following are the correct types of usage of an installed base? Note: There are 2 correct answers to this question.

- A. Assigning warranties
- B. Assigning to a case
- C. Tracking measuring points
- D. Tracking installed assets

Answer: B,D

Explanation:

In SAP Service Cloud Version 2, an installed base is used to manage customer equipment and assets. Tracking installed assets is a primary function, as it allows organizations to maintain a record of customer-owned products or equipment, including details like serial numbers and locations. Assigning to a case is another key usage, enabling service agents to link a case to a specific installed base for accurate service delivery and tracking. According to SAP documentation, "An installed base represents a grouping of products installed at a customer location and can be associated with cases for service requests." Tracking measuring points (A) is related to equipment monitoring in SAP S/4HANA, not a direct function of installed bases in Service Cloud V2. Assigning warranties (C) is managed through registered products, not installed bases.
