

AIGP Exam Vce | Updated AIGP Testkings

2026 Latest Actual4test AIGP PDF Dumps and AIGP Exam Engine Free Share: https://drive.google.com/open?id=1UC_8J3Y_0P44BnBf3Fs9S1Yeg3QVKzAh

Many people choose to sign up for the IAPP AIGP certification examinations in order to advance their knowledge and abilities. We offer updated and actual IAPP AIGP Dumps questions that will be enough to get ready for the IAPP AIGP test. Our IAPP AIGP questions are 100% genuine and will certainly appear in the next IAPP AIGP test.

IAPP AIGP Exam Syllabus Topics:

| Topic | Details |
|---------|---|
| Topic 1 | <ul style="list-style-type: none">Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices. |
| Topic 2 | <ul style="list-style-type: none">Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation. |
| Topic 3 | <ul style="list-style-type: none">Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life. |

| | |
|---------|--|
| Topic 4 | <ul style="list-style-type: none"> • Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders. |

AIGP Exam Vce Exam 100% Pass | IAPP Updated AIGP Testkings

The price of IAPP AIGP updated exam dumps is affordable. You can try the free demo version of any IAPP AIGP exam dumps format before buying. For your satisfaction, Actual4test gives you a free demo download facility. You can test the features and then place an order.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q91-Q96):

NEW QUESTION # 91

Scenario:

A distributor operating in the EU is responsible for selling imported high-risk AI systems to businesses. The distributor wants to ensure they fulfill all applicable obligations under the EU AI Act.

All of the following are obligations of a distributor of high-risk AI systems under the EU AI Act EXCEPT?

- A. Communication with national authorities
- B. Verification of CE marking
- C. Corrective actions
- **D. Registration in EU Database**

Answer: D

Explanation:

The correct answer is C. Registration in the EU database is an obligation of providers of high-risk AI systems- not distributors.

From the AIGP ILT Guide - Roles & Obligations Module:

"Distributors must verify CE marking, ensure instructions for use are provided, inform authorities of risks, and take corrective action when necessary. However, registration duties in the EU database lie with the provider." Also from the AI Governance in Practice Report 2025:

"The AI Act differentiates responsibilities for developers, providers, importers, and distributors. Only providers of high-risk systems are obligated to register their systems in the EU AI Database." Distributors focus on verification and communication, not formal registration.

NEW QUESTION # 92

The use of paid generative AI public tools is appealing because? (Choose three.)

- **A. They have additional privacy and security controls.**
- B. They eliminate concerns about the data used to generate outputs.
- **C. They are convenient to adopt.**
- D. They provide transparency in models and in decision-making.
- **E. They have frequent enhancements of new features.**

Answer: A,C,E

Explanation:

Paid generative AI tools are appealing because they are convenient to adopt, often include enhanced privacy and security controls, and receive frequent feature updates.

NEW QUESTION # 93

CASE STUDY

Please use the following to answer the next question:

A premier payroll services company that employs thousands of people globally, is embarking on a new hiring campaign and wants to implement policies and procedures to identify and retain the best talent. The new talent will help the company's product team expand its payroll offerings to companies in the healthcare and transportation sectors, including in Asia.

It has become time consuming and expensive for HR to review all resumes, and they are concerned that human reviewers might be susceptible to bias.

To address these concerns, the company is considering using a third-party AI tool to screen resumes and assist with hiring. They have been talking to several vendors about possibly obtaining a third-party AI-enabled hiring solution, as long as it would achieve its goals and comply with all applicable laws.

The organization has a large procurement team that is responsible for the contracting of technology solutions. One of the procurement team's goals is to reduce costs, and it often prefers lower-cost solutions. Others within the company deploy technology solutions into the organization's operations in a responsible, cost-effective manner.

The organization is aware of the risks presented by AI hiring tools and wants to mitigate them. It also questions how best to organize and train its existing personnel to use the AI hiring tool responsibly. Their concerns are heightened by the fact that relevant laws vary across jurisdictions and continue to change.

Which of the following measures should the company adopt to best mitigate its risk of reputational harm from using the AI tool?

- **A. Test the AI tool pre- and post-deployment.**
- B. Require the procurement and deployment teams to agree upon the AI tool.
- C. Ensure the vendor provides indemnification for the AI tool.
- D. Continue to require the company's hiring personnel to manually screen all applicants.

Answer: A

Explanation:

Testing the AI tool before and after deployment helps identify biases and errors early, reducing the risk of reputational harm by ensuring the system performs fairly and reliably.

NEW QUESTION # 94

CASE STUDY

Please use the following to answer the next question:

A global marketing agency is adapting a large language model ("LLM") to generate content for an upcoming marketing campaign for a client's new product: a hard hat designed for construction workers of any gender to better protect them from head injuries.

The marketing agency is accessing the LLM through an application programming interface ("API") developed by a third-party technology company. They want to generate text to be used for targeted advertising communications that highlight the benefits of the hard hat to potential purchasers. Both the marketing agency and the technology company have taken reasonable steps to address AI governance.

The marketing company has:

- Entered into a contract with the technology company with suitable representations and warranties.
- Completed an impact assessment on the LLM for this intended use.
- Built technical guidance on how to measure and mitigate bias in the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Followed applicable regulatory requirements.
- Created specific legal statements and disclosures regarding the use of the AI on its client's advertising.

The technology company has:

- Provided guidance and resources to developers to address environmental concerns.
- Built technical guidance on how to measure and mitigate bias in the LLM.
- Provided tools and resources to measure bias specific to the LLM.
- Enabled technical aspects of transparency, explainability, robustness and privacy.
- Mapped and mitigated potential societal harms and large-scale impacts.

- Followed applicable regulatory requirements and industry standards.
- Created specific legal statements and disclosures regarding the LLM, including with respect to IP and rights to data.

While the marketing agency took steps to mitigate its risks, the best additional step would be to:

- **A. Establish a governance committee to oversee the project.**
- B. Engage a third party to lead the procurement selection process.
- C. Negotiate an intellectual property indemnity from the technology company.
- D. Evaluate the use of AI in the marketing industry to identify best practices.

Answer: A

Explanation:

Establishing a governance committee provides ongoing oversight and accountability, which is crucial for managing risks effectively throughout the AI project lifecycle.

NEW QUESTION # 95

All of the following are unique characteristics of AI that require a comprehensive approach to governance EXCEPT?

- A. Adaptability
- B. Autonomy
- **C. Superintelligence**
- D. Automation
- E. Speed and scale

Answer: C

Explanation:

The correct answer is E - Superintelligence.

While the other options (Autonomy, Automation, Adaptability, Speed and Scale) are commonly cited as real-world characteristics that affect governance today, superintelligence remains a theoretical concept.

From the AIGP ILT Guide and AI Governance in Practice Report 2024:

"Core AI characteristics-such as automation, adaptability, speed, and autonomy-require active governance due to their impact on decision-making, legal liability, and risk." However, superintelligence is speculative and not a current feature of AI systems under governance frameworks like the EU AI Act or NIST RMF.

Thus, it's not a current characteristic requiring governance in real-world enterprise settings.

NEW QUESTION # 96

.....

Actual4test is a dumps pdf provider that ensures you pass the IAPP braindumps exam with high rate. You may wonder how we can guarantee the high pass rate. You can rest assured that the AIGP braindumps questions and learning materials are created by our IT teammates who have rich experience in the AIGP Top Questions. And we constantly keep the updating of vce dumps to ensure the accuracy of questions and answers.
