The Open Group TOGAF Business Architecture Foundation Exam Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which of the following best describes the relationship between business models and business architecture?

- A. Business model development is a prerequisite for a Business Architecture development.
- B. Business models are useful for impact analysis, however Business Architecture is needed for scenario analysis.
- C. Business Architecture breaks a business model down into the core functional elements that describe how the business works.
- D. Business Architecture provides a conceptual summary view, whereas business models support in-depth analysis.

Answer: C

Explanation:

A business model describes how an organization creates, delivers, and captures value for its stakeholders³. A business architecture breaks a business model down into the core functional elements that describe how the business works, such as the value proposition, the customer segments, the channels, the revenue streams, the cost structure, the key resources, the key activities, and the key partnerships³.

NEW QUESTION # 60

Consider the following ADM phases objectives.

Objective	
1	Finalize the Architecture Roadmap and the supporting Implementation and Migration Plan
2	Ensure that the business value and cost of work packages and Transition Architectures is understood by key stakeholders
3	Define the overall Solution Building Blocks (SBBs) to finalize the Target Architecture based on the ABBs
4	Ensure conformance with the Target Architecture by implementation projects

Which phase does each objective match?

- A. 1G-2E-3F-4E
- B. 1E-2F-3E-4G

- C. 1F-2F-3E-4G
- D. 1F-2G-3F-4F

Answer: D

NEW QUESTION # 61

In business capability mapping, when you have documented all of the business capabilities, what should you do next?

- A. Draw up a business value assessment for each of the business capabilities.
- B. Identify the human and computer actors associated with each business capability.
- C. Map the business capabilities to stakeholder concerns.
- D. **Organize the business capabilities in a logical manner.**

Answer: D

Explanation:

In business capability mapping, once all business capabilities have been documented, the next step is to organize these capabilities logically. This organization helps in understanding how different capabilities interact and align with the business strategy. Here's a detailed explanation based on TOGAF principles:

Business Capability Mapping:

Business capability mapping involves identifying and documenting the capabilities required to execute the business strategy.

Capabilities are the building blocks of the business, representing what the business does.

Logical Organization:

Grouping and Categorization: Capabilities should be grouped and categorized logically to reflect their relationships and dependencies. This can be done by aligning capabilities with business functions, processes, or strategic objectives.

Hierarchical Structure: Organizing capabilities into a hierarchical structure helps in visualizing how high-level capabilities decompose into more specific, detailed capabilities. This hierarchical view aids in understanding the complexity and scope of capabilities.

Alignment with Strategy: Logical organization ensures that capabilities are aligned with the business strategy and objectives. It helps in identifying which capabilities are critical for achieving strategic goals and which ones need development or improvement.

TOGAF ADM References:

Phase B: Business Architecture: This phase involves developing the business architecture, including capability mapping. Organizing capabilities logically is a key step in this process, as it helps in creating a coherent and comprehensive business architecture.

Capability Models: TOGAF recommends using capability models to represent the organization's capabilities.

These models should be logically organized to facilitate analysis and planning.

Practical Steps:

Analyze Relationships: Examine the relationships between capabilities to identify dependencies and interactions. This analysis helps in grouping related capabilities together.

Create a Capability Map: Develop a visual representation of the capabilities, organized logically. This map serves as a reference for understanding the business architecture and planning initiatives.

In summary, after documenting all business capabilities, organizing them in a logical manner is essential for creating a coherent and effective business architecture. This logical organization facilitates better analysis, planning, and alignment with business strategy.

NEW QUESTION # 62

Which of the following describes the concept of an Enterprise Architecture Capability?

- A. **The ability to develop, use and sustain the architecture of a particular enterprise using architecture to govern change.**
- B. The ability to strike a balance between positive and negative outcomes resulting from the realization of opportunities.
- C. The ability to follow general rules and guidelines that relate to Enterprise Architecture work and that enable decision-making.
- D. The ability to distinguish between different types of architectural assets that exist at different levels of abstraction in the enterprise.

Answer: A

NEW QUESTION # 63

Consider the following extract of a model showing relationships between Business Architecture concepts:

What is the relationship labeled X?

- A. Creates
- B. Receives
- C. Consists of
- D. Enables

Answer: C

Explanation:

In the context of TOGAF and Business Architecture, the diagram depicts the relationship between a Value Stream, Value Stage, and Value.

* **Value Stream:** Represents the end-to-end set of activities that create and deliver value to a stakeholder.

* Value Stage: A distinct step or phase within the Value Stream.

* Value: The benefit delivered to the stakeholder.

The relationship "X" indicates that a Value Stream is composed of multiple Value Stages.

Think of it like a journey (Value Stream) with multiple stops along the way (Value Stages). Each stage contributes to the overall value delivered at the end of the journey.

NEW QUESTION # 64
