JN0-253 Exam Cram Questions | JN0-253 Sample Questions Answers

We all know that JN0-253 study materials can help us solve learning problems. But if it is too complex, not only can't we get good results, but also the burden of students' learning process will increase largely. Unlike those complex and esoteric materials, our JN0-253 Study Materials are not only of high quality, but also easy to learn. Our study materials do not have the trouble that users can't read or learn because we try our best to present those complex and difficult test sites in a simple way.

Juniper Mist AI, Associate (JNCIA-MistAI) Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which two statements about WLAN templates are correct? (Choose two.)

- A. They can be deployed to a policy.
- B. They can be deployed to a certain site.
- C. They can be deployed to the whole organization.
- D. They can be deployed to a certain switch.

Answer: B,C

Explanation:

WLAN Templates Overview: WLAN templates in Mist AI are used to standardize and manage wireless configurations across multiple locations and devices. They help in maintaining consistent wireless settings and policies throughout the network.

Deployment to the Whole Organization: WLAN templates can indeed be deployed at the organization level. This allows the configurations defined in the template to be applied across all sites and access points within the organization. This approach simplifies the management and ensures uniformity across the network (Juniper Networks).

Deployment to a Certain Site: WLAN templates can also be applied to specific sites. This is useful for organizations with multiple sites having unique wireless requirements. By applying templates at the site level, administrators can tailor configurations to meet local needs while still maintaining control through central management.

NEW QUESTION # 49

Which SLE reports RF interference?

- A. Capacity
- B. Roaming
- C. AP Health
- D. Coverage

Answer: A

Explanation:

Use the Wireless Capacity SLE to track user experiences with RF channel capacity (bandwidth) on your wireless network.

NEW QUESTION # 50

What are two guest portal authentication options in the UI? (Choose two.)

- A. MAC Authentication
- B. SAML
- C. Sponsored Guest
- D. Authentication Code

Answer: C,D

Explanation:

In Juniper Mist Cloud, guest access is managed through the Guest Portal feature, which allows administrators to configure secure and flexible authentication methods for temporary or visitor access. These options are designed to provide a balance between user convenience and network security.

According to the Juniper Mist Guest Access and Captive Portal Configuration Guide, the supported authentication options include: "Authentication Code (Self-registration) and Sponsored Guest workflows, among others, which provide different levels of administrative control and ease of use."

* Authentication Code (A): Visitors receive a temporary authentication code (PIN) via email or SMS that they use to log in. This method is ideal for self-service access while maintaining accountability.

* Sponsored Guest (C): In this mode, guests must be approved by a designated employee or sponsor before gaining access. This adds an extra layer of security by involving internal personnel validation.

MAC Authentication (B) and SAML (D) are not used for guest portals; they are designed for device-based authentication and enterprise-level identity federation, respectively.

NEW QUESTION # 51

Which two statements about webhooks and APIs are correct? (Choose two.)

- A. There is an hourly limit to the number of webhooks that an organization can have.
- B. There is an hourly limit to the number of API calls that an organization can have.
- C. Webhooks are a push from Juniper Mist, and APIs are a pull by the client.
- D. 100% of all Juniper Mist objects are configurable using webhooks.

Answer: B,C

Explanation:

In the Juniper Mist Cloud architecture, both webhooks and APIs are key interfaces for automation, integration, and data exchange with third-party systems. While they both facilitate communication between Mist and external applications, they operate in opposite directions and serve distinct purposes.

According to the Juniper Mist API and Webhook Developer Guide:

* Webhooks are push-based notifications initiated by the Juniper Mist Cloud. When specific events occur (such as device disconnection, client onboarding, or alert generation), Mist sends structured JSON payloads to a preconfigured external URL endpoint.

* APIs (Application Programming Interfaces) are pull-based queries where an external client polls the Mist Cloud to retrieve or update data (e.g., inventory, configuration, or metrics).

Additionally, the Mist Cloud enforces rate limits on API calls to ensure platform stability and fair usage:

"API rate limits are applied on a per-organization basis to prevent excessive polling and to maintain consistent performance." In contrast, webhooks do not have a strict hourly quota because they are event-triggered rather than continuous requests.

Therefore:

* A is correct - Webhooks push, APIs pull.

* B is correct - There is an hourly API rate limit per organization.

Options C and D are incorrect because webhooks are event-based (not rate-limited hourly) and do not configure Mist objects directly—they only send notifications.

NEW QUESTION # 52

How does Mist determine the location of clients in an indoor setting?

- A. GPS
- B. trilateration
- C. probability surface
- D. triangulation

Answer: C

Explanation:

Mist builds location from "Probability Surfaces" not triangulation. The more directional RSSI beam information your client hears, the more data for the location engine to work with creating the probability surfaces, which provides the best possible location accuracy with sub second latency.

NEW QUESTION # 53

.....

Our latest JN0-253 exam dump is comprehensive, covering all the learning content you need to pass the qualifying exams. Users

with qualifying exams can easily access our web site, get their favorite latest JN0-253 study guide, and before downloading the data, users can also make a free demo for an accurate choice. Users can easily pass the exam by learning our JN0-253 practice materials, and can learn some new knowledge, is the so-called live to learn old. Believe in yourself, choosing the JN0-253 Study Guide is the wisest decision. So far, the JN0-253 practice materials have almost covered all the official test of useful materials, before our products on the Internet, all the study materials are subject to rigorous expert review, so you do not have to worry about quality problems of our latest JN0-253 exam dump, focus on the review pass the qualification exam. I believe that through these careful preparation, you will be able to pass the exam
