JN0-336 Exam Topic - JN0-336 Interactive Questions

Our JN0-336 practice materials enjoy great popularity in this line. We provide our JN0-336 practice materials on the superior quality and being confident that they will help you expand your horizon of knowledge of the exam. They are time-tested practice materials, so they are classic. As well as our after-sales services. We can offer further help related with our JN0-336 practice materials which win us high admiration. By devoting in this area so many years, we are omnipotent to solve the problems about the JN0-336 practice exam with stalwart confidence. Providing services 24/7 with patient and enthusiastic staff, they are willing to make your process more convenient.

Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q75-Q80):

NEW QUESTION # 75

Which two statements are true about Juniper ATP Cloud? (Choose two.)

- A. Dynamic analysis is always performed to determine if a file contains malware.
- B. If the cache lookup determines that a file contains malware, static analysis is not performed to verify the results.
- C. If the cache lookup determines that a file contains malware, performed to verify the results.

- D. Dynamic analysis is not always necessary to determine if a file contains malware.

Answer: B,D

Explanation:

Dynamic analysis is not always necessary to determine if a file contains malware, as the ATP Cloud uses a cache lookup to quickly identify known malicious files. If the cache lookup determines that a file contains malware, static analysis is not performed to verify the results. This information can be found on the Juniper website here: https://www.juniper.net/documentation/en_US/release-independent/security/jnpr-security-srx-series/inform

NEW QUESTION # 76

When a security policy is deleted, which statement is correct about the default behavior of active sessions allowed by that policy?

- A. The active sessions allowed by the policy will be marked as a legacy flow and will continue to be forwarded.
- B. The active sessions allowed by the policy will be dropped.
- C. The active sessions allowed by the policy will be reevaluated by the cached
- D. The active sessions allowed by the policy will continue

Answer: A

Explanation:

When a security policy is deleted, the existing sessions that were previously allowed by that policy are not immediately dropped; instead, they are typically treated as legacy flows. This means they are allowed to continue until they naturally end or until the session timeout is reached. This behavior ensures that deleting a policy does not abruptly disrupt ongoing traffic flows that were previously authorized by that policy. This approach helps in avoiding unintended service disruptions, especially in production environments where active connections may be critical to operations.

NEW QUESTION # 77

Exhibit

You just finished setting up your command-and-control (C&C) category with Juniper ATP Cloud. You notice that all of the feeds have zero objects in them.

Which statement is correct in this scenario?

- A. Set the maximum C&C entries within the Juniper ATP Cloud GUI.
- B. Use the commit full command to start the download.
- C. The security intelligence policy must be configured; on a unified security policy
- D. No action is required, the feeds take a few minutes to download.

Answer: D

Explanation:

According to the Juniper Networks JNCIS-SEC Study Guide, when you set up your command-and-control (C&C) category with Juniper ATP Cloud, all of the feeds will initially have zero objects in them.

This is normal, as it can take a few minutes for the feeds to download. No action is required in this scenario and you will notice the feeds start to populate with objects once the download is complete.

NEW QUESTION # 78

Your company is using the Juniper ATP Cloud free model. The current inspection profile is set at 10 MB. You are asked to configure ATP Cloud so that executable files up to 30 MB can be scanned while at the same time minimizing the change in scan time for other file types.

Which configuration should you use in this scenario?

- A. Use the CLI to create a custom profile and increase the scan limit.
- B. Use the ATP Cloud UI to update a custom profile and increase the scan limit for executable files to 30 MB.
- C. Use the ATP Cloud UI to change the default profile to increase the scan limit for all files to 30 MB.
- D. Use the CLI to change the default profile to increase the scan limit for all files to 30 MB.

Answer: B

Explanation:

In this scenario, you should use the ATP Cloud UI to create a custom profile and update the scan limit for executable files to 30 MB. This will ensure that executable files up to 30 MB can be scanned, while at the same time minimizing the change in scan time for other file types. To do this, log in to the ATP Cloud UI and go to the Profiles tab. Click the Create button to create a new profile, and then adjust the scan limits for executable files to 30 MB. Once you have saved the custom profile, you can apply it to the desired systems and the new scan limit will be in effect.

NEW QUESTION # 79

You set up the Juniper ATP Appliance solution on your network and notice that the macOS files are not being analyzed..... malware.

In this scenario, what must you do?

- A. Under Config -> System Profiles->Secondary Cores workspace, create a macOS profile
- B. You must obtain a Apple Mac Mini device and install the secondary core software.
- C. Create a macOS virtual machine on the JATP Appliance and install the secondary core software.
- D. Under Config> System Profiles>Secondary Cores workspace, enable macOS Detection.

Answer: A

NEW QUESTION # 80

.....

We attach importance to candidates' needs and develop the JN0-336 useful test files from the perspective of candidates, and we sincerely hope that you can succeed with the help of our practice materials. Our aim is to let customers spend less time to get the maximum return. By choosing our JN0-336 Study Guide, you only need to spend a total of 20-30 hours to deal with JN0-336 exam, because our JN0-336 study guide is highly targeted and compiled according to the syllabus to meet the requirements of the exam.
