

Fast Download Reliable CMMC-CCA Exam Review–The Best New Exam Papers for CMMC-CCA - Reliable CMMC-CCA Valid Exam Objectives

P.S. Free 2026 Cyber AB CMMC-CCA dumps are available on Google Drive shared by DumpsReview:
<https://drive.google.com/open?id=1XzLG2qNNX4uTGQPDDyLrEtOe0IpG4lCc>

This certification gives us more opportunities. Compared with your colleagues around you, with the help of our CMMC-CCA preparation questions, you will also be able to have more efficient work performance. Our CMMC-CCA study materials can bring you so many benefits because they have the following features. I hope you can use a cup of coffee to learn about our CMMC-CCA training engine. Perhaps this is the beginning of your change.

Before making a final purchase, DumpsReview customers can try the features of the CMMC-CCA practice material with a free demo. If a customer purchases our CMMC-CCA exam preparation material, we will provide them with Free CMMC-CCA Exam Questions updates for up to 1 year. If the CMMC-CCA certification test content changes after your purchase within 1 year, you will instantly get free real questions updates.

New CMMC-CCA Exam Papers, CMMC-CCA Valid Exam Objectives

The Certified CMMC Assessor (CCA) Exam (CMMC-CCA) is one of the popular exams of CMMC-CCA. It is designed for Cyber AB aspirants who want to earn the Certified CMMC Assessor (CCA) Exam (CMMC-CCA) certification and validate their skills. The CMMC-CCA test is not an easy exam to crack. It requires dedication and a lot of hard work. You need to prepare well to clear the CMMC-CCA test on the first attempt. One of the best ways to prepare successfully for the CMMC-CCA examination in a short time is using real Cyber AB CMMC-CCA Exam Dumps.

Cyber AB Certified CMMC Assessor (CCA) Exam Sample Questions (Q92-Q97):

NEW QUESTION # 92

An OSC is looking to bid for a contract to manufacture turboprop engines for an unmanned aerial vehicle (UAV) fleet used by the Army for long-range reconnaissance. To manage production, the OSC will use Industrial Control Systems (ICS) and has documented them in its Operational Technology (OT) inventory. While validating the OSC's proposed assessment scope, the Assessment Team reviews their SSP. How should the C3PAO Assessment Team handle the OSC's OT during the assessment?

- A. Accept the OSC's documentation of policies and procedures as they are.
- B. Assess them against all CMMC practices.
- C. Assess them against CA.L2-3.12.3 - Security Control Monitoring.
- **D. Review the SSP and not assess the OT against other CMMC practices.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Operational Technology (OT), like ICS, is categorized as a Specialized Asset in the CMMC Assessment Scope - Level 2. These assets are in scope but not assessed against the full 110 CMMC practices unless they process, store, or transmit CUI (not specified here). Instead, they must be reviewed in the SSP per CA.L2-

3.12.4 to ensure risk-based management. Option A lacks rigor, Option B limits to one practice incorrectly, and Option C overextends the requirement. D is correct per the scoping guide.

Reference:

CMMC Assessment Scope - Level 2, Section 2.3.4 (Specialized Assets), p. 6: "OT is reviewed in the SSP per CA.L2-3.12.4, not assessed against other practices."

NEW QUESTION # 93

During your review of an OSC's system security control, you focus on CMMC practice SC.L2-3.13.9 - Connections Termination. The OSC uses a custom web application for authorized personnel to access CUI remotely. Users log in with usernames and passwords. The application is hosted on a dedicated server within the company's internal network. The server operating system utilizes default settings for connection timeouts.

Network security is managed through a central firewall, but no specific rules are configured for terminating inactive connections associated with the CUI access application. Additionally, there is no documented policy or procedure outlining a defined period of inactivity for terminating remote access connections. Interviews with IT personnel reveal that they rely solely on users to remember to log out of the application after completing their work. How could the firewall be configured to help achieve the objectives of CMMC practice SC.L2-3.13.9 - Connections Termination, for the remote access application?

- A. Implementing intrusion detection and prevention systems (IDS/IPS) to identify and block suspicious activity on the server
- **B. Creating firewall rules to identify and terminate connections associated with the CUI access application that have been inactive for a predefined period**
- C. Encrypting all traffic between the user device and the server to protect CUI in transit
- D. Blocking all incoming traffic to the server hosting the CUI access application, except from authorized IP addresses

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

SC.L2-3.13.9 requires "terminating connections after a defined period of inactivity." Firewall rules to terminate inactive connections (A) directly enforce this for the CUI application, meeting the practice's intent.

Encryption (B) protects transit data (SC.L2-3.13.8), IDS/IPS (C) detects threats (SI.L2-3.14.6), and IP blocking (D) limits access (AC.L2-3.1.2)-none address inactivity termination. The CMMC guide supports firewall-based timeouts.

Extract from Official CMMC Documentation:

* CMMC Assessment Guide Level 2 (v2.0), SC.L2-3.13.9: "Configure firewalls for inactivity timeouts."

* NIST SP 800-171A, 3.13.9: "Examine firewall rules for termination."

NEW QUESTION # 94

In order to perform an interview, the Lead Assessor MUST ensure interview questions are:

- A. Yes/no questions
- B. Asked by any member of the OSC's team
- **C. Asked to those who implement, perform, or support the practices**
- D. Asked with multiple people simultaneously to limit the number of interviews needed

Answer: C

Explanation:

- * Applicable Requirement: CAP - Interview Guidance.
- * Why C is Correct: Interviews must be directed to personnel responsible for implementing, performing, or supporting practices to ensure accurate and objective evidence is collected.
- * Why Other Options Are Insufficient:
- * A: Yes/no questions do not provide sufficient evidence detail.
- * B: OSC personnel cannot ask themselves assessment questions; only assessors may conduct interviews.
- * D: Group interviews may be used in some cases, but CAP stresses targeted interviews for evidence reliability.

References (CCA Official Sources):

- * CMMC Assessment Process (CAP) v1.0 - Interview Requirements
- * NIST SP 800-171A - Use of Interview as an Assessment Method

NEW QUESTION # 95

An OSC creates standard user accounts with limited capabilities and administrator accounts with full system access. A standard user initiates the uninstall of the anti-virus software, which is organizationally defined as a privileged function. Which of the following would indicate AC.L2-3.1.7: Privileged Functions is properly implemented?

- A. The antivirus software is successfully uninstalled, and the event is captured in an application audit log.
- B. The antivirus software is successfully uninstalled.
- **C. The antivirus software is not uninstalled, and the attempt is captured in an application audit log.**
- D. The antivirus software is not uninstalled.

Answer: C

Explanation:

- * Applicable Requirement: AC.L2-3.1.7 - "Prevent non-privileged users from executing privileged functions and capture the execution of such functions in audit logs."
- * Correct Interpretation:
- * A non-privileged (standard) user should be prevented from performing privileged functions (e.g., uninstalling security software).
- * The attempt must be logged to provide traceability and support accountability.
- * Why C is Correct: It demonstrates both prevention (software not uninstalled) and auditing (attempt captured in a log), exactly matching the practice.
- Why Other Options Are Insufficient:
- * A: Prevention is shown, but there is no evidence of logging.
- * B: Function was not prevented, so requirement not met.
- * D: Logging exists, but privileged action was not prevented.

References (CCA Official Sources):

- * NIST SP 800-171 Rev. 2 - AC.L2-3.1.7
- * NIST SP 800-171A - AC.L2-3.1.7 Assessment Objectives
- * CMMC Assessment Guide - Level 2, AC.L2-3.1.7

NEW QUESTION # 96

You are a CCA working for a C3PAO that has entered into a contractual agreement to provide CMMC assessment services for an OSC. After validating the evidence, the C3PAO feels that the task is beyond its capabilities and informs the OSC that it cannot continue with the assessment. The C3PAO cites "insufficient workforce" as the reason. What principle of the CMMC CoPC has the C3PAO broken?

- A. Information Integrity
- **B. Professionalism**
- C. Adherence to Materials and Methods
- D. Respect for Intellectual Property

Answer: B

Explanation:

Comprehensive and Detailed in Depth Explanation:

Withdrawing after agreeing to a contract due to workforce issues breaches Professionalism (Option C).

Options A, B, and D are unrelated.

Extract from Official Document (CoPC):

* Paragraph 2.1 - Professionalism (pg. 4): "Fulfill all commitments of contractual agreements with the OSC." References:

CMMC Code of Professional Conduct, Paragraph 2.1.

NEW QUESTION # 97

.....

Once the user has used our CMMC-CCA test prep for a mock exercise, the product's system automatically remembers and analyzes all the user's actual operations. The user must complete the test within the time specified by the simulation system, and there is a timer on the right side of the screen, as long as the user begins the practice of CMMC-CCA quiz guide, the timer will run automatic and start counting. If the user does not complete the mock test question in a specified time, the practice of all CMMC-CCA valid practice questions previously done by the user will automatically uploaded to our database. The system will then generate a report based on the user's completion results, and a report can clearly understand what the user is good at. Finally, the transfer can be based on the CMMC-CCA Valid Practice Questions report to develop a learning plan that meets your requirements. With constant practice, users will find that feedback reports are getting better, because users spend enough time on our CMMC-CCA test prep.
