選擇2V0-17.25題庫更新讓您簡單快速解決VMware Cloud Foundation 9.0 Administrator考試

PDFExamDumps的資深專家團隊研究出了針對VMware 2V0-17.25考試的培訓教材。通過PDFExamDumps提供的教材培訓和學習，通過VMware 2V0-17.25 認證考試將會很簡單。PDFExamDumps能100%保證你首次參加VMware 2V0-17.25 認證考試就可以成功通過。我們給你提供的考試練習題和答案將在你考試的時候會出現。當你選擇了我們的幫助，PDFExamDumps承諾給你一份準確而全面的考試資料，而且會給你提供一年的免費更新服務。

最新的 VCP-VCF Administrator 2V0-17.25 免費考試真題 (Q57-Q62):

問題 #57

An administrator has been tasked with updating the version of VMware Tools on virtual machines that have been migrated into a VMware Cloud Foundation (VCF) instance so that they are compliant with the company's security policies.

The following information is shared with the administrator about this task:

- The VMs have been migrated from environments running earlier releases of vSphere.
- The VMs are spread across multiple clusters within a single workload domain in the VCF instance.
- The upgrade must not initiate a reboot of the VMs to avoid downtime to the business.

Which three steps should the administrator perform in order to complete this task? (Choose three.)

- A. Use vSphere Lifecycle Manager in the VI workload domain vCenter to initiate the upgrade.
- B. Select the Upgrade to Match Host option.
- C. Select the Set Auto Update option and set its value to On.
- D. Use SDDC Manager in the management domain to initiate the upgrade.
- E. Select the cluster hosting the VMs to upgrade.
- F. Select the VI workload domain so that all VMs across all clusters are automatically selected.

答案: A,B,C

解題說明:

Comprehensive and Detailed Explanation From Exact Extract:

As defined in the VMware Cloud Foundation Administration Guide and vSphere Lifecycle Manager official documentation, the correct way to upgrade VMware Tools at scale across multiple clusters and without initiating a VM reboot is as follows:

B). Use vSphere Lifecycle Manager in the VI workload domain vCenter to initiate the upgrade.

The official guidance is to use vSphere Lifecycle Manager (vLCM) for managing VMware Tools versions across VMs. This tool allows you to select multiple clusters or the entire workload domain and execute VMware Tools upgrades centrally.

D). Select the Upgrade to Match Host option.

The "Upgrade to Match Host" setting in vSphere Lifecycle Manager is specifically designed to align the VMware Tools version in the guest with the version included with the ESXi host, and can be applied without a forced VM reboot. The upgrade will complete the next time VMware Tools starts or during the next guest OS reboot or shutdown initiated by the user or other processes.

F). Select the Set Auto Update option and set its value to On.

The "Auto Update" option for VMware Tools, when set to On, allows VMware Tools to automatically update to the latest version whenever the VM is powered on or rebooted, without requiring the administrator to intervene or force a downtime event.

Why Not the Other Options?

A). Selecting the VI workload domain alone does not guarantee a compliant upgrade process; the upgrade must be triggered via Lifecycle Manager with the proper options set.

C). Selecting a single cluster would not meet the requirement for VMs spread across multiple clusters.

E). SDDC Manager does not manage or trigger VMware Tools upgrades at the VM level.

Summary:

To upgrade VMware Tools on all relevant VMs in a VCF workload domain, and to do so without forced reboots, the administrator should:

Use vSphere Lifecycle Manager in the VI workload domain vCenter (B),

Select the Upgrade to Match Host option (D),

And enable Auto Update for VMware Tools (F).

This method is fully supported by official VMware best practices and documentation.

問題 #58

An administrator has been tasked with creating an alert in VMware Cloud Foundation (VCF) Operations with the following settings:

Wait cycle: 2

Cancel cycle: 2

Assuming the alert is not resolved, how much time elapses by default between the symptom triggering and the alert automatically cancelling itself?

- A. 4 minutes
- B. 40 minutes
- C. 10 minutes
- D. 20 minutes

答案: D

解題說明:

The VCF 9.0 Operations Guide - Alerts and Policies explains how alert cycles are calculated:

Wait Cycle: The number of consecutive collection cycles that the symptom must remain true before the alert is triggered.

Cancel Cycle: The number of consecutive collection cycles that the symptom must not be true before the alert is canceled.

Default Collection Interval: VCF Operations collects data every 5 minutes by default.

Given the settings:

Wait cycle = 2 → The condition must persist for 2×5 minutes = 10 minutes before the alert triggers.

Cancel cycle = 2 → The condition must clear for 2×5 minutes = 10 minutes before the alert cancels.

Thus, the total elapsed time between the symptom being triggered and the alert being automatically canceled (if unresolved) is 10 minutes wait + 10 minutes cancel = 20 minutes.

Other options:

40 minutes (A) assumes a longer interval but is incorrect.

4 minutes (B) and 10 minutes (C) do not align with the default 5-minute cycle $\times$ 2 logic.

Therefore, the correct answer is 20 minutes.

問題 #59

An administrator is tasked with deploying several VMware ESX hosts in a new VMware environment. The administrator wants to understand the general flow of a manual ESX installation and setup process in VMware Cloud Foundation (VCF).

What are the stages of the ESX deployment process?

- A. Install vCenter Server Configure cluster settings Deploy ESX using VCF Installer Create virtual machines
- **B. Boot from installation media Select target disk Configure management network Set root password**
- C. Install ESX using VCF Installer Configure host settings Perform hardware compatibility check Create datastores
- D. Hardware validation Network configuration ESX installation Join vCenter

答案: B

解題說明:

Boot from installation media: The host is started from the ESXi ISO image, either via physical media, virtual media through iLO/iDRAC, or PXE boot.

Select target disk: During setup, administrators select the disk or device where ESXi will be installed.

Configure management network: After installation, the Direct Console User Interface (DCUI) is used to set up basic network parameters for the management interface (IP address, DNS, gateway).

Set root password: A secure root password is set to complete the initial setup of the host.

問題 #60

An administrator configures a new NSX overlay segment for virtual desktops using default segment policies. Desktops must obtain IPv4 leases from a DHCP server on the same segment. What must the administrator do?

- A. Clone default IP discovery profile, disable DHCP server block, and apply.
- **B. Edit default segment security profile, disable DHCP server block, and apply.**
- C. Clone default segment security profile, disable DHCP server block, and apply.
- D. Edit default IP discovery profile, disable DHCP server block, and apply.

答案: B

解題說明:

In NSX 4.x integrated with VCF 9.0, default segment security profiles block DHCP servers by default. The NSX Admin Guide states: "To allow DHCP servers on a segment, edit the applied segment security profile and set the DHCP Server Block option to NO." Cloning profiles (B, C) is an optional best practice but not required for functionality. The DHCP server block resides in the security profile, not the IP discovery profile, making C and D incorrect. Therefore, the required step is to edit the default segment security profile, set DHCP Server Block = NO, and apply it.

問題 #61

Which vSphere feature monitors ESXi host health status, including hardware metrics like temperature and power supply data, and can raise alerts if thresholds are breached?

- A. vSphere Host Profiles
- **B. vCenter Hardware Status plug-in**
- C. vSphere Lifecycle Manager (vLCM)
- D. vSphere Health

答案: B

解題說明:

The vCenter Hardware Status plug-in displays hardware sensor data (temperature, power, etc.) directly in the vSphere Client.

vSphere Health checks configuration and compatibility, vLCM manages patching and firmware, and Host Profiles enforce configuration consistency.

問題 #62

.....

PDFExamDumps 提供下載的 VMware 的 2V0-17.25 證照考試的問題範例，使你購買無風險的過程，這是一個使用版的練習題，讓你看到考題的問題和答案的品質，以及在你決定購買之前的價值，相信 VMware 的 2V0-17.25 證照考試的樣品足以定性，成為眾多考生滿意的產品。該考題還包括PDF格式和模擬考試測試版本兩種，你可以根據自己的情況去選擇適合自己的。

最新2V0-17.25題庫資訊: https://www.pdfexamdumps.com/2V0-17.25_valid-braindumps.html

雖然有其他的線上VMware的2V0-17.25考試培訓資源在市場上，但我們PDFExamDumps VMware的2V0-17.25考試培訓資料是最好的，PDFExamDumps 最新2V0-17.25題庫資訊對客戶的承諾是我們可以幫助客戶100%通過IT認證考試，這不僅僅可以減輕考生的心裏壓力，也可以讓考生輕鬆通過2V0-17.25考試，VCP-VCF Administrator認證技術員 2V0-17.25認證驗證的能力，執行基本的故障排除和桌面型電腦和可攜式Macintosh系統，如iMac電腦和MacBook Pro維修，我們PDFExamDumps 最新2V0-17.25題庫資訊網站不僅產品真實，而且價格也很合理，當你選擇我們的產品，我們還提供一年的免費更新，讓你更在充裕的時間裏準備考試，這樣也可以消除你對考試緊張的心理，達到一個兩全其美的辦法了，所以，快點購買PDFExamDumps的2V0-17.25考古題吧。

不知時光道友想要揚眉手中何物，準備血祭天涼城，雖然有其他的線上VMware的2V0-17.25考試培訓資源在市場上，但我們PDFExamDumps VMware的2V0-17.25考試培訓資料是最好的，PDFExamDumps對客戶的承諾是我們可以幫助客戶100%通過IT認證考試。

選擇我們最好的考試認證資料2V0-17.25題庫更新: VMware Cloud Foundation 9.0 Administrator, 復習準備VMware 2V0-17.25很輕鬆

這不僅僅可以減輕考生的心裏壓力，也可以讓考生輕鬆通過2V0-17.25考試，VCP-VCF Administrator認證技術員 2V0-17.25認證驗證的能力，執行基本的故障排除和桌面型電腦和可攜式Macintosh系統，如iMac電腦和MacBook Pro維修，我們PDFExamDumps網站不僅產品真實，而且2V0-17.25價格也很合理，當你選擇我們的產品，我們還提供一年的免費更新，讓你更在充裕的時間裏準備考試，這樣也可以消除你對考試緊張的心理，達到一個兩全其美的辦法了。
