CFRP證照資訊 - CFRP認證題庫

在這個資訊時代，IT行業被很多人關注，但是在如今人才濟濟的社會裏任然比較缺乏IT人。很多公司都招聘IT人才，他們一般考察IT人才的能力會參考他們擁有的IT相關認證證書，所以擁有一些IT相關的認證證書是受很多公司歡迎的。但是這些認證證書也不是很容易就能拿到的。Psychiatric Rehabilitation Association CFRP 就是一個相當有難度的認證考試，雖然很多人報名參加Psychiatric Rehabilitation Association CFRP考試，但是通過率並不是很高。

問題 #47

When significant cultural differences are identified between a practitioner and the family he serves, the BEST course of action for the practitioner to take is to

- A. increase his understanding of the family's cultural traits.
- B. share his underlying prejudicial beliefs.
- C. share his personal cultural norms and values.
- D. increase his understanding of the family's coping strategies.

答案： A

解題說明：

Cultural competence is a cornerstone of interpersonal competencies in the CFRP framework. When significant cultural differences arise between a practitioner and a family, the best course of action is to increase understanding of the family's cultural traits to provide respectful and relevant support. The CFRP study guide states, "When cultural differences are identified, practitioners should prioritize increasing their understanding of the family's cultural traits to ensure culturally competent service delivery." Sharing personal norms (option A) or prejudicial beliefs (option C) is inappropriate and unprofessional. Understanding coping strategies (option D) is valuable but secondary to cultural traits in addressing differences.

* CFRP Study Guide (Section on Interpersonal Competencies): "The best response to significant cultural differences is for practitioners to increase their understanding of the family's cultural traits, ensuring respectful and effective support." 問題 #48

According to the Adverse Childhood Experience (ACE) Study, adverse childhood experiences have been linked to the following health problems.

- A. Diabetes, acne, and anxiety
- B. Cancer, sexually transmitted diseases, and depression
- C. Attention deficit hyperactivity disorder, eczema, and asthma
- D. Obesity, psoriasis, and head trauma

答案： B

解題說明：

Supporting health and wellness in the CFRP framework includes understanding the long-term impacts of adverse childhood experiences (ACEs). The ACE Study links ACEs to health problems such as cancer, sexually transmitted diseases, and depression, due to their influence on physical and mental health outcomes.

The CFRP study guide states, "The Adverse Childhood Experience Study demonstrates that ACEs are associated with increased risks of cancer, sexually transmitted diseases, and depression, reflecting their broad impact on health." Options A, B, and D include conditions (e.g., acne, psoriasis, eczema) not directly linked to ACEs in the study's findings.

* CFRP Study Guide (Section on Supporting Health and Wellness): "Per the ACE Study, adverse childhood experiences are linked to health issues like cancer, sexually transmitted diseases, and depression, highlighting their significant health consequences."

問題 #49

To establish a trusting relationship based on a child's needs, the practitioner would utilize

- A. strategy development.
- B. active listening.
- C. strength discovery.
- D. conflict resolution.

答案： B

解題說明：

Building a trusting relationship with a child is a cornerstone of interpersonal competencies in the CFRP framework. Active listening is the most effective technique for establishing trust, as it demonstrates empathy and validates the child's needs and experiences. The CFRP study guide states, "Active listening is essential for establishing a trusting relationship with a child, as it ensures the child feels heard and understood based on their unique needs." Strategy development (option A) and strength discovery (option B) are important but secondary to building trust. Conflict resolution (option D) is relevant in specific situations but not the primary method

for trust-building.

* CFRP Study Guide (Section on Interpersonal Competencies): "To establish a trusting relationship based on a child's needs, practitioners must utilize active listening to validate the child's experiences and foster trust." References:

問題 #50

A child's mother expressed concern that between her home, the child's father's home, and school, there are too many competing behavioral expectations. What is the BEST course of action for the practitioner to take?

- A. Explain services are limited to the behavioral concerns and goals at the mother's home.
- **B. Convene a team meeting with both parents at the school to identify concerns and goals.**
- C. Inform the mother that agency policy prohibits interference with school concerns and goals.
- D. Require weekly meetings with both parents to review concerns and goals in each home.

答案: B

解題說明:

The CFRP framework emphasizes collaborative and family-driven planning within the domain of Assessment, Planning, and Outcomes. When a mother raises concerns about competing behavioral expectations across different environments (her home, the father's home, and school), the best course of action is to convene a team meeting with both parents and school officials to identify concerns and align goals. This approach fosters consistency and collaboration across settings. The CFRP study guide notes, "To address competing behavioral expectations across home and school environments, practitioners should convene a team meeting with parents and school representatives to collaboratively identify concerns and establish consistent goals." Requiring weekly meetings (option A) may be excessive without first establishing a unified plan. Limiting services to the mother's home (option D) or citing agency policy (option C) disregards the need for systemic collaboration.

問題 #51

To nurture resilience in children, practitioners must

- A. avoid using humor to minimize disappointment.
- B. emphasize performance over learning.
- **C. emphasize that mistakes are opportunities for growth.**
- D. teach the development realistic goals.

答案: C

解題說明:

Fostering resilience is a core strategy for facilitating recovery in the CFRP framework. Practitioners nurture resilience in children by emphasizing that mistakes are opportunities for growth, which encourages a growth mindset and perseverance. The CFRP study guide states, "To nurture resilience, practitioners should emphasize that mistakes are opportunities for growth, helping children develop a positive approach to challenges." Emphasizing performance (option A) can increase pressure and hinder resilience. Teaching realistic goals (option C) is important but less directly tied to resilience. Avoiding humor (option D) is not a resilience strategy and may limit emotional connection.

* CFRP Study Guide (Section on Strategies for Facilitating Recovery): "Nurturing resilience in children involves emphasizing that mistakes are opportunities for growth, fostering a growth mindset and adaptability." References:
