Qlik Sense System Administrator Certification Exam - 2022 Sample Questions (Q77-Q82):

NEW QUESTION # 77

A user creates an app in Qlik Sense Desktop using a database as the data source. The user is able to connect to the database and reload the app with new data. To share the app, the user emails the app QVF file to the system administrator. The administrator imports the app successfully and publishes the app to the Everyone stream in the hub. The administrator creates a task to reload the data in the app every 12 hours. The next day, the user observes that the data has NOT been refreshed in the app. No modifications have been made to the access rights for the data source.

- A. A security rule prevents the data connection from loading data into the app
- B. A custom property limits which tables can be accessed from the database
- C. The system administrator does NOT have permission to access the source database

- D. An identically-named data connection with another data source existed prior to the import

Answer: B
