Quiz 2026 Fortinet NSE6_SDW_AD-7.6: Newest Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator Practice Test

Our NSE6_SDW_AD-7.6 study materials have a high quality which is mainly reflected in the pass rate. Our product can promise a higher pass rate than other study materials. 99% people who have used our NSE6_SDW_AD-7.6 study materials passed their exam and got their certificate successfully, it is no doubt that it means our NSE6_SDW_AD-7.6 Study Materials have a 99% pass rate. So our product will be a very good choice for you. If you are anxious about whether you can pass your exam and get the certificate, we think you need to buy our NSE6_SDW_AD-7.6 study materials as your study tool, our product will lend you a good helping hand.

Created on the exact pattern of the actual NSE6_SDW_AD-7.6 tests, Dumpexams's dumps comprise questions and answers and provide all important NSE6_SDW_AD-7.6 information in easy to grasp and simplified content. The easy language does not pose any barrier for any learner. The complex portions of the NSE6_SDW_AD-7.6 certification syllabus have been explained with the help of simulations and real-life based instances. The best part of NSE6_SDW_AD-7.6 Exam Dumps are their relevance, comprehensiveness and precision. You need not to try any other source for NSE6_SDW_AD-7.6 exam preparation. The innovatively crafted dumps will serve you the best; imparting you information in fewer number of questions and answers.

Pass Guaranteed Quiz Useful Fortinet - NSE6_SDW_AD-7.6 - Fortinet NSE 6

- SD-WAN 7.6 Enterprise Administrator Practice Test

Many candidates find the Fortinet NSE6_SDW_AD-7.6 exam preparation difficult. They often buy expensive study courses to start their Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator (NSE6_SDW_AD-7.6) certification exam preparation. However, spending a huge amount on such resources is difficult for many Fortinet exam applicants. The latest Fortinet NSE6_SDW_AD-7.6 Exam Dumps are the right option for you to prepare for the NSE6_SDW_AD-7.6 certification test at home. Dumpexams has launched the NSE6_SDW_AD-7.6 exam dumps with the collaboration of world-renowned professionals.

Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator Sample Questions (Q55-Q60):

NEW QUESTION # 55
Refer to the exhibit, which shows the SD-WAN rule status and configuration.

Based on the exhibit, which change in the measured latency will first make HUB1-VPN3 the new preferred member?

- A. When HUB1-VPN1 has a latency of 200 ms
- B. When HUB1-VPN3 has a latency of 90 ms
- C. When HUB1-VPN3 has a latency of 80 ms
- D. When HUB1-VPN3 has a lower latency than HUB1-VPN1 and HUB1-VPN2

Answer: A

Explanation:
The rule is in priority mode with HUB1-VPN1 (seq 4) as the first preferred member, HUB1-VPN2 second, and HUB1-VPN3 third. Latency itself does not cause HUB1-VPN3 to become preferred unless a higher- priority member fails SLA. If HUB1-VPN1's latency exceeds the SLA threshold (here simulated by latency reaching 200 ms), FortiGate stops using it and moves down the priority list. That is when HUB1-VPN3 could become the active path.

NEW QUESTION # 56
You manage an SD-WAN topology. You will soon deploy 50 new branches.
Which three tasks can you do in advance to simplify this deployment? (Choose three.)

- A. Update the DHCP server configuration.
- B. Create a ZTP template.
- C. Define metadata variables value for each device.
- D. Create model devices.
- E. Create policy blueprint.

Answer: B,D,E

Explanation:
When planning to deploy a large number of branches (e.g., 50), Fortinet recommends several preparatory steps to simplify and automate the rollout. Creating model devices allows you to predefine configurations and settings that can be cloned or adapted for each branch, saving time and minimizing manual errors. Preparing a Zero Touch Provisioning (ZTP) template enables automatic onboarding and provisioning of new FortiGates as soon as they come online, reducing manual intervention. Lastly, creating a policy blueprint allows for standardized policy deployment across all branches, ensuring consistent security and SD-WAN rule enforcement. This holistic approach streamlines the deployment process, allows for rapid scaling, and ensures that all devices are configured according to corporate policy from day one.

NEW QUESTION # 57
You used the HUB IPsec_Recommended and the BRANCH IPsec_Recommended templates to define the overlay topology. Then, you used the SD-WAN template to define the SD- WAN members, rules, and performance SLAs.
You applied the changes to the devices and want to use the FortiManager monitors menu to get a graphical view that shows the status of each SD-WAN member.

Which statement best explains how to obtain this graphical view?

- A. Use the SD-WAN monitor asset view to get a donut view and a table view that shows the status of each device and the SLA status of each SD-WAN member.
- B. Use the SD-WAN monitor template view to get a map view of the branches, hub, and tunnel status, including the SLA pass or missed status.
- C. Use the VPN monitor map view to get a map view of the branches, hub, and tunnel status, including the SLA pass or missed status.
- D. Use the SD-WAN monitor table view to get a donut view and a table view that shows the status of each SD-WAN member, including the SLA pass or missed status.

Answer: D

Explanation:
The SD-WAN monitor's table view in FortiManager provides a donut visualization plus a detailed table that shows each SD-WAN member's status and SLA pass/miss, giving the per-member health view you're after.

NEW QUESTION # 58

Exhibit.

Refer to the exhibit, which shows the SD-WAN rule status and configuration.
Based on the exhibit, which change in the measured packet loss will make HUB1-VPN3 the new preferred member?

- A. When all three members have the same packet loss
- B. When HUB1-VPN1 has 4% packet loss
- C. When HUB1-VPN3 has 4% packet loss
- D. When HUB1-VPN1 has 12% packet loss

Answer: A

NEW QUESTION # 59

Refer to the exhibits.

You use FortiManager to configure SD-WAN on three branch devices.
When you install the device settings. FortiManager prompts you with the error "Copy Failed" for the device branch1_fat When you click the log button. FortiManager displays the message shown in the exhibit.

- A. Check the metadata variable definitions, and review the per-device mapping configuration.
- B. Check the connection between branch1_fgt and FortiManager
- C. Gateways for all members in a zone must be defined the same way. Specify the gateway of the SD- WAN member port! without metadata variables.
- D. Based on the exhibits, which statement best describes the issue and how you can resolve it?
- E. Remove the installation target for the SD-WAN member port4. You cannot combine metadata variable and installation targets.

Answer: A

NEW QUESTION # 60

......

the foundation of improving yourself and achieving success in the future, Fortinet NSE6_SDW_AD-7.6 Practice Test Immediate download after payment, Fortinet NSE6_SDW_AD-7.6 Practice Test You can prepare them within a few days' effort only.

Shows how to architect microservice-based systems, individual microservices, and nanoservices, What's the best tip in it, Whichever demo you choose on trial, you will attract by the NSE6_SDW_AD-7.6 Exam Guide.

Free PDF Quiz NSE6_SDW_AD-7.6 - Fortinet NSE 6 - SD-WAN 7.6 Enterprise Administrator High Hit-Rate Practice Test
