## Fortinet FCSS\_SASE\_AD-25 Reliable Braindumps Free & FCSS\_SASE\_AD-25 Cert Guide

If you are sure that you want to be better, then you must start taking some measures. Selecting FCSS\_SASE\_AD-25 practice prep may be your key step. If you are determined to pass the exam, our FCSS\_SASE\_AD-25 study materials can provide you with everything you need. You can have the FCSS\_SASE\_AD-25 Learning Materials, study plans and necessary supervision you need. You will have no reason to stop halfway until you get success.

### Fortinet FCSS\_SASE\_AD-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>SASE Deployment: This section of the exam measures the knowledge of Implementation Consultants and focuses on the practical aspects of deploying FortiSASE. Candidates will explore user onboarding methods, configuration of administration settings, and the application of security posture checks with compliance rules. The exam also includes key functions such as SIA, SSA, and SPA, alongside the design of security profiles that perform effective content inspection. By combining these tasks, learners demonstrate readiness to roll out secure and scalable deployments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Advanced FortiSASE Solutions: This section of the exam measures the expertise of Solution Architects and validates the ability to work with advanced FortiSASE features. It covers deployment of SD-WAN using FortiSASE, implementation of Zero Trust Network Access (ZTNA), and the overall role of FortiSASE in optimizing enterprise connectivity. The section highlights how these advanced solutions improve flexibility, enforce zero-trust principles, and extend security controls across distributed networks and cloud systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Analytics and Monitoring: This section of the exam measures the skills of Security Analysts and emphasizes the monitoring and reporting aspects of FortiSASE. Candidates are expected to configure dashboards, logging settings, and analyze reports for user traffic and security issues. Additionally, they must use FortiSASE logs to identify potential threats and provide insights into incidents or abnormal behavior. The focus is on leveraging analytics for operational visibility and strengthening the organization's security posture.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>SASE Architecture and Components: This section of the exam measures the skills of Network Engineers and introduces the fundamentals of SASE within enterprise environments. Candidates are expected to understand the SASE architecture, identify FortiSASE components, and build deployment cases for real-world scenarios. The content emphasizes how SASE can be integrated into a hybrid network, showcasing secure design principles and the use of FortiSASE capabilities to support business and security objectives.</li> </ul>

## Fortinet FCSS - FortiSASE 25 Administrator Sample Questions (Q39-Q44):

### NEW QUESTION # 39

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. Log allowed traffic is set to Security Events for all policies.
- B. There are no security profile groups applied to all policies.
- C. Digital experience monitoring is not configured.
- D. The web filter security profile is not set to Monitor.

**Answer: A**

Explanation:

The issue of an almost empty daily summary report in FortiSASE can often be traced back to how logging is configured within the system. Specifically, if "Log Allowed Traffic" is set to "Security Events" for all policies, it means that only security-related events (such as threats or anomalies) are being logged, while normal, allowed traffic is not being recorded. Since most traffic in a typical network environment is allowed, this configuration would result in very little data being captured and subsequently reported in the daily summary.

Here's a breakdown of why the other options are less likely to be the cause:

- B. There are no security profile groups applied to all policies: While applying security profiles is important for comprehensive protection, their absence does not directly affect the volume of data in reports unless specific logging settings are also misconfigured.
- C. The web filter security profile is not set to Monitor: This option pertains specifically to web filtering activities. Even if web filtering is not set to monitor mode, other types of traffic and logs should still populate the report.
- D. Digital experience monitoring is not configured: Digital Experience Monitoring (DEM) focuses on user experience metrics rather than general traffic logging. Its absence would not lead to an almost empty report.

To resolve this issue, administrators should review the logging settings across all policies and ensure that "Log Allowed Traffic" is appropriately configured to capture the necessary data for reporting purposes.

Fortinet FCSS FortiSASE Documentation - Reporting and Logging Best Practices FortiSASE Administration Guide - Configuring Logging Settings

### NEW QUESTION # 40

How do security profile group objects behave when central management is enabled on FortiSASE?

- A. Objects that are only flow-based are supported.
- B. Objects created on FortiSASE can be retrieved on FortiManager.
- C. Objects are considered read-only on FortiSASE.

- D. Objects support two-way synchronization.

**Answer: C**

Explanation:

When central management is enabled, security profile group objects are managed exclusively through FortiManager, making them read-only on the FortiSASE portal to ensure centralized policy control.

#### NEW QUESTION # 41

Which two advantages does FortiSASE bring to businesses with microbranch offices that have FortiAP deployed for unmanaged devices? (Choose two.)

- A. It simplifies management and provisioning.
- B. It eliminates the requirement for an on-premises firewall.
- C. It uses zero trust network access (ZTNA) tags to perform device compliance checks.
- D. It secures internet access both on and off the network.

**Answer: A,D**

Explanation:

FortiSASE extends secure internet access to users regardless of their location and streamlines the management and provisioning of security policies and services for microbranch offices with unmanaged devices.

#### NEW QUESTION # 42

Refer to the exhibit.

In the user connection monitor, the FortiSASE administrator notices the user name is showing random characters. Which configuration change must the administrator make to get proper user information?

- A. Configure the username using FortiSASE naming convention.
- B. Change the deployment type from SWG to VPN.
- C. Turn off log anonymization on FortiSASE.
- D. Add more endpoint licenses on FortiSASE.

**Answer: C**

Explanation:

In the user connection monitor, the random characters shown for the username indicate that log anonymization is enabled. Log anonymization is a feature that hides the actual user information in the logs for privacy and security reasons. To display proper user information, you need to disable log anonymization.

Log Anonymization:

When log anonymization is turned on, the actual usernames are replaced with random characters to protect user privacy. This feature can be beneficial in certain environments but can cause issues when detailed user monitoring is required.

Disabling Log Anonymization:

Navigate to the FortiSASE settings.

Locate the log settings section.

Disable the log anonymization feature to ensure that actual usernames are displayed in the logs and user connection monitors.

FortiSASE 23.2 Documentation: Provides detailed steps on enabling and disabling log anonymization.

Fortinet Knowledge Base: Explains the impact of log anonymization on user monitoring and logging.

#### NEW QUESTION # 43

A FortiSASE administrator is configuring a Secure Private Access (SPA) solution to share endpoint information with a corporate FortiGate.

Which three configuration actions will achieve this solution? (Choose three.)

- A. Register FortiGate and FortiSASE under the same FortiCloud account.
- B. Authorize the corporate FortiGate on FortiSASE as a ZTNA access proxy.
- C. Add the FortiGate IP address in the secure private access configuration on FortiSASE.
- D. Apply the FortiSASE zero trust network access (ZTNA) license on the corporate FortiGate.

- E. Use the FortiClient EMS cloud connector on the corporate FortiGate to connect to FortiSASE

Answer: A,B,E

Explanation:

FortiOS 7.2 Administration Guide: Provides details on configuring Secure Private Access and integrating with FortiGate.

FortiSASE 23.2 Documentation: Explains how to set up and manage connections between FortiSASE and corporate FortiGate.

## NEW QUESTION # 44

.....

FCSS\_SASE\_AD-25 exam dumps have a higher pass rate than products in the same industry. If you want to pass FCSS\_SASE\_AD-25 certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, FCSS\_SASE\_AD-25 exam prep provides everything possible to ensure their success. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain FCSS\_SASE\_AD-25 Certification. In FCSS\_SASE\_AD-25 exam dumps, you can do it.
