## SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q58-Q63):

NEW QUESTION # 58

In which SAP Activate methodology phase do consultants configure business processes based on the information gathered in the Fit-to-Standard workshops?

- A. Explore
- B. Deploy
- **C. Realize**
- D. Prepare

**Answer: C**

Explanation:

The SAP Activate methodology outlines the phases for implementing SAP S/4HANA Cloud Public Edition.

One crucial phase is the 'Explore' phase. During this phase, consultants work closely with the business to understand its processes and requirements through Fit-to-Standard workshops. These workshops are designed to identify the best fit of the standard SAP S/4HANA processes with the business's needs. It's a collaborative effort to explore the capabilities of SAP S/4HANA Cloud and configure the business processes accordingly.

This phase is fundamental in ensuring that the solution is tailored to meet the specific needs of the business, setting the foundation for a successful implementation.

#### **NEW QUESTION # 59**

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- A. When the project status is "In Progress"
- B. When the project status is "Completed"
- C. When the project status is "Not Started"
- **D. When the project status is "Finished"**

**Answer: D**

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings. #### **NEW QUESTION # 60**

Where are the manual test cases created for customer User Acceptance Testing?

- A. SAP Signavio Process Navigator
- B. SAP Solution Manager
- C. Test Automation Tool
- **D. SAP Cloud ALM**

**Answer: D**

#### **NEW QUESTION # 61**

Where can you find packaged integration content if there is no SAP Best Practices content available?

- A. SAP BTP Cockpit
- B. SAP Fiori Apps Reference Library
- **C. SAP Business Accelerator Hub**
- D. SAP Extensibility Explorer

**Answer: C**

Explanation:

If there is no SAP Best Practices content available for a specific integration scenario, you can find packaged integration content in the SAP Business Accelerator Hub. The SAP Business Accelerator Hub is a central repository of integration content for SAP and non-SAP applications, such as APIs, events, integration flows, and adapters. You can browse, discover, and download the integration content that suits your needs and import it into your SAP Integration Suite tenant. You can also use the SAP Business Accelerator Hub to request new integration content or provide feedback on existing content. ### NEW QUESTION # 62

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.
- B. Evaluate the L2 Business-Driven Configuration Questionnaire responses.
- C. Review the integration requirements collected from the Digital Discovery Assessment.
- D. Upload customer master data in the Starter system using migration templates.

Answer: A,C

Explanation:

Before the first Fit-to-Standard workshop, the consultant should do the following activities:

\* Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment. This is to ensure that the Starter system reflects the agreed scope of the project and does not include any unnecessary or out-of-scope items. The consultant can use the Scope Item Management app to deactivate scope items<sup>1</sup>.

\* Review the integration requirements collected from the Digital Discovery Assessment. This is to understand the customer's integration needs and prepare for the integration topics that will be discussed in the Fit-to-Standard workshop. The consultant can use the Integration Solution Advisor tool to review the integration requirements and the recommended integration scenarios<sup>2</sup>.

The consultant should NOT do the following activities before the first Fit-to-Standard workshop:

\* Upload customer master data in the Starter system using migration templates. This is not required before the first Fit-to-Standard workshop, as the customer master data is not relevant for the process validation. The consultant should upload the customer master data in the Quality system after the Fit-to-Standard workshop, using the SAP S/4HANA Migration Cockpit<sup>3</sup>.

\* Evaluate the L2 Business-Driven Configuration Questionnaire responses. This is not required before the first Fit-to-Standard workshop, as the L2 Business-Driven Configuration Questionnaire is not available at this stage. The consultant should evaluate the L2 Business-Driven Configuration Questionnaire responses after the Fit-to-Standard workshop, using the SAP Activate Methodology.
