Our FCP_FMG_AD-7.4 exam torrent is available in different versions. Whether you like to study on a computer or enjoy reading paper materials, our test prep can meet your needs. Our PDF version of the FCP_FMG_AD-7.4 quiz guide is available for customers to print. You can print it out, so you can practice it repeatedly conveniently. Our FCP_FMG_AD-7.4 test prep take full account of your problems and provide you with reliable services and help you learn and improve your ability and solve your problems effectively. Once you choose our FCP_FMG_AD-7.4 Quiz guide, you have chosen the path to success. We are confident and able to help you realize your dream. A higher social status and higher wages will not be illusory. I will introduce you to the advantages of our FCP_FMG_AD-7.4 exam torrent.

Fortinet FCP_FMG_AD-7.4 Exam Syllabus Topics:

| Topic	Details
Topic 1	• Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
Topic 2	• Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
Topic 3	• Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
Topic 4	• Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
Topic 5	• Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.

FCP_FMG_AD-7.4 Pdf Demo Download - Valid FCP_FMG_AD-7.4 Exam Sims

Our Lead2Passed's FCP_FMG_AD-7.4 exam training materials are mainly downloaded in PDF and software. We will regularly update, and will always provide the latest and the most accurate Fortinet FCP_FMG_AD-7.4 exam authentication information. With efforts for many years, the passing rate of our FCP_FMG_AD-7.4 Exam has reached as high as 100%. If you have any concerns, you can try our FCP_FMG_AD-7.4 pdf free demo and answers on probation first, and then make a decision whether to choose our FCP_FMG_AD-7.4 dumps or not.

Fortinet FCP - FortiManager 7.4 Administrator Sample Questions (Q25-Q30):

NEW QUESTION # 25
Refer to the exhibit.

```
config system admin setting
set mgmt-addr <FMG_NATed IP address>
```
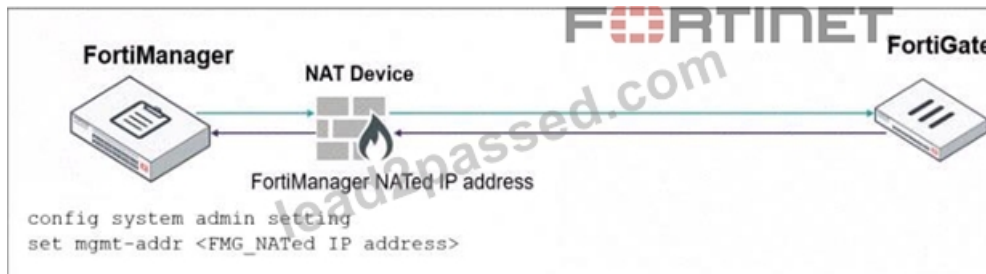

An administrator is about to add the FortiGate device to FortiManager using the discovery process.
FortiManager is operating behind a NAT device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.
What is the expected result?

- A. During discovery. FortiManager sets the NATed device IP address on FortiGate.
- B. During discovery, FortiManager sets both the FortiManager NATed IP address and NAT device IP address on FortiGate.
- C. During discovery. FortiManager uses only the FortiGate serial number to establish the connection.
- D. During discovery, FortiManager sets the FortiManager NATed IP address on FortiGate.

Answer: D

NEW QUESTION # 26
An administrator is in the process of copying a system template profile between ADOMs by running the following command: execute fmprofile import-profile ADOM2 3547 /tmp/myfile Where does this command import the system template profile from?

- A. ADOM2 object database
- B. FortiManager file system
- C. Source ADOM policy database
- D. ADOM2 device database

Answer: B

Explanation:
The command execute fmprofile import-profile ADOM2 3547 /tmp/myfile is used to import a system template profile from the FortiManager file system. The path /tmp/myfile indicates a location in the FortiManager's local file system, from which the profile will be imported into the specified ADOM.
Options B, C, and D are incorrect because:
* B, C, and D suggest importing from different databases, which is not accurate since the command explicitly refers to the file system location.

FortiManager References:
* Refer to FortiManager 7.4 CLI Reference Guide: Commands for Profile Management.

NEW QUESTION # 27
Exhibit.

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

Given the configuration shown in the exhibit, what are two results from this configuration? {Choose two.)

- A. Two or more administrators can make configuration changes at the same time, in the same ADOM.
- B. The same administrator can lock more than one ADOM at the same time.
- C. Concurrent read-write access to an ADOM is disabled.
- D. You can validate administrator login attempts through external servers.

Answer: B,C

Explanation:
The configuration shown in the exhibit sets theworkspace-mode to normal. The workspace mode in FortiManager defines how configuration changes and administrative tasks are handled, specifically regarding locking and collaboration in ADOMs (Administrative Domains).
Understanding the workspace modes:
* Normal Mode:In this mode, only one administrator at a time can lock and edit an ADOM. The changes made by one administrator must be completed and saved before another administrator can make changes. It prevents concurrent read-write access within the same ADOM.
* Workflow Mode:This mode allows multiple administrators to work on different tasks within the same ADOM, but changes still need to be approved before being committed.
Explanation of Options:
* A. You can validate administrator login attempts through external servers.
* This option is unrelated to the workspace mode. External authentication servers can be used for administrator logins, but that is a different configuration setting (not related to workspace-mode).
* B. The same administrator can lock more than one ADOM at the same time.
* This istrue. InNormal mode, an administrator can lock multiple ADOMs, meaning they can work on more than one ADOM simultaneously, but each ADOM can only be accessed by one administrator at a time for read-write purposes.
* C. Two or more administrators can make configuration changes at the same time, in the same ADOM.
* This isfalse. InNormal mode, onlyone administratorcan have read-write access to an ADOM at a time. If another administrator attempts to make changes, they must wait until the ADOM is unlocked by the first administrator.
* D. Concurrent read-write access to an ADOM is disabled.
* This istrue. InNormal mode, concurrent read-write access is disabled. This means only one administrator at a time can make changes to an ADOM. Other administrators can view the ADOM in read-only mode but cannot make changes until the ADOM is unlocked.

NEW QUESTION # 28
When using the FortiManager JSON API, what is the purpose of the session ID received after successful authentication?

- A. It contains information about the HTTP request method used.
- B. It is used to identify the FortiManager metadata on the client.
- C. It serves as an authentication token for subsequent API requests.
- D. It includes a hash to check the integrity of the JSON response sent by FortiManager.

Answer: C

Explanation:

The session ID is used to authenticate the client for further requests, ensuring that subsequent API calls are made by an authenticated user.

NEW QUESTION # 29

Push updates are failing on a FortiGate device that is located behind a NAT device. Which two settings should the administrator check? (Choose two.)

- **A. That the virtual IP address and correct ports are set on the NAT device**
- B. That the external IP address on the NAT device is set to DHCP and configured with the virtual IP
- **C. That the NAT device IP address and correct ports are configured on FortiManager**
- D. That the override server IP address is set on FortiManager and the NAT device

Answer: A,C

Explanation:
When push updates are failing on a FortiGate device behind a NAT device, the administrator should check:
* A.That the override server IP address is set on FortiManager and the NAT device.
* The override server IP should be configured to ensure that FortiManager uses the correct IP address that can traverse the NAT to reach the FortiGate device.
* D.That the virtual IP address and correct ports are set on the NAT device.
* The NAT device must have the correct virtual IP (VIP) configured to map the FortiGate's internal IP to an external address, along with the correct ports needed for communication.
Options B and C are incorrect because:
* Bsuggests setting the external IP on the NAT device to DHCP, which is not relevant to solving the push update issue.
* Cimplies configuring NAT device IP and ports on FortiManager, which is less likely needed compared to configuring the correct VIP and ports.
FortiManager References:
* Refer to FortiManager 7.4 Administrator Guide: Device Management and NAT Configuration.

NEW QUESTION # 30

......

We have free update for 365 days after purchasing the FCP_FMG_AD-7.4 exam materials, and the updated version will be sent to your email automatically. With this, you can change your scheme according to the requirement of the exam center. In addition, FCP_FMG_AD-7.4 exam materials are high-quality and accurate. We have the professional experts to verify the FCP_FMG_AD-7.4 Exam Dumps at times, therefore the correctness can be guaranteed. We also have the online and offline service, and if you have any questions, just consult us.
