

AIGP PDF Dumps Files | AIGP Test Collection

What's more, part of that Prep4sureExam AIGP dumps now are free: <https://drive.google.com/open?id=1bebTGtzpcxEFEv7O9CqDbjbNhXoVX2NY>

Prep4sureExam provides you not only with the best materials and also with excellent service. If you buy Prep4sureExam questions and answers, free update for one year is guaranteed. So, you can always have the latest test materials. You fail, after you use our IAPP AIGP Dumps, 100% guarantee to FULL REFUND. With it, what do you worry about? Prep4sureExam has a lot of confidence in our dumps and you also faith in our Prep4sureExam. In order to success, don't miss Prep4sureExam. If you miss Prep4sureExam, you will miss a chance to embrace the success.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 2	<ul style="list-style-type: none">• Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

Topic 3	<ul style="list-style-type: none"> • Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
Topic 4	<ul style="list-style-type: none"> • Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.

AIGP Test Collection & Exam AIGP Introduction

If you want to enjoy the real exam environment, the software version of our AIGP exam questions will help you solve your problem, because the software version of our AIGP test torrent can simulate the real exam environment. The AIGP study materials from our company can help you get your certification easily, and if you use our AIGP Study Materials, it will be very easy for you to save a lot of time, we believe our AIGP learning guide will be the most suitable choice for you,

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q97-Q102):

NEW QUESTION # 97

A UK company has designed a facial recognition model to support border control. The EU AI Act would apply to the model in all of the following situations EXCEPT if:

- A. The model was trained by an EU company.
- B. The model is deployed at an EU border checkpoint.
- **C. The model is deployed at UK border checkpoints.**
- D. The model was released under an open source license.

Answer: C

Explanation:

The EU AI Act applies to AI systems used within the EU or by entities established in the EU.

Deployment of the model solely at UK border checkpoints falls outside the Act's jurisdiction since the UK is no longer an EU member.

NEW QUESTION # 98

Under the EU AI Act, which of the following compliance actions applies only to General Purpose AI models with systemic risk?

- A. Maintaining up-to-date technical documentation, including testing details.
- B. Implementing an intellectual property policy to comply with EU copyright laws.
- C. Making information available to downstream providers who integrate the model into their AI systems.
- **D. Publishing a detailed summary of the data used to train the model.**

Answer: D

Explanation:

Under the EU AI Act, General-Purpose AI models with systemic risk are required to publish a detailed summary of the data used to train the model. This transparency measure ensures that users and regulatory bodies can assess the model's data sources and potential biases.

NEW QUESTION # 99

What is the primary purpose of an AI impact assessment?

- A. To identify and measure the benefits of an AI system.
- B. To determine whether a conformity assessment is needed.
- C. To escalate the findings to the appropriate owner(s).
- **D. To anticipate and manage the potential risks and harms of an AI system.**

Answer: D

Explanation:

The primary purpose of an AI impact assessment is to proactively anticipate, identify, and manage potential risks and harms associated with the deployment of an AI system.

NEW QUESTION # 100

CASE STUDY

Please use the following answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely arise in adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records a radiologist for secondary review pursuant Agreed-upon criteria (e.g., a confidence score below a threshold).

To date, the healthcare network has taken the following steps: defined its AI ethical principles; conducted discovery to identify the intended uses and success criteria for the system; established an AI governance committee; assembled a broad, crossfunctional team with clear roles and responsibilities; and created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution and a consulting firm to help develop the algorithm using the healthcare network's existing data and de-identified data that is licensed from a large US clinical research partner.

Which of the following steps can best mitigate the possibility of discrimination prior to training and testing the AI solution?

- A. Create a bias bounty program.
- B. Procure more data from clinical research partners.
- **C. Perform an impact assessment.**
- D. Engage a third party to perform an audit.

Answer: C

Explanation:

Performing an impact assessment is the best step to mitigate the possibility of discrimination before training and testing the AI solution. An impact assessment, such as a Data Protection Impact Assessment (DPIA) or Algorithmic Impact Assessment (AIA), helps identify potential biases and discriminatory outcomes that could arise from the AI system. This process involves evaluating the data and the algorithm for fairness, accountability, and transparency. It ensures that any biases in the data are detected and addressed, thus preventing discriminatory practices and promoting ethical AI deployment. Reference: AIGP Body of Knowledge on Ethical AI and Impact Assessments.

NEW QUESTION # 101

Which risk category addresses situations where AI systems behave in ways inconsistent with their intended objectives?

- A. Data leakage risk
- B. Availability risk
- C. Vendor lock-in risk
- **D. Misalignment risk**

Answer: D

NEW QUESTION # 102

.....

Getting tired of humdrum life, you may want to get some successful feeling or try something different instead. We all know that is of important to pass the AIGP exam and get the AIGP certification for someone who wants to find a good job in internet area, and it is not a simple thing to prepare for exam. So you are in the right place now. The thoughtfulness of our AIGP Study Materials services is insuperable. What we do surly contribute to the success of AIGP practice materials.
