Salesforce Certified Administrator Sample Questions (Q203-Q208):

NEW QUESTION # 203

When users log in to Salesforce via the user interface, which two settings does the system check for authentication?
Choose 2 answers

- A. The user's Two-Factor Authentication for API Logins permission
- B. The user's profile login hours restrictions
- C. The role IP address restrictions
- D. The user's Two-Factor Authentication for User Interface Logins permission

Answer: B,D

Explanation:

Explanation

When users log in to Salesforce via the user interface, the system checks for authentication based on their profile settings and permissions. One of the settings is login hours, which specify the time range when users can log in to Salesforce based on their profile. Another setting is Two-Factor Authentication for User Interface Logins permission, which requires users to enter a verification code along with their username and password when they log in to Salesforce via the user interface. NEW QUESTION # 204

Northern Trail Outfitters wants to encourage employees to choose secure and appropriate passwords for their Salesforce accounts. Which three password policies should an administrator configure?

Choose 3 answers

- **A. Password complexity requirements**
- B. Prohibited password values
- **C. Maximum invalid login attempts**
- **D. Number of days until expiration**
- E. Require use of Password Manager App

Answer: A,C,D

Explanation:

Explanation

Maximum invalid login attempts, password complexity requirements, and number of days until expiration are three password policies that an administrator can configure to encourage employees to choose secure and appropriate passwords for their Salesforce accounts. Maximum invalid login attempts determines how many times a user can enter an incorrect password before being locked out of Salesforce. Password complexity requirements determine how complex a user's password must be based on criteria such as length, case sensitivity, alphanumeric characters, etc. Number of days until expiration determines how often users must change their passwords.
