## Oracle Financials Cloud: General Ledger 2025 Implementation Professional Sample Questions (Q57-Q62):

### NEW QUESTION # 57

Your company has complex consolidation requirements with multiple General Ledger instances. You are using Oracle Hyperion Financial Management to consolidate the disparate General Ledgers. You can typically map segments between your General Ledger segment to a Hyperion Financial Management segment, such as Company to Entity, Department to Department, and Account to Account. What happens to segments in your source General Ledger, such as Program, that cannot be mapped to Hyperion Financial Management?

- A. Data is summarized across segments that are not mapped to Hyperion Financial Management.
- B. The unmapped segments default to future use segments in Hyperion Financial Management.
- C. No data is transferred.
- D. Errors occur for unmapped segments. You must map multiple segments from source General Ledgers to the target segment in Hyperion Financial Management.

### Answer: A

#### Explanation:

When integrating with Oracle Hyperion Financial Management, you can use the following dimensions for consolidation: Entity, Scenario, Year, Period, Value, Account, Intercompany, Custom1 to Custom4, and View. You can map one to one, or concatenate segments from your source General Ledger to a single Hyperion Financial Management dimension. For example, you can map Company to Entity, Department to Department, and Account to Account. However, if you have segments in your source General Ledger that cannot be mapped to any Hyperion Financial Management dimension, such as Program, then the data is summarized across those segments. This means that the data is aggregated to the highest level of the unmapped segments, and the detail information is lost. For example, if you have Program as a segment in your source General Ledger, and you do not map it to any Hyperion Financial Management dimension, then the data is summarized by Program, and you cannot see the data by individual Program values in Hyperion Financial Management.
