Free PDF Quiz 2026 SAP C-CPI-2506 Unparalleled Valid Test Notes

For candidates who are going to buy C-CPI-2506 exam materials online, they may pay more attention to the website safety. We have technicians to examine the website at times, therefore we will offer you clean and safe online shopping environment if you choose us. In addition, we have a professional team to collect the first-hand information for C-CPI-2506 Exam Braindumps, and if you choose us, we can ensure that you can obtain the latest information for the exam. You can enjoy the free update for one year for C-CPI-2506 training materials, and the update version will be sent to you automatically.

SAP Certified Associate - Integration Developer Sample Questions (Q48-Q53):

NEW QUESTION # 48

You have set up a basic authentication policy, but the API proxy returns an HTTP status of 401. What could be a reason?

- A. In the AssignMessage policy, the Assign To tag has the type="postFlow"
- B. In the AssignMessage policy, the Assign To tag has the type="response"
- C. In the AssignMessage policy, the Assign To tag has the type="request"
- D. In the AssignMessage policy, the Assign To tag has the type="preFlow"

Answer: C

Explanation:

In API Management (SAP Integration Suite), when implementing Basic Authentication policies:

If the AssignMessage policy does not correctly assign credentials to the request message, authentication will fail.

This results in HTTP 401 Unauthorized.

Other tags like preFlow, postFlow, response are policy flow phases, but the credentials must be applied to the request for proper authentication.

Thus, the root cause is when the Assign To = request is missing/misconfigured.

NEW QUESTION # 49

Which expression language can you use to access the content of a message in an integration flow?

- A. Spring expression language
- **B. Simple expression language**
- C. JavaScript expression language
- D. XML expression language

Answer: B

Explanation:

To access the content of a message in an integration flow, you can use the Simple expression language. The Simple expression language is a subset of the expressions defined in Camel Simple Expression Language, which is a language for accessing and manipulating message contents and exchange properties in Apache Camel integration framework. The Simple expression language supports various built-in variables, functions, operators, and literals that can be used to construct expressions for different purposes, such as routing conditions, content modification, variable assignment, and so on. You can use the Simple expression language when configuring components that support expressions, such as content modifier, router, filter, write variables, and so on. Reference: Using Camel Simple Expression Language | SAP Help Portal, Get to know Camel's Simple expression language in SAP Cloud Integration | SAP Blogs

NEW QUESTION # 50

Which of the following are markup languages that you can use to describe APIs? Note: There are 2 correct answers to this question.

- A. HTML
- **B. RAML**
- C. CXML
- **D. OpenAPI**

Answer: B,D

Explanation:

RAML and OpenAPI are markup languages that you can use to describe APIs. RAML stands for RESTful API Modeling Language and is based on YAML. OpenAPI is a specification for describing RESTful APIs and is based on JSON or YAML. Both languages allow you to define the structure, parameters, responses, and documentation of your APIs. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 51

Where can you configure a static payload? Note: There are 2 correct answers to this question.

- A. In a Content Modifier component of the Message Header tab
- **B. In a Data Store Operation component**
- **C. In a Content Modifier component of the Message Body tab**
- D. In a Groovy script

Answer: B,C

Explanation:

You can configure a static payload in a Data Store Operation component or in a Content Modifier component of the Message Body tab. A Data Store Operation component allows you to store or retrieve messages in a data store. You can use the Write operation to store a static payload in a data store entry with a specified key. A Content Modifier component allows you to modify the message content, headers, and properties. You can use the Message Body tab to define a static payload for the message. Reference: Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 52

Which architectural pattern in an event-driven architecture allows direct communication between two parties without an intermediary?

- A. Event Sourcing
- **B. Point-to-Point**
- C. Message Queue
- D. Publish-Subscribe

Answer: B

Explanation:

References

In an event-driven architecture (EDA), several messaging patterns exist:

Point-to-Point # Enables direct communication between exactly two parties (sender and receiver) without intermediaries.

Publish-Subscribe # Multiple consumers subscribe to events; requires a broker/intermediary (like Event Mesh).

Message Queue # Relies on a queue as an intermediary between producer and consumer.

Event Sourcing # Refers to storing state changes as events, not a communication pattern.

Therefore, the only pattern allowing direct communication without an intermediary is Point-to-Point.

NEW QUESTION # 53

.....

We all have same experiences that some excellent people around us further their study and never stop their pace even though they have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the C-CPI-2506 exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our C-CPI-2506 practice materials. Among voluminous practice materials in this market, we highly recommend our C-CPI-2506 Study Tool for your reference. Their vantages are incomparable and can spare you from strained condition. On the contrary, they serve like stimulants and catalysts which can speed up you efficiency and improve your correction rate of the C-CPI-2506 real questions during your review progress.
