

Reliable EX380 Test Book - EX380 Vce Download

Itexamguide's products can not only help you successfully pass RedHat certification EX380 Exams, but also provide you a year of free online update service, which will deliver the latest product to customers at the first time to let them have a full preparation for the exam. If you fail the exam, we will give you a full refund.

If you are not certain whether the EX380 prep guide from our company is suitable for you or not, so you are hesitate to buy and use our study materials. Do not worry, in order to help you solve your problem and let you have a good understanding of our EX380 study practice dump, the experts and professors from our company have designed the trial version for all people. You can have a try of using the EX380 Prep Guide from our company before you purchase it. We believe that the trial version provided by our company will help you know about our study materials well and make the good choice for yourself. More importantly, the trial version of the EX380 exam questions from our company is free for all people. We believe that the trial version will help you a lot.

All Three Itexamguide RedHat EX380 Exam Dumps Format is Ready for Download

Certification has become a prerequisite for employment and career growth in the RedHat industry for reputable companies. To advance comfortably in your career, passing the EX380 exam is a valuable validation of your expertise. However, many test takers struggle to find updated Red Hat Certified Specialist in OpenShift Automation and Integration (EX380) dumps and fail to prepare effectively in a short period, resulting in a loss of time, money, and motivation.

RedHat Red Hat Certified Specialist in OpenShift Automation and

Integration Sample Questions (Q28-Q33):

NEW QUESTION # 28

Create an Argo CD Application (OpenShift GitOps)

Task Information : Create an Argo CD Application that syncs from Git into namespace gitops-demo with automated sync enabled.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Create target namespace
- * `oc new-project gitops-demo`
- * Destination must exist (unless Argo is configured to auto-create).
- * Create Application manifest
- * `apiVersion: argoproj.io/v1alpha1`
- * `kind: Application`
- * `metadata:`
- * `name: demo-app`
- * `namespace: openshift-gitops`
- * `spec:`
- * `project: default`
- * `source:`
- * `repoURL: https://git.example.com/org/repo.git`
- * `targetRevision: main`
- * `path: manifests/demo`
- * `destination:`
- * `server: https://kubernetes.default.svc`
- * `namespace: gitops-demo`
- * `syncPolicy:`
- * `automated:`
- * `prune: true`
- * `selfHeal: true`
- * `automated: enables auto sync.`
- * `prune: removes deleted objects from Git.`
- * `selfHeal: corrects drift.`
- * Apply Application
- * `oc apply -f demo-app.yaml`
- * Verify sync health
- * `oc -n openshift-gitops get application demo-app -o yaml | grep -i -E "sync|health" -n`
- * `oc -n gitops-demo get all`

NEW QUESTION # 29

Silence an alert in Alertmanager

Task Information : Create an Alertmanager silence for a noisy alert for 2 hours, then confirm it's silenced.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Find the alert name and labels
- * Web console: Observe # Alerts # click the alert to view label set.
- * Open Alertmanager silences
- * Observe # Alerting # Alertmanager # Silences # Create silence
- * Explanation: Silences mute alerts matching label filters.
- * Create the silence
- * Add matcher: `alertname = < ALERT_NAME >`
- * Duration: 2 hours
- * Save.

- * Verify the alert shows as silenced
- * The alert should indicate it is silenced in the UI.

NEW QUESTION # 30

Backup and Restore - Fix SCC for Restored Application

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

Step 1: Identify the application namespace after restore.

The lab shows the namespace as my-app-namespace.

Step 2: Run the SCC assignment command:

```
oc adm policy add-scc-to-user anyuid -z default -n my-app-namespace
```

Step 3: Confirm the role binding is applied.

The lab output shows:

```
clusterrole.rbac.authorization.k8s.io/systemopenshift:scc:anyuid added: "default" Detailed explanation:
```

After a restore, the application may fail if its pods require a security context not permitted by the default SCC allocation. This command grants the anyuid SCC to the default service account in the my-app-namespace project. The -z default syntax targets the default service account, which many restored workloads use if no custom service account is defined. The anyuid SCC allows containers to run with arbitrary user IDs, which some legacy or prebuilt images require. In OpenShift, SCC mismatches commonly cause pods to remain in pending or crash-related states. Assigning the proper SCC resolves those admission issues so workloads can start successfully. This step is therefore a post-restore operational fix to align security policy with application requirements.

NEW QUESTION # 31

Create and apply a MachineConfig (set MOTD on workers)

Task Information : Create a MachineConfig that writes /etc/motd on worker nodes.

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

- * Create the MachineConfig YAML (example content encoded in base64)

- * apiVersion: machineconfiguration.openshift.io/v1

- * kind: MachineConfig

- * metadata:

- * name: 99-worker-motd

- * labels:

- * machineconfiguration.openshift.io/role: worker

- * spec:

- * config:

- * ignition:

- * version: 3.2.0

- * storage:

- * files:

- * - path: /etc/motd

- * mode: 0644

- * contents:

- * source: data:text/plain;charset=utf-8;base64,VGhpcyBpcyBhIHdvcmtlcjBub2RILg==

- * MachineConfig uses Ignition format; file content is typically base64.

- * Apply it

- * oc apply -f 99-worker-motd.yaml

- * Watch worker MachineConfigPool roll out

- * oc get mcp worker

- * MCP will show Updating then Updated.

- * Validate on a worker node (if you have node access)

* Confirm/etc/motd contains the expected text.

NEW QUESTION # 32

Identity Management - Create CA ConfigMap

Answer:

Explanation:

See the solution below in Explanation:

Explanation:

Step 1: Ensure the certificate file rhds_ca.crt is available in your current working directory or use the correct path.

The Task requires creating a configmap from this CA certificate file.

Step 2: Run the command:

```
oc create configmap rhds-ca-config-map --from-file ca.crt=rhds_ca.crt -n openshift-config
```

Step 3: Confirm the configmap is created.

The lab output shows:

```
configmap/rhds-ca-config-map created
```

Detailed explanation:

This creates a configmap named rhds-ca-config-map in the openshift-config namespace and maps the local file rhds_ca.crt to the key name ca.crt inside the configmap. This is important in external identity integration because OpenShift may need to trust a custom certificate authority when communicating with LDAP or another secured external service. By placing the certificate in a configmap, the authentication operator or related cluster configuration can reference it cleanly. The key name matters because many OpenShift resources expect a CA bundle key with a specific filename-like convention. If the file path is wrong, the command fails immediately. If the configmap name or key mapping is wrong, the authentication provider referencing it may not trust the external endpoint.

NEW QUESTION # 33

.....

To get better condition of life, we all need impeccable credentials of different exams to prove individual's capacity. However, weak EX380 practice materials may descend and impair your ability and flunk you in the real exam unfortunately. And the worst condition is all that work you have paid may go down the drain for those EX380 question torrent lack commitments and resolves to help customers. The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our EX380 question torrent.

EX380 Vce Download: https://www.itexamguide.com/EX380_braindumps.html

Real and Updated EX380 Question & Answer, If you buy our EX380 test prep you will pass the EX380 exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income, For many other situations, EX380 Vce Download Machine Learning Studio is exactly what you need, It also tests your skills in the implementation and managing of RedHat EX380 Vce Download Cyber security Operations.

If you go to Harvard, or Stanford, or Wharton, is that better for you EX380 Vce Download than going to a school whose reputation is not quite as strong, I discussed Copy Name more fully in the Metadata panel section earlier.

Red Hat Certified Specialist in OpenShift Automation and Integration training torrent & EX380 latest dumps & Red Hat Certified Specialist in OpenShift Automation and Integration study material

Real and Updated EX380 Question & Answer, If you buy our EX380 test prep you will pass the EX380 Exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income.

For many other situations, Red Hat OpenShift Machine Learning Studio is EX380 exactly what you need, It also tests your skills in the implementation and managing of RedHat Cyber security Operations.

Leave to search all product on the net because they sell EX380 braindumps on high price and their result always in a negative mood, but we assure you and giving a guarantee for our pdf question for EX380 exam that you can get your success 100% in your final exam without any hesitation because our EX380 exam pdf queries are related to the final exam as well as you can save your time for extra activities.
