## Test GH-200 Simulator Online | Real GH-200 Torrent

In addition, you can print these Microsoft GH-200 PDF questions for paper study in this format of ExamDiscuss product frees you from restrictions of time and place as you can study GH-200 exam questions from your comfort zone in your spare time. The second version is the web-based format of the Microsoft GH-200 Practice Test. Browsers such as Internet Explorer, Microsoft Edge, Firefox, Safari, and Chrome support the web-based practice exam.

## Microsoft GitHub Actions Sample Questions (Q52-Q57):

**NEW QUESTION # 52**
You installed specific software on a Linux self-hosted runner. You have users with workflows that need to be able to select the runner based on the identified custom software. Which steps should you perform to prepare the runner and your users to run these workflows? (Choose two.)

- A. Inform users to identify the runner based on the group.
- B. Add the label linux to the runner.
- C. Configure the webhook and network to enable GitHub to trigger workflow.
- D. Add the label custom-software to the runner.
- E. Create the group custom-software-on-linux and move the runner into the group.

**Answer: A,D**

Explanation:
Once the runner is properly configured and labeled, users should be informed to select the specific runner by identifying the label or group name when defining the runner in their workflows.
Adding a custom label (like custom-software) to the runner makes it easier for users to select the runner in their workflows by using

the runs-on key, which allows them to choose this specific runner based on its label.

**NEW QUESTION # 53**

In which scenarios could the GITHUB_TOKEN be used? (Each correct answer presents a complete solution. Choose two.)

- A. to leverage a self-hosted runner
- B. to create a repository secret
- C. to add a member to an organization
- D. to publish to GitHub Packages
- E. to create issues in the repo
- F. to read from the file system on the runner

**Answer: D,E**

Explanation:
[D] To authenticate to a GitHub Packages registry within a GitHub Actions workflow, you can use:
*-> GITHUB_TOKEN to publish packages associated with the workflow repository.
* A personal access token (classic) with at least read:packages scope to install packages associated with other private repositories (GITHUB_TOKEN can be used if the repository is granted read access to the package.
[E] You can use the GITHUB_TOKEN to make authenticated API calls. This example workflow creates an issue using the GitHub REST API:

https://docs.github.com/en/actions/tutorials/authenticate-with-github_token

**NEW QUESTION # 54**

Which workflow event is used to manually trigger a workflow run?

- A. status
- B. workflow_dispatch
- C. workflow_run
- D. create

**Answer: B**

Explanation:
The workflow_dispatch event is used to manually trigger a workflow run in GitHub Actions. You can specify this event in the workflow file to allow users to manually trigger the workflow from the GitHub UI, often with optional input parameters.

**NEW QUESTION # 55**

As a developer, you have configured an IP allow list on a GitHub organization. Which effects does the IP allow list have on GitHub Actions? (Each answer presents a complete solution.
Choose two.)

- A. You can use self-hosted runners with known IP addresses.
- B. You can use standard GitHub-hosted runners since their IP addresses are automatically allowed.
- C. You can use GitHub-hosted larger runners since they can be configured with static IP addresses.
- D. You must allow GitHub Actions's IP address ranges in order to use marketplace actions.

**Answer: A,C**

Explanation:
Using GitHub Actions with an IP allow list. If you use an IP allow list and would also like to use GitHub Actions, you must use self-hosted runners or GitHub-hosted larger runners with static IP address ranges To allow your self-hosted or larger hosted runners to communicate with GitHub, add the IP address or IP address range of your runners to the IP allow list that you have configured for your enterprise.

https://docs.github.com/en/enterprise-cloud@latest/organizations/keeping-your-organization- secure/managing-security-settings-for-

your-organization/managing-allowed-ip-addresses-for- your-organization

**NEW QUESTION # 56**
You have exactly one Windows x64 self-hosted runner, and it is configured with custom tools. Which syntax could you use in the workflow to target that runner?

- A. runs-on: windows-latest
- B. runs-on: [self-hosted, windows, x64]
- C. self-hosted: [windows-x64]
- D. self-hosted: [windows, x64]

**Answer: B**

Explanation:
The runs-on keyword allows you to specify the operating system and other labels for the runner. By specifying self-hosted, windows, and x64, you are targeting a self-hosted Windows runner that matches these criteria, which aligns with the custom configuration of your self-hosted runner.

**NEW QUESTION # 57**
......

Now, the test syllabus of the GH-200 exam is changing every year. More and more people choose to prepare the exam to improve their ability. So the GH-200 exam becomes more difficult than before.
