The clients can consult our online customer service before and after they buy our Plat-Admn-202 useful test guide. We provide considerate customer service to the clients. Before the clients buy our Plat-Admn-202 cram training materials they can consult our online customer service personnel about the products' version and price and then decide whether to buy them or not. After the clients buy the Plat-Admn-202 Study Tool they can consult our online customer service about how to use them and the problems which occur during the process of using. We will help you pass the Plat-Admn-202 exam in the shortest time.

## Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Salesforce Fundamentals:</b> This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>App Deployment:</b> This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>User Interface:</b> This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Business Logic and Process Automation:</b> This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.</li> </ul>

## Perfect Plat-Admn-202 Exam Tutorial & Leading Offer in Qualification Exams & Fantastic Salesforce Salesforce Certified Platform App Builder

Perhaps you still feel confused about our Salesforce Certified Platform App Builder test questions when you browse our webpage. There must be many details about our products you would like to know. Do not hesitate and send us an email. Gradually, the report will be better as you spend more time on our Plat-Admn-202 exam questions. As you can see, our system is so powerful and intelligent. What most important it that all knowledge has been simplified by our experts to meet all people's demands. So the understanding of the Plat-Admn-202 Test Guide is very easy for you. Our products know you better.

### Salesforce Certified Platform App Builder Sample Questions (Q170-Q175):

#### NEW QUESTION # 170

Cloud Kicks (CK) wants to simultaneously delete a Supplier's record and all Supplier Item\_\_c records if a partnership ends with a supplier.

What solution could an app builder use to meet the requirement?

- A. Many-to-many
- B. Hierarchical
- C. Master-detail
- D. Indirect lookup

**Answer: C**

Explanation:

The solution that an app builder should use to meet this requirement is master-detail relationship. A master-detail relationship is a type of relationship that creates a parent-child relationship between two objects, where the child records inherit the sharing and security settings of their parent record. The app builder can create a master-detail relationship between Supplier\_\_c and SupplierItem\_\_c objects, where Supplier\_\_c is the parent object and SupplierItem\_\_c is the child object. This way, when a Supplier\_\_c record is deleted, all related SupplierItem\_\_c records are also deleted automatically. Option A is incorrect because many-to-many relationship is not suitable for this requirement, as many-to-many relationship allows two objects to be linked in both directions through a junction object, but does not support cascading delete. Option B is incorrect because indirect lookup relationship is not suitable for this requirement, as indirect lookup relationship allows an external object to link with another object using an external ID field, but does not support cascading delete. Option C is incorrect because hierarchical relationship is not suitable for this requirement, as hierarchical relationship allows users to use a lookup field that links an object with itself, but does not support cascading delete.

#### NEW QUESTION # 171

DreamHouseRealty (DR) is expanding into subsidized housing by partnering with local government entities. DR uses Sales Cloud and has enabled field history tracking on the Opportunity object. Due to increased Information requirements, the App Dev team is changing Text Area (Long) fields to Rich Text fields to allow for up to 1,000 characters and better descriptions.

Which two considerations should be made by the team?

Choose 2 answers

- A. Audit Trail is available through REST API extracts.
- B. Rich text field values of all lengths are displayed fully in reports.
- C. Field History Tracking records value changes of 255 characters or less.
- D. Data loss may occur when changing custom field types.

**Answer: C,D**

Explanation:

Changing custom field types may result in data loss if the new field type is incompatible with the old one. For example, changing a text field to a number field may cause text values to be deleted. Field history tracking records value changes of 255 characters or less. If a rich text field value exceeds this limit, only the first 255 characters are tracked.

#### NEW QUESTION # 172

Universal Containers has deployed custom tabs to Production via change sets, without including the profile settings or permission sets.

What is the settings for the visibility of custom tabs?

- A. Custom tabs are default off for all users.
- B. Custom tabs are default on for all uses.
- C. Custom tabs are NOT deployed.
- D. Custom tabs are hidden for all users.

**Answer: A**

Explanation:

The setting for the visibility of custom tabs is default off for all users when they are deployed via change sets without including the profile settings or permission sets. This means that the custom tabs are not visible in any apps or navigation menus for any users unless they are manually added by each user or by an administrator. Option B, C, and D are not correct settings for the visibility of custom tabs.

#### NEW QUESTION # 173

Cloud Kicks received a new requirement to calculate summaries from child objects of a standard object. The team would prefer to solve this declaratively.

What are two considerations an app builder should evaluate?

Choose 2 answers

- A. An object can have up to two master-detail relationships.
- B. A value is required in all records of the lookup field prior to converting to a master-detail relationship.
