There may be a lot of people feel that the preparation process for exams is hard and boring, and hard work does not necessarily mean good results, which is an important reason why many people are afraid of examinations. Today, our 3V0-23.25 study materials will radically change this. High question hit rate makes you no longer aimless when preparing for the exam, so you just should review according to the content of our 3V0-23.25 Study Materials prepared for you.

Are you racking your brains for a method how to pass VMware 3V0-23.25 exam? VMware 3V0-23.25 certification test is one of the valuable certification in modern IT certification. Within the last few decades, IT got a lot of publicity and it has been a necessary and desirable part of modern life. VMware certification has been well recognized by international community. So, most IT people want to improve their knowledge and their skills by VMware certification exam. 3V0-23.25 test is one of the most important exams and the certificate will bring you benefits.

>> 3V0-23.25 Reliable Exam Vce <<

VMware 3V0-23.25 Test Lab Questions | Free 3V0-23.25 Dumps

our 3V0-23.25 actual exam has won thousands of people's support. All of them have passed the exam and got the certificate. They live a better life now. Our 3V0-23.25 study guide can release your stress of preparation for the test. Our 3V0-23.25 Exam Engine is professional, which can help you pass the exam for the first time. If you can't wait getting the certificate, you are supposed to choose our 3V0-23.25 study guide.

VMware Advanced VMware Cloud Foundation 9.0 Storage Sample Questions (Q75-Q80):

NEW QUESTION # 75

An L3 Support Engineer is analyzing the state of a VM scheduled for imminent SRM migration. The VM uses both Local Protection (vSAN FTT=1) and Remote Protection (vSphere Replication). The engineer runs an esxcli query on the local host to check the object health.

...

```
[root@esx-03:~] esxcli vsan debug object list -u 554350...
Object UUID: 554350... (SRM-Web-01)
Policy: FTT=1 (RAID-1)
Component 1: ACTIVE (esx-03)
Component 2: ABSENT (esx-05 - Host Unreachable)
Witness: ACTIVE (esx-06)
vSphere Replication State: OK (RPO 15m)
...
```

Based on the intersection of the local vSAN state and the remote vSphere Replication mechanics, which TWO operational behaviors are accurate for this degraded object? (Choose 2.)

- A. SRM can still successfully failover this VM to the remote site, because the asynchronous vSphere Replication engine continues copying data from the ACTIVE Component 1.
- B. vSphere Replication is automatically suspended because the replication agent cannot read from degraded FTT=1 components.
- C. The VM remains fully operational on the primary site because the local vSAN object maintains quorum (2 of 3 votes are ACTIVE).
- D. The SRM failover is blocked because the local "ABSENT" flag prevents the vCenter database from un-registering the VM.
- E. The ESXi host must wait for the ABSENT component to finish rebuilding (60-minute CLOM timer) before standard I/O resumes.

Answer: A,C

NEW QUESTION # 76

A storage administrator is being presented with the following VMware Cloud Foundation (VCF) architectural details:

- * The applications data will require 2.5 PB of capacity.
- * The production applications will be hosting archival solutions and gateways.
- * There will be some applications deployed for the purpose of testing and development.

What is the optimal principal storage that the administrator can recommend?

- A. vSAN ESA
- B. vSAN ESA Storage Clusters
- C. vSAN OSA - Hybrid
- D. vSAN OSA - All Flash

Answer: B

Explanation:

vSAN ESA Storage Clusters are the optimal choice because the workload profile is capacity-heavy and benefits from disaggregated storage. The requirement for 2.5 PB of application data, archival workloads, gateways, and development/test applications indicates a need to scale storage capacity independently from compute resources. VMware Cloud Foundation describes a vSAN storage cluster as a disaggregated storage solution based on vSAN ESA. It provides storage resources but not compute resources, and its datastore can be mounted by vSAN compute clusters or vSAN HCI clusters. This model is designed for storage-dense environments where capacity and performance can be expanded without adding unnecessary compute. A standard vSAN ESA HCI cluster is excellent for high-performance workloads, but it scales compute and storage together. vSAN OSA all-flash and hybrid use the older disk-group architecture and are less suitable for this large-capacity, storage-centric design. Therefore, the principal

storage recommendation should be vSAN ESA Storage Clusters to meet scalability, performance, and capacity growth requirements. Reference topics: vSAN Storage Cluster, Disaggregated Storage, vSAN ESA, Storage Models.

NEW QUESTION # 77

A Compliance Auditor is reviewing an air-gapped VCF Workload Domain used for classified operations. The Customer Experience Improvement Program (CEIP) and vCenter internet access are permanently disabled.

The vSAN Health Check constantly reports "vSAN HCL DB is outdated".

...

[vSAN Cluster Configuration]

vSAN Edition: Enterprise Plus (vSAN 8.0 U2)

CEIP: Disabled

Internet Access: None (Air-gapped)

...

How must the administrator resolve this compliance alert in this specific restricted environment?

- A. The administrator must download the all.json HCL file from the VMware public portal onto an internet-connected workstation, transfer it to the internal network, and manually upload it via the "Update from file" option in the vCenter vSAN Health UI.
- B. The administrator must disable the "Controller Firmware" health checks in Skyline Health, as HCL updates are strictly unsupported in non-CEIP environments.
- C. SDDC Manager automatically bypasses the air-gap by establishing a secure dark-fiber connection to the VMware cloud to stream the HCL database directly into ESXi memory.
- D. The update occurs automatically whenever the administrator applies a new vSphere Lifecycle Manager (vLCM) cluster image, as the latest HCL JSON is hard-coded into the ESXi installation ISO.

Answer: A

NEW QUESTION # 78

A SOC Analyst is investigating a failure in a Tanzu environment where newly deployed stateful Pods are remaining in a Pending state. The pods are failing to bind to their Persistent Volume Claims (PVCs).

The analyst reviews the vmkernel.log on the ESXi host running the Kubernetes Supervisor Control Plane:

...

2026-11-25T14:10:05Z INFO vsphere-csi - Received CreateVolume request: size=50GB, policy="High- Perf-vSAN"

2026-11-25T14:10:06Z WARN vsan-dom - Storage Policy "High-Perf-vSAN" violates cluster capabilities.

FTT=2 requires 6 fault domains. Available: 4.

2026-11-25T14:10:06Z ERROR vsphere-csi - CNS CreateVolume failed. Reason: Datastore lacks sufficient capacity or domains to satisfy SPBM profile.

2026-11-25T14:10:06Z ERROR k8s-controller - PVC 'mysql-data-pvc' failed to provision. Retrying...

...

Based on the log analysis, which TWO statements describe the root cause and the required remediation? (Choose 2.)

- A. The analyst must expand the physical vSAN cluster to a minimum of 6 hosts, or modify the SPBM policy to FTT=1, to allow CNS to provision the volume.
- B. The Kubernetes ClusterRoleBinding lacks the necessary IAM permissions to execute vCenter API calls.
- C. The requested StorageClass references an SPBM policy (FTT=2/RAID-6) that is mathematically impossible to fulfill on the current 4-node vSAN cluster.
- D. The ESXi host's vsphere-csi daemon has crashed and must be restarted via the vCenter VAMI interface.
- E. The PVC request of 50GB exceeds the hardcoded limit for First Class Disks (FCD) in vSAN ESA.

Answer: A,C

NEW QUESTION # 79

An Infrastructure Manager is investigating application lockups on a VCF 9.0 cluster hosting legacy databases on external iSCSI datastores.

The vSAN Performance View for the ESXi host shows severe backend CPU contention, and the physical ToR switches report link flapping on specific ports.

...

[vSAN / ESXi Performance View]

Metric: CPU Ready Time (High)

Metric: Storage Path Status (Flipping: Active -> Dead -> Active)

...

Which TWO statements accurately describe the symptoms and impact of "Path Thrashing" in this specific scenario? (Choose 2.)

- A. The constant UP/DOWN path flapping tricks the vSAN DOM into splitting the data packets into Micro-Stripe components, generating metadata bloat.
- B. Path Thrashing forces the ESXi host to enter Maintenance Mode automatically to isolate the failing hardware.
- C. Path Thrashing occurs when a marginal network cable or switch port continuously cycles UP/DOWN; the ESXi Native Multipathing Plugin (NMP) consumes massive CPU cycles constantly recalculating path statuses and re-initiating iSCSI sessions.
- D. Path Thrashing is a beneficial vSAN feature that rapidly rotates I/O paths to evenly distribute the temperature of the NVMe drives.
- E. The constant path flipping forces standard I/O into the VMkernel retry queues. This I/O stacking causes the SCSI queue depth to fill, leading to the application lockups observed by the users.

Answer: C,E

NEW QUESTION # 80

.....

Although the passing rate of our 3V0-23.25 simulating exam is nearly 100%, we can refund money in full if you are still worried that you may not pass. You don't need to worry about the complexity of the refund process at all, we've made it quite simple. As long as you provide us with proof that you failed the exam after using our 3V0-23.25, we can refund immediately. If you encounter any problems during the refund process, you can also contact our customer service staff at any time. They will help you solve the problem as quickly as possible. That is to say, our 3V0-23.25 Exam Questions almost guarantee that you pass the exam. Even if you don't pass, you don't have to pay any price for our 3V0-23.25 simulating exam. I hope we have enough sincerity to impress you.

3V0-23.25 Test Lab Questions: <https://www.exam4docs.com/3V0-23.25-study-questions.html>

The 3V0-23.25 exam real questions are the ideal and recommended study material for quick and complete VMware 3V0-23.25 exam preparation, VMware 3V0-23.25 Reliable Exam Vce The number of our free coupon is limited, Now you can think of obtaining any VMware 3V0-23.25 Test Lab Questions certification to enhance your professional career, VMware 3V0-23.25 Reliable Exam Vce The exam dumps are very easy to use.

Microsoft Expression Web lets you create modern, standards-based 3V0-23.25 High Passing Score web sites, Though my focus is on information technology (IT) this is equally true for people in all walks of life and work.

The 3V0-23.25 Exam real questions are the ideal and recommended study material for quick and complete VMware 3V0-23.25 exam preparation, The number of our free coupon is limited.

Advanced VMware Cloud Foundation 9.0 Storage Exam Dumps Get Success With Minimal Effort

Now you can think of obtaining any VMware certification to enhance your professional 3V0-23.25 career, The exam dumps are very easy to use, It can save your money for updating, and the update version will send to your mailbox automatically.
