Latest CIPT Test Sample - CIPT New Test Camp

CIPT preparation materials will be the good helper for your qualification certification. We are concentrating on providing high-quality authorized CIPT study guide all over the world so that you can clear exam one time. CIPT reliable exam bootcamp materials contain three formats: PDF version, Soft test engine and APP test engine so that our products are enough to satisfy different candidates' habits and cover nearly full questions & answers of the real CIPT test.

IAPP CIPT (Certified Information Privacy Technologist) Exam is a certification program designed for professionals who are seeking to demonstrate their knowledge and expertise in the field of information privacy technology. Certified Information Privacy

Technologist (CIPT) certification is offered by the International Association of Privacy Professionals (IAPP), which is a non-profit organization that is dedicated to promoting privacy practices across the globe. With the increasing importance of privacy in today's digital age, the CIPT Certification is becoming increasingly relevant for professionals who work with personal data.

IAPP Certified Information Privacy Technologist (CIPT) Sample Questions (Q243-Q248):

NEW QUESTION # 243

SCENARIO

Tom looked forward to starting his new position with a U.S.-based automobile leasing company (New Company), now operating in 32 states. New Company was recently formed through the merger of two prominent players, one from the eastern region (East Company) and one from the western region (West Company). Tom, a Certified Information Privacy Technologist (CIPT), is New Company's first Information Privacy and Security Officer. He met today with Dick from East Company, and Harry, from West Company. Dick and Harry are veteran senior information privacy and security professionals at their respective companies, and continue to lead the east and west divisions of New Company. The purpose of the meeting was to conduct a SWOT (strengths/weaknesses/opportunities/threats) analysis for New Company. Their SWOT analysis conclusions are summarized below. Dick was enthusiastic about an opportunity for the New Company to reduce costs and increase computing power and flexibility through cloud services. East Company had been contemplating moving to the cloud, but West Company already had a vendor that was providing it with software-as-a-service (SaaS). Dick was looking forward to extending this service to the eastern region. Harry noted that this was a threat as well, because West Company had to rely on the third party to protect its data.

Tom mentioned that neither of the legacy companies had sufficient data storage space to meet the projected growth of New Company, which he saw as a weakness. Tom stated that one of the team's first projects would be to construct a consolidated New Company data warehouse. Tom would personally lead this project and would be held accountable if information was modified during transmission to or during storage in the new data warehouse.

Tom, Dick and Harry agreed that employee network access could be considered both a strength and a weakness. East Company and West Company had strong performance records in this regard; both had robust network access controls that were working as designed. However, during a projected year-long transition period, New Company employees would need to be able to connect to a New Company network while retaining access to the East Company and West Company networks.

Which statement is correct about addressing New Company stakeholders' expectations for privacy?

- A. New Company would best meet consumer expectations for privacy by adhering to legal requirements.
- B. New Company should manage stakeholder expectations for privacy even when the stakeholders' data is not held by New Company.
- C. New Company's commitment to stakeholders ends when the stakeholders' data leaves New Company.
- D. New Company should expect consumers to read the company's privacy policy.

Answer: A

Explanation:

Adhering to legal requirements for data protection and privacy is an important way for New Company to meet its stakeholders' expectations for privacy. This includes complying with applicable data protection laws and regulations and implementing appropriate measures to protect personal data.

NEW QUESTION # 244

A laundry company is collecting, with user consent, the geolocation of its customers to analyze movement patterns and determine potential locations for joint services with marketing partners. What type of concern is raised by this practice?

- A. Technical.
- B. Legal.
- C. Behavioral.
- D. Ethical.

Answer: D

Explanation:

Even with user consent, analyzing geolocation patterns for marketing partnerships raises ethical concerns, especially around:

- * User expectations
- * Proportionality
- * Fairness
- * Secondary use creep

- * Power imbalance
 - * Potential inferences about behavior, lifestyle, or socioeconomic factors CIPT emphasizes ethical review when:
 - * Consent exists but data use may exceed what users reasonably expect
 - * Sensitive behavioral profiles are created
 - * Data is used to influence user choices indirectly
- This scenario aligns strongly with CIPT's "Ethical Use of Personal Data" section and behavioral analytics concerns. Why the others are incorrect:
- * A - Legal: Consent was obtained, so no direct legal violation is described.
 - * C - Technical: There is no technical flaw.
 - * D - Behavioral: The company analyzes behavior, but the concern raised is ethical.
- # Correct answer: B

NEW QUESTION # 245

Which activity would best support the principle of data quality?

- A. Delivering information in a format that the data subject understands.
- B. Providing notice to the data subject regarding any change in the purpose for collecting such data.
- C. Ensuring that the number of teams processing personal information is limited.
- D. Ensuring that information remains accurate.

Answer: D

Explanation:

Reference:

The principle of data quality states that personal data should be relevant to the purposes for which they are to be used and, to the extent necessary for those purposes, should be accurate, complete, and up to date¹. Therefore, ensuring that information remains accurate is an activity that would best support this principle¹. The other options are not directly related to the principle of data quality, but rather to other principles such as purpose specification, security safeguards, or openness.

NEW QUESTION # 246

What has been identified as a significant privacy concern with chatbots?

- A. Users conversations with chatbots are not encrypted in transit.
- B. Chatbot technology providers may be able to read chatbot conversations with users.
- C. Chatbots can easily verify the identity of the contact.
- D. Most chatbot providers do not agree to code audits.

Answer: B

NEW QUESTION # 247

An organization is evaluating a number of Machine Learning (ML) solutions to help automate a customer-facing part of its business. From a privacy perspective, the organization should first?

- A. Document the distribution of bias scores
- B. Define their goals for fairness
- C. Document the False Positive Rates (FPR).
- D. Define how data subjects may object to the processing

Answer: D

Explanation:

from a privacy perspective, an organization evaluating a number of Machine Learning (ML) solutions to help automate a customer-facing part of its business should first define how data subjects may object to the processing. This involves establishing clear and transparent mechanisms for individuals to exercise their rights with respect to their personal data.
