Latest Updated MB-700 Exams Torrent - Microsoft Valid MB-700 Test Pattern: Microsoft Dynamics 365: Finance and Operations Apps Solution Architect

If you want to ace the Microsoft Dynamics 365: Finance and Operations Apps Solution Architect (MB-700) test, the main problem you may face is not finding updated MB-700 practice questions to crack this test quickly. After examining the situation, the DumpStillValid has come with the idea to provide you with updated and actual Microsoft MB-700 Exam Dumps so you can pass Microsoft Dynamics 365: Finance and Operations Apps Solution Architect (MB-700) test on the first attempt. The product of DumpStillValid has many different premium features that help you use this product with ease. The study material has been made and updated after consulting with a lot of professionals and getting customers' reviews.

The MB-700 Exam is a comprehensive assessment that covers a wide range of topics related to Finance and Operations apps. MB-700 exam measures an individual's knowledge of different modules, such as General ledger, Accounts payable, Accounts receivable, Project management and accounting, Inventory management, and more. MB-700 exam also tests the individual's ability to manage the entire lifecycle of a solution, from design to deployment and maintenance.

Recommending Lifecycle Services (LCS) Tools

- Defining the available LCS tools, including Business Process Modeler (BPM), Regression Suite Automation Tool (RSAT), and Regulatory Updates.
- Selecting the relevant LCS tools to support solution implementation.

Microsoft Dynamics 365: Finance and Operations Apps Solution Architect Sample Questions (Q131-Q136):

NEW QUESTION # 131

A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities.

Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365. The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-live.

You need to create a strategy to migrate the customer data and ensure that new records are automatically mapped.

Which solution should you implement for each requirement? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number	
Azure Data Lake	Store historical data.	
Data Migration Framework	Import customer data.	
F&O Data Feeds		

Answer:

Explanation:

Solutions	Requirement	Solution
Existing ERP system	Consolidate on the single master customer number	Data Migration Framework
Azure Data Lake	Store historical data.	Azure Data Lake
Data Migration Framework	Import customer data.	Data Migration Framework
F&O Data Feeds		

Explanation:

Requirement	Solution
Consolidate on the single master customer number.	Data Migration Framework
Store historical data.	Azure Data Lake
Import customer data.	Data Migration Framework

NEW QUESTION # 132

A company is implementing Dynamics 365 Finance.

The company wants to use Azure DevOps pipelines to automate builds.

You need to recommend the pipeline types for the company should use.

Which pipeline types should you recommend? To answer, drag the appropriate pipelines to the correct requirements. Each pipeline may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Pipeline type	Requirement	Pipeline type
Classic only	Use Git source control repositories.	Pipeline type
YAML only	Use Team Foundation Version Control (TFVC) repositories.	Pipeline type
Both YAML and classic		

Answer:

Explanation:

Pipeline type	Requirement	Pipeline type
Classic only	Use Git source control repositories.	Both YAML and classic
YAML only	Use Team Foundation Version Control (TFVC) repositories.	Classic only
Both YAML and classic		

NEW QUESTION # 133

A company is implementing Dynamics 365 Supply Chain Management. The company has 11 legal entities.

Each entity uses a separate enterprise resource planning (ERP) system. A customer may have a unique customer number in each system because the systems are disconnected. One of the customer numbers will be used as the master number in Dynamics 365. The company plans to add entities to Supply Chain Management over time. Customer records will continue to be added to the ERP systems throughout the implementation lifecycle and must be kept up to date. The ERP systems will be decommissioned after go-live.

NEW QUESTION # 135

A telecom provider uses Microsoft SharePoint to track and manage mobile phones that are issued to employees.

All information about employee-issued mobile phones be visible in Dynamics 365. Managers must be able to issue new phones directly from the system.

You need to design an integration solution using Dynamics 365 and SharePoint.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Create a blank Power Apps and connect to the SharePoint list.	
Embed the Power Apps into the Dynamics 365 Employee form.	
Use the standard formula and filter function of Power Apps.	
Embed the Power Apps into the SharePoint site.	
Create a SharePoint notification workflow.	
Establish the relationship between Dynamics 365, Power Apps, and the SharePoint list.	

Answer:

Explanation:
