### ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q160-Q165):

#### NEW QUESTION # 160

To get maximum value from validation activities, which practices should be followed? (Select 2 answers.)

- A. Identify the most important view and perform validation only from it.
- B. Choose a single ideal milestone to perform all validation activities.
- C. Ensure identification and correction of defects are done by different workers.
- D. Ensure independence between those eliciting and those validating requirements.

**Answer: C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Good validation practice includes separating responsibilities: reviewers focus on detecting defects, while others propose and implement corrections, reducing bias and conflicts of interest-supporting A.

Independence between elicitation and validation roles increases objectivity and helps expose assumptions missed during elicitation, so C is also recommended. Validation should incorporate multiple views (business, technical, test, operations), not just one, making B incorrect. Validation is not a one-off event; it should be repeated at successive milestones as requirements evolve, so D conflicts with guidance. Therefore A and C are the correct practices.

#### NEW QUESTION # 161

Consider a context diagram of a system. The context diagram of the figure was done using:

- A. All the other options are wrong
- B. a DFD
- C. an UML State Diagram
- D. an UML UCD

**Answer: B**

#### NEW QUESTION # 162

Choose the correct sentence regarding the users of a system.

- A. Internal users are inside the system while using it.
- B. Misusers are referred to as personas.
- C. External users are normally aware of the system being developed.
- D. All the other options are wrong.

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Internal users are people within the developing or owning organization (employees, management, subcontractors), not literally "inside the system", so A is wrong. External users are customers or the public; often they are numerous, not individually identifiable and may not even know a system is being developed for them, so B is incorrect. Misusers are actors who intentionally try to misuse or attack the system (e.g., hackers); personas are fictional profiles representing typical user groups, so C confuses two distinct concepts.

Therefore all given statements are incorrect, making D the right answer.

### NEW QUESTION # 163

There is a sequence of steps that should be followed when prioritizing requirements. From the steps listed below, which one comes first?

- A. Define the requirements that have to be prioritized.
- **B. Define desired assessment criteria.**
- C. Define the stakeholders that have to be involved.
- D. Select the prioritization technique.

**Answer: B**

### NEW QUESTION # 164

All the following sentences are applicable to version control on requirements, EXCEPT:

- A. Version control is useful for following the evolving history of a requirement.
- B. Each new version requires a clear description of what was changed in relation to the last version.
- C. Version numbers are typically composed of at least 2 components: version and increment.
- **D. Version numbers always start with "one".**

**Answer: D**

### NEW QUESTION # 165

.....
