SAP Certified - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q37-Q42):

NEW QUESTION # 37

How can you define default values on fields?

- A. Set only for Constant values

- B. Default values must be manually entered by the user
- C. Set as Constants or Expressions based on other field values
- D. Default values are not permitted

Answer: C

NEW QUESTION # 38

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? Note: There are 3 correct answers to this question.

- A. Publish the form template within the test site in order to add the form fields in the package.
- B. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- C. Make sure you update the string resource files in the production site before migrating the corresponding field configurations from test to production site.
- D. Discard any other packages that appear in My Action Items.
- E. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.

Answer: B,C,E

NEW QUESTION # 39

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations.

What should be used to hold the valid storage locations?

- A. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.
- B. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- C. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- D. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location

Answer: D

NEW QUESTION # 40

Who leads Suite Integration activities?

- A. Customer Success Manager
- B. SAP Deployment Lead
- C. Partner/Customer Functional Lead
- D. SAP Support

Answer: B

NEW QUESTION # 41

When you have created a new custom field and marked it as reportable, saved and published your changes, the field does not show up in your reports. How can you resolve the issue?

- A. You created the custom field in a different module. Custom fields must be created in the same module where the reports are generated to show up correctly.
- B. You need to wait 2 hours for the schema to refresh. Any change to the object model will be automatically synchronized to SAP Ariba Analytics on regular intervals
- C. You forgot to run the task Retrieve flexible fields metadata for reporting under Manage > Administration > Reporting Manager > Flex Field Reporting

- D. You did not assign the custom field to the appropriate report category. Ensure that the field is linked to the correct category for it to appear in reports.

Answer: C

NEW QUESTION # 42

.....
