ITFAS-Level-1 Valid Dumps Book - Latest ITFAS-Level-1 Mock Test

In this high-speed world, a waste of time is equal to a waste of money. As an electronic product, our ITFAS-Level-1 real study dumps have the distinct advantage of fast delivery. Once our customers pay successfully, we will check about your email address and other information to avoid any error, and send you the ITFAS-Level-1 prep guide in 5-10 minutes, so you can get our ITFAS-Level-1 Exam Questions at first time. And then you can start your study after downloading the ITFAS-Level-1 exam questions in the email attachments. High efficiency service has won reputation for us among multitude of customers, so choosing our ITFAS-Level-1 real study dumps we guarantee that you won't be regret of your decision.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q70-Q75):

NEW QUESTION # 70

Which three of the following are how a McCulloh transmitter should be inspected? (Choose three.)

- A. Distinct waterflow condition
- B. Verify location
- C. Physical condition
- D. System normal condition

Answer: B,C,D

Explanation:

McCulloh transmitters are part of older fire alarm systems but are still maintained in some jurisdictions.

Inspection focuses on general condition, correct system status, and location verification.

NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:

Under McCulloh Transmitter:

- * "Inspect physical condition"

- * "Verify location"

- * "Confirm system normal condition"

"Distinct waterflow condition" refers to alarm testing and is not part of the inspection phase.

Correct answers:

- * Physical condition

- * System normal condition

- * Verify location

NEW QUESTION # 71

Smoke detector activation in the ninth-floor elevator lobby shall activate which of the following functions?

- A. Alternate level recall
- **B. Designated level recall**
- C. Ninth-floor supervisory signal
- D. Ninth-floor trouble signal

Answer: B

Explanation:

The designated level recall function is triggered when a smoke detector is activated in that same elevator lobby. This returns the elevator to that floor (usually the ground or main level) for emergency evacuation, unless smoke is present there, in which case the alternate recall floor is used.

NFPA 72 (2022), Section 21.3.3.1:

"Activation of the smoke detector installed at the designated level shall cause all elevators that serve that level to return to an alternate level." But:

"Smoke detector activation in any other elevator lobby shall recall elevators to the designated level." So:

- * If smoke is in the ninth-floor lobby, and that lobby is not the designated level # elevator recalls to designated level.

- * Therefore, activation of the ninth-floor smoke detector (not the designated level) causes designated level recall.

Correct answer: B. Designated level recall

NEW QUESTION # 72

In private mode systems, what is the audibility requirement?

- A. 15 dBA above ambient
- **B. 10 dBA above ambient**
- C. Minimum 85 dBA
- D. Minimum 75 dBA

Answer: B

Explanation:

Private mode signaling is used in locations not open to the public (e.g., hospitals, certain office buildings).

The audibility requirement for private mode differs from public mode.

NFPA 72 (2022), Section 18.4.5.3:

"For private mode audible appliances, the sound level shall be at least 10 dBA above the average ambient sound level..." This ensures the signal is heard clearly in the intended space without exceeding what's necessary.

Correct answer: C. 10 dBA above ambient

NEW QUESTION # 73

Records of inspections, testing, and maintenance shall be provided in accordance with which section of NFPA 72?

- A. 14.6.3
- B. 10.5.3
- C. 7.6.6
- D. 7.8.2

Answer: A

Explanation:

This is a documentation requirement, and it's found in Chapter 14 of NFPA 72, which deals with Inspection, Testing, and Maintenance.

NFPA 72 (2022), Section 14.6.3.1:

"Records shall be retained for a period of one year after the next test and until the next test is performed.

Records shall be made available to the authority having jurisdiction upon request." Section 14.6.3 lays out the format, retention, and content requirements for inspection, testing, and maintenance records.

Correct answer: D. 14.6.3

Tip: For questions involving recordkeeping, head straight to Chapter 14, especially section 14.6.

NEW QUESTION # 74

After 15 years, what should be done with nonrestorable, spot-type heat detectors in lieu of testing?

- A. Replace all devices
- B. Replace 5 devices
- C. Replace 15 devices
- D. Replace 2 devices

Answer: A

Explanation:

If you choose not to send a sample of devices to a lab for testing, then all nonrestorable, fixed-temperature spot-type heat detectors must be replaced after 15 years.

NFPA 72 (2022), Section 14.4.4.4.1:

"After 15 years from the date of installation, all fixed-temperature, nonrestorable heat detectors shall be replaced or tested using a method approved by the manufacturer." If testing is not performed, then replacement of all devices is required.

Correct answer: D. Replace all devices

NEW QUESTION # 75

.....

If you must complete your goals in the shortest possible time, our ITFAS-Level-1 exam materials can give you a lot of help. For our ITFAS-Level-1 study guide can help you pass your exam after you study with them for 20 to 30 hours.
