It can help you when you lost, and let you not only improve your own quality, but also demonstratethe value of your perfect life.

ASIS Physical Security Professional Exam Sample Questions (Q144-Q149):

NEW QUESTION # 144

Predictability for security purposes is mainly an indicator of:

- A. Effectiveness
- B. Accuracy
- C. Efficiency
- **D. Behavior**

Answer: D

Explanation:

In the context of physical security, predictability typically refers to human behavior patterns that adversaries could exploit. For example, predictable patrol schedules or access procedures can be observed and defeated.

Reducing predictability enhances security by complicating an attacker's planning process.

A (Accuracy) and B (Effectiveness) relate to system performance.

D (Efficiency) relates to resource use, not vulnerability.

NEW QUESTION # 145

The moment the fire begins, when fuel, air, and an ignition source all come together at the right rate for the correct period of time is called:

- **A. Ignition stage**
- B. Free burning
- C. Incipient stage
- D. Pyrolysis stage

Answer: A

Explanation:

The ignition stage is the point at which a fire starts. This occurs when fuel, heat, and oxygen are present in the correct combination and for the right duration. It marks the beginning of combustion and transitions the scenario from a fire hazard to an active fire.

Free burning (A) is a later stage where flames are fully developed.

Pyrolysis stage (C) refers to pre-ignition gas release.

Incipient stage (D) can be synonymous with ignition but more commonly refers to the pre-flame development phase.

NEW QUESTION # 146

_____ is a plant, building, office, institution, or any commercial or industrial structure or complex with all the attendant structures and functions that are part of an integrated operation.

- A. Interior
- B. Padlocks
- **C. Facility**
- D. Contents

Answer: C

Explanation:

In physical security terminology, a "facility" refers to any plant, building, office, institution, or industrial

/commercial complex along with all its associated functions and structures that are part of an integrated operation. This includes everything from administrative buildings to warehouses and utility structures.

This definition helps determine the scope of security assessments and protective strategies under Domain 1 of the PSP program.

"Physical Security Assessment."

"Contents" (B) refers to the items inside a facility.

"Interior" (C) refers to internal areas within a facility.

"Padlocks" (D) are physical locking devices and do not define a type of structure or location.

NEW QUESTION # 147

Removing the problem by eliminating the risk is known as:

- A. Risk elimination
- B. Risk reduction
- C. Risk prevention
- **D. Risk avoidance**

Answer: D

NEW QUESTION # 148

Some people emerge as experts who then sell their expertise for a fee; these people are commonly referred to as:

- **A. Consultants**
- B. Respondents
- C. Professionals
- D. Directors

Answer: A

Explanation:

Security consultants are often retained to provide strategic input on staffing needs, policy design, and technology integration. Their advice helps organizations make informed decisions regarding the deployment of personnel, the structure of policies, and the selection of physical and electronic security systems.
