BTW, DOWNLOAD part of PassTestking AZ-500 dumps from Cloud Storage: [https://drive.google.com/open?id=1bON2X\\_xWPUubam-\\_ZjvN\\_NS7BlhzK3Xr](https://drive.google.com/open?id=1bON2X_xWPUubam-_ZjvN_NS7BlhzK3Xr)

Whereas the other two Microsoft Azure Security Technologies (AZ-500) exam questions formats are concerned both are the easy-to-use and compatible mock AZ-500 exam that will give you a real-time environment for quick Microsoft Exams preparation. Now choose the right Microsoft Azure Security Technologies (AZ-500) exam questions format and start this career advancement journey.

The tech industry has been growing at a very fast pace and anyone who is related to it needs to grow with it. If the IT professionals are slow to adopt and learn the latest technologies, they may be left behind, which can hurt their careers. In the IT field, one of the best ways to make sure that you are learning new skills is with the help of certifications.

One of the best certification providers right now is Microsoft, which offers a ton of badges that can define your career. Among those certificates, we recommend that you pay attention to Microsoft Certified: Azure Security Engineer Associate. It is the perfect choice for those who want to become a security engineer. However, to earn this credential, you will need to take the Microsoft AZ-500 exam and ace it with flying colors. In this post, we will learn everything about this test to help you understand what you can expect from it.

## How to Register For Exam AZ-500: Microsoft Azure Security Technologies?

Exam Register Link: <https://examregistration.microsoft.com/?locale=en-us&examcode=AZ-500&examname=Exam%20AZ-500%20Microsoft%20Azure%20Security%20Technologies&returnToLearningUrl=https%3A%2F%2Fdocs.microsoft.com%2Flearn%2Fcertifications%2Fexams%2Faz-500>

Microsoft AZ-500 Exam is a certification exam that validates an individual's skills in securing Microsoft Azure technologies. AZ-500 exam is designed for IT professionals who work with Azure and are responsible for securing cloud-based solutions. The AZ-500 exam tests the candidate's knowledge and skills in implementing security controls, identifying and remediating vulnerabilities, managing identity and access, and protecting data and applications in Microsoft Azure.

## Microsoft Believes in Their Real AZ-500 Exam Dumps

People who want to pass the exam have difficulty in choosing the suitable AZ-500 study materials. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the AZ-500 Study Materials from our company are best among global market. As is known to us, the AZ-500 study materials from our company are the leading practice materials in this dynamic market.

## Microsoft Azure Security Technologies Sample Questions (Q427-Q432):

### NEW QUESTION # 427

You have an Azure AD tenant that contains the users shown in the following table.

You need to ensure that the users cannot create app passwords. The solution must ensure that User1 can continue to use the Mail and Calendar app.

What should you do?

- A. Enable Azure AD Password Protection.
- B. Create a new app registration.
- C. Assign User1 the Authentication Policy Administrator role.
- **D. Configure a multi-factor authentication (MFA) registration policy.**

**Answer: D**

#### **NEW QUESTION # 428**

You need to ensure that web11597200 is protected from malware by using Microsoft Antimalware for Virtual Machines and is scanned every Friday at 01:00.

To complete this task, sign in to the Azure portal.

**Answer:**

Explanation:

See the explanation below.

Explanation

You need to install and configure the Microsoft Antimalware extension on the virtual machine named web11597200.

\* In the Azure portal, type Virtual Machines Virtual Machines from the search results then select web11597200. Alternatively, browse to Virtual Machines in the left navigation pane.

\* In the properties of web11597200, click on

\* Click the Add button to add an

\* Scroll down the list of extensions and select

\* Click the Create button. This will open the settings pane for the Microsoft Antimalware Extension.

\* In the Scan day field, select

\* In the Scan time field, enter The scan time is measured in minutes after midnight so 60 would be 01:00, 120 would be 02:00 etc.

\* Click the OK button to save the configuration and install the extension.

#### **NEW QUESTION # 429**

You have an Azure subscription that contains the resources shown in the following table.

An IP address of 10.1.0.4 is assigned to VM5. VM5 does not have a public IP address.

VM5 has just in time (JIT) VM access configured as shown in the following exhibit.

You enable JIT VM access for VM5.

NSG1 has the inbound rules shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

#### **NEW QUESTION # 430**

You are testing an Azure Kubernetes Service (AKS) cluster. The cluster is configured as shown in the exhibit.

(Click the Exhibit tab.)

You plan to deploy the cluster to production. You disable HTTP application routing.

You need to implement application routing that will provide reverse proxy and TLS termination for AKS services by using a single IP address.

What should you do?

- A. Install the container network interface (CNI) plug-in.

- B. Create an Azure Standard Load Balancer.
- C. Create an Azure Basic Load Balancer.
- **D. Create an AKS Ingress controller.**

**Answer: D**

Explanation:

Explanation

An ingress controller is a piece of software that provides reverse proxy, configurable traffic routing, and TLS termination for Kubernetes services.

<https://docs.microsoft.com/en-us/azure/aks/ingress-tls>

### NEW QUESTION # 431

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You use Azure Security Center for the centralized policy management of three Azure subscriptions.

You use several policy definitions to manage the security of the subscriptions.

You need to deploy the policy definitions as a group to all three subscriptions.

Solution: You create a resource graph and an assignment that is scoped to a management group.

Does this meet the goal?

- **A. Yes**
- B. No

**Answer: A**

Explanation:

Manage security operations

Testlet 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The company hosts its entire server infrastructure in Azure.

Contoso has two Azure subscriptions named Sub1 and Sub2. Both subscriptions are associated to an Azure Active Directory (Azure AD) tenant named contoso.com.

## Technical requirements

Contoso identifies the following technical requirements:

- \* Deploy Azure Firewall to VNetWork1 in Sub2.
- \* Register an application named App2 in contoso.com
- \* Whenever possible, use the principle of least privilege.
- \* Enable Azure AD Privileged Identity Management (PIM) for contoso.com

## Existing Environment

### Azure AD

Contoso.com contains the users shown in the following table.

Contoso.com contains the security groups shown in the following table.

### Sub1

Sub1 contains six resource groups named RG1, RG2, RG3, RG4, RG5, and RG6.

User2 creates the virtual networks shown in the following table.

Sub1 contains the locks shown in the following table.

Sub1 contains the Azure policies shown in the following table.

### Sub2

Sub2 contains the network security groups (NSGs) shown in the following table.

NSG1 has the inbound security rules shown in the following table.

NSG2 has the inbound security rules shown in the following table.

NSG3 has the inbound security rules shown in the following table.

NSG4 has the inbound security rules shown in the following table.

NSG1, NSG2, NSG3, and NSG4 have the outbound security rules shown in the following table.

Contoso identifies the following technical requirements:

- \* Deploy Azure Firewall to VNetwork1 in Sub2.
- \* Register an application named App2 in contoso.com
- \* Whenever possible, use the principle of least privilege.
- \* Enable Azure AD Privileged Identity Management (PIM) for contoso.com

## Manage security operations

### Testlet 2

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other question on this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next sections of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question on this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. If the case study has an All Information tab, note that the information displayed is identical to the information displayed on the subsequent tabs. When you are ready to answer a question, click the Question button to return to the question.

## Overview

Litware, Inc. is a digital media company that has 500 employees in the Chicago area and 20 employees in the San Francisco area.

## Existing Environment

Litware has an Azure subscription named Sub1 that has a subscription ID of 43894a43-17c2-4a39-8cfc-3540c2653ef4.

Sub1 is associated to an Azure Active Directory (Azure AD) tenant named litwareinc.com. The tenant contains the user objects and the device objects of all the Litware employees and their devices. Each user is assigned an Azure AD Premium P2 license. Azure AD Privileged Identity Management (PIM) is activated.

The tenant contains the groups shown in the following table.

The Azure subscription contains the objects shown in the following table.

Azure Security Center is set to the Free tier.

## Planned changes

Litware plans to deploy the Azure resources shown in the following table.

Litware identifies the following identity and access requirements:

- \* All San Francisco users and their devices must be members of Group1.
- \* The members of Group2 must be assigned the Contributor role to Resource Group2 by using a permanent eligible assignment.
- \* Users must be prevented from registering applications in Azure AD and from consenting to applications that access company information on the users' behalf.

## Platform Protection Requirements

Litware identifies the following platform protection requirements:

- \* Microsoft Antimalware must be installed on the virtual machines in Resource Group1.
- \* The members of Group2 must be assigned the Azure Kubernetes Service Cluster Admin Role.
- \* Azure AD users must be able to authenticate to AKS1 by using their Azure AD credentials.
- \* Following the implementation of the planned changes, the IT team must be able to connect to VM0 by using JIT VM access.
- \* A new custom RBAC role named Role1 must be used to delegate the administration of the managed disks in Resource Group1. Role1 must be available only for Resource Group1.

## Security Operations Requirements

Litware must be able to customize the operating system security configurations in Azure Security Center.

## Data and Application Requirements

Litware identifies the following data and applications requirements:

- \* The users in Group2 must be able to authenticate to SQLDB1 by using their Azure AD credentials
- \* WebApp1 must enforce mutual authentication

## General Requirements

Litware identifies the following general requirements:

- \* Whenever possible, administrative effort must be minimized
- \* Whenever possible, use of automation must be minimized

## NEW QUESTION # 432

.....

Our AZ-500 vce dumps constantly get updated according to the changes of exam requirement from the certification center. Our experts created AZ-500 practice exam to help our candidates get used to the formal test and face the challenge with great confidence. One-year free updating of AZ-500 Test Answers will be allowed after payment and one or two days' preparation before test will be recommend.
