For one thing, the most advanced operation system in our company which can assure you the fastest delivery speed, and your personal information will be encrypted automatically by our operation system. For another thing, with the online app version of our Salesforce-AI-Specialist actual exam, you can just feel free to practice the questions in our training materials on all kinds of electronic devices. In addition, under the help of our Salesforce-AI-Specialist Exam Questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future.

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. Salesforce-AI-Specialist practice materials are an effective tool to help you reflect your abilities. We also hire a team of experts, and the content of Salesforce-AI-Specialist question torrent is all high-quality test guidance materials that have been accepted by experienced professionals. Salesforce-AI-Specialist practice materials will be the most professional and dedicated tutor you have ever met.

## Salesforce-AI-Specialist Exam Dumps: Salesforce Certified AI Specialist Exam & Salesforce-AI-Specialist Training Materials & Salesforce-AI-Specialist Dumps Torrent

As we have become the leader in this career and our experts have studying the Salesforce-AI-Specialist exam braindumps for many years and know every detail about this subjet. So our Salesforce-AI-Specialist simulating exam is definitely making your review more durable. To add up your interests and simplify some difficult points, our experts try their best to design our Salesforce-AI-Specialist Study Material and help you understand the learning guide better.

### Salesforce Certified AI Specialist Exam Sample Questions (Q120-Q125):

#### NEW QUESTION # 120

What should an AI Specialist consider when using related list merge fields in a prompt template associated with an Account object in Prompt Builder?

- A. Prompt generation will yield no response when there is no related list associated with an Account in runtime.
- B. The Activities related list on the Account object is not supported because it is a polymorphic field.
- C. If person accounts have been enabled, merge fields will not be available for the Account object.

Answer: B

#### Explanation:

When using related list merge fields in a prompt template associated with the Account object in Prompt Builder, the Activities related lists are not supported due to it being a polymorphic field. Polymorphic fields can reference multiple different types of objects, which makes them incompatible with some merge field operations in prompt generation.

- \* Option B is incorrect because person accounts do not limit the availability of merge fields for the Account object.
- \* Option C is irrelevant since even if no related lists are available at runtime, the prompt can still generate based on other available data fields.

For more information, refer to Salesforce documentation on supported fields and limitations in Prompt Builder.

#### NEW QUESTION # 121

Universal Containers (UC) wants to use Flow to bring data from unified Data Cloud objects to prompt templates.

Which type of flow should UC use?

- A. Unified-object linking flow
- B. **Template-triggered prompt flow**
- C. Data Cloud-triggered flow

#### Answer: B

#### Explanation:

In this scenario, Universal Containers wants to bring data from unified Data Cloud objects into prompt templates, and the best way to do that is through a Data Cloud-triggered flow. This type of flow is specifically designed to trigger actions based on data changes within Salesforce Data Cloud objects.

Data Cloud-triggered flows can listen for changes in the unified data model and automatically bring relevant data into the system, making it available for prompt templates. This ensures that the data is both real-time and up-to-date when used in generative AI contexts.

For more detailed guidance, refer to Salesforce documentation on Data Cloud-triggered flows and Data Cloud integrations with generative AI solutions.

#### NEW QUESTION # 122

An AI Specialist configured Data Masking within the Einstein Trust Layer.

How should the AI Specialist begin validating that the correct fields are being masked?

- A. Use a Flow-based resource in Prompt Builder to debug the fields' merge values using Flow Debugger.
- B. Enable the collection and storage of Einstein Generative AI Audit Data on the Einstein Feedback setup page.
- C. **Request the Einstein Generative AI Audit Data from the Security section of the Setup menu.**

#### Answer: C

#### Explanation:

To begin validating that the correct fields are being masked in Einstein Trust Layer, the AI Specialist should request the Einstein Generative AI Audit Data from the Security section of the Salesforce Setup menu.

This audit data allows the AI Specialist to see how data is being processed, including which fields are being masked, providing transparency and validation that the configuration is working as expected.

- \* Option B is correct because it allows for the retrieval of audit data that can be used to validate data masking.
- \* Option A (Flow Debugger) and Option C (Einstein Feedback) do not relate to validating field masking in the context of the Einstein Trust Layer.

#### References:

\* Salesforce Einstein Trust Layer Documentation: [https://help.salesforce.com/s/articleView?id=sf.einstein\\_trust\\_layer\\_audit.htm](https://help.salesforce.com/s/articleView?id=sf.einstein_trust_layer_audit.htm)

#### NEW QUESTION # 123

Universal Containers (UC) wants to create a new Sales Email prompt template in Prompt Builder using the "Save As" function. However, UC notices that the new template produces different results compared to the standard Sales Email prompt due to missing hyperparameters.

What should UC do to ensure the new prompt template produces results comparable to the standard Sales Email prompts?

- A. Manually add the hyperparameters to the new template.
- B. Revert to using the standard template without modifications.
- C. Use Model Playground to create a model configuration with the specified parameters.

**Answer: A**

Explanation:

When Universal Containers creates a new Sales Email prompt template using the "Save As" function, missing hyperparameters can result in different outputs. To ensure the new prompt produces comparable results to the standard Sales Email prompt, the AI Specialist should manually add the necessary hyperparameters to the new template.

Hyperparameters like Temperature, Frequency Penalty, and Presence Penalty directly affect how the AI generates responses.

Ensuring that these are consistent with the standard template will result in similar outputs.

Option A (Model Playground) is not necessary here, as it focuses on fine-tuning models, not adjusting templates directly.

Option C (Reverting to the standard template) does not solve the issue of customizing the prompt template.

For more information, refer to Prompt Builder documentation on configuring hyperparameters in custom templates.

**NEW QUESTION # 124**

What is the primary function of the planner service in the Einstein Copilot system?

- A. Identifying copilot actions to respond to user utterances
- B. Generating record queries based on conversation history
- C. Offering real-time language translation during conversations

**Answer: A**

Explanation:

The primary function of the planner service in the Einstein Copilot system is to identify copilot actions that should be taken in response to user utterances. This service is responsible for analyzing the conversation and determining the appropriate actions (such as querying records, generating a response, or taking another action) that the Einstein Copilot should perform based on user input.

**NEW QUESTION # 125**

.....

Actually, most people do not like learning the boring knowledge. It is hard to understand if our brain rejects taking the initiative. Now, our company has researched the Salesforce-AI-Specialist practice guide, a kind of high efficient learning tool. Firstly, we have deleted all irrelevant knowledge, which decreases your learning pressure. Secondly, the displays of the Salesforce-AI-Specialist Study Materials are varied to cater to all for your different study interest and hobbies. It is interesting to study with our Salesforce-AI-Specialist exam questions.

**Dumps Salesforce-AI-Specialist Collection:** <https://www.prep4away.com/Salesforce-certification/braindumps.Salesforce-AI-Specialist.ete.file.html>

We strive to deliver the best Salesforce Dumps Salesforce-AI-Specialist Collection valid files for top grades in your first attempt. If you really want to improve your ability, you should quickly purchase our Salesforce-AI-Specialist study braindumps. If you want to use this Salesforce-AI-Specialist practice exam to improve learning efficiency, our Salesforce-AI-Specialist exam questions will be your best choice and you will be satisfied to find its good quality and high efficiency. To choose the best Salesforce-AI-Specialist practice materials is just the same thing.

Select a password for your administrative user, Maintain security and Salesforce-AI-Specialist protect business continuity on an ongoing basis. We strive to deliver the best Salesforce valid files for top grades in your first attempt.

## **Interactive Salesforce-AI-Specialist Testing Engine | 100% Free Trustable Dumps Salesforce Certified AI Specialist Exam Collection**

If you really want to improve your ability, you should quickly purchase our Salesforce-AI-Specialist study braindumps. If you want to use this Salesforce-AI-Specialist practice exam to improve learning efficiency, our Salesforce-AI-Specialist exam questions will be your best choice and you will be satisfied to find its good quality and high efficiency.

To choose the best Salesforce-AI-Specialist practice materials is just the same thing. The content of Salesforce-AI-Specialist study

materials is absolutely rich.
