CIPM Exam Study Guide 2023-2024| With Questions & Answers (100%Verified)

Which of the following is not a metric an organization would use? - ANSWER - Minimize security threats

Which of the following is least likely a goal of an organization's privacy program? - ANSWER - Hiring a privacy officer or manager

In which of the following ways can internal audit most likely help a privacy program? - ANSWER - Providing consultancy services

What can be considered to be the essence of an organization's privacy notice communicated to the outside world? - ANSWER - A promise on handling

Which of the following is most true about privacy by design? - ANSWER - Results, partly, in compliance with the General Data Protection Regulation

Which of the following is the best description of an accountable organization? - ANSWER - An organization with the necessary policies and procedures

Which step is likely not part of a privacy program with the goal to protect an organization's brand? - ANSWER - Prevent phishing e-mails using the company logo from being sent

What is "the authority aims to safeguard the balance between the right to privacy and other rights"? - ANSWER - A mission or vision

A manufacturing company has placed computers all around the manufacturing area to help machine operators to relax during their lunch break and check their e-mails or social media. The company is doing so in an attempt to stop the machine operators from being distracted by their phones during their work and all the dangers that come with being distracted in a manufacturing area.

All the computers are connected to both the intranet and the internet. This allows an internal news bulletin and all policies and procedures to be displayed easily. There are regular updates, for example on family events, updates of procedures, bonus-related information and news on the employee of the month.

In addition to involving employees by sharing company news with them, all procedures are on the intranet. Anything from safe work practice guidelines to social media guidelines can be found on the intranet.

To use the computer, no login is needed. All computers are configured to be accessible to anyone, with ease. A downside of this is a shared hard-drive, and the older

With the development of information and communications technology, we are now living in a globalized world. CIPM information

technology learning is correspondingly popular all over the world. Modern technology has changed the way how we live and work. In current situation, enterprises and institutions require their candidates not only to have great education background, but also acquired professional CIPM Certification. Considering that, it is no doubt that an appropriate certification would help candidates achieve higher salaries and get promotion.

IAPP Certified Information Privacy Manager (CIPM) Sample Questions (Q152-Q157):

NEW QUESTION # 152

In regards to the collection of personal data conducted by an organization, what must the data subject be allowed to do?

- A. Obtain a guarantee of prompt notification in instances involving unauthorized access of the data
- **B. Set a time-limit as to how long the personal data may be stored by the organization**
- C. Challenge the authenticity of the personal data and have it corrected if needed
- D. Evaluate the qualifications of a third-party processor before any data is transferred to that processor

Answer: B

NEW QUESTION # 153

SCENARIO

Please use the following to answer the next QUESTION:

Henry Home Furnishings has built high-end furniture for nearly forty years. However, the new owner, Anton, has found some degree of disorganization after touring the company headquarters. His uncle Henry had always focused on production - not data processing - and Anton is concerned. In several storage rooms, he has found paper files, disks, and old computers that appear to contain the personal data of current and former employees and customers. Anton knows that a single break-in could irrevocably damage the company's relationship with its loyal customers. He intends to set a goal of guaranteed zero loss of personal information.

To this end, Anton originally planned to place restrictions on who was admitted to the physical premises of the company. However, Kenneth - his uncle's vice president and longtime confidante - wants to hold off on Anton's idea in favor of converting any paper records held at the company to electronic storage. Kenneth believes this process would only take one or two years. Anton likes this idea; he envisions a password-protected system that only he and Kenneth can access.

Anton also plans to divest the company of most of its subsidiaries. Not only will this make his job easier, but it will simplify the management of the stored data. The heads of subsidiaries like the art gallery and kitchenware store down the street will be responsible for their own information management. Then, any unneeded subsidiary data still in Anton's possession can be destroyed within the next few years.

After learning of a recent security incident, Anton realizes that another crucial step will be notifying customers. Kenneth insists that two lost hard drives in Question are not cause for concern; all of the data was encrypted and not sensitive in nature. Anton does not want to take any chances, however. He intends on sending notice letters to all employees and customers to be safe.

Anton must also check for compliance with all legislative, regulatory, and market requirements related to privacy protection. Kenneth oversaw the development of the company's online presence about ten years ago, but Anton is not confident about his understanding of recent online marketing laws. Anton is assigning another trusted employee with a law background the task of the compliance assessment. After a thorough analysis, Anton knows the company should be safe for another five years, at which time he can order another check.

Documentation of this analysis will show auditors due diligence.

Anton has started down a long road toward improved management of the company, but he knows the effort is worth it. Anton wants his uncle's legacy to continue for many years to come.

Which important principle of Data Lifecycle Management (DLM) will most likely be compromised if Anton executes his plan to limit data access to himself and Kenneth?

- **A. Practicing data minimalism**
- B. Ensuring adequacy of infrastructure.
- C. Ensuring data retrievability.
- D. Implementing clear policies.

Answer: A

NEW QUESTION # 154

Under the GDPR, what obligation does a data controller or processor have after appointing a data protection officer (DPO)?

- A. To submit for approval to the DPO a code of conduct to govern organizational practices and demonstrate compliance with data protection principles.
- B. To ensure that the DPO acts as the sole point of contact for individuals' questions about their personal data.
- C. To ensure that the DPO receives sufficient instructions regarding the exercise of their defined tasks.
- D. To provide resources necessary to carry out the defined tasks of the DPO and to maintain their expert knowledge.

Answer: D

NEW QUESTION # 155

SCENARIO

Please use the following to answer the next question

You were recently hired by InStyle Date Corp as a privacy manager to help InStyle Data Corp become compliant with a new data protection law. The law mandates that businesses have reasonable and appropriate security measures in place to protect personal data. Violations of that mandate are heavily fined and the legislators have stated that they will aggressively pursue companies that don't comply with the new law. You are paired with a security manager and tasked with reviewing InStyle Data Corp's current state and advising the business how it can meet the "reasonable and appropriate security" requirement. InStyle Data Corp has grown rapidly and has not kept a data inventory or completed a data mapping. InStyle Data Corp has also developed security-related policies ad hoc and many have never been implemented. The various teams involved in the creation and testing of InStyle Data Corp's products experience significant turnover and do not have well-defined roles. There's little documentation addressing what personal data is processed by which product and for what purpose. Work needs to begin on this project immediately so that InStyle Data Corp can become compliant by the time the law goes into effect. You and your partner discover that InStyle Data Corp regularly sends files containing sensitive personal data back to its customers through email, sometimes using InStyle Data Corp employees' personal email accounts. You also learn that InStyle Data Corp's privacy and information security teams are not informed of new personal data flows, new products developed by InStyle Data Corp that process personal data, or updates to existing InStyle Data Corp products that may change what or how the personal data is processed until after the product or update has gone live. Through a review of InStyle Date Corp's test and development environment logs, you discover InStyle Data Corp sometimes gives login credentials to any InStyle Data Corp employee or contractor who requests them. The test environment only contains dummy data but the development environment contains personal data including Social Security Numbers, health
