Reliable Oracle 1z0-1057-25 Braindumps Files - Accurate 1z0-1057-25 Answers

By adhering to the principle of "quality first, customer foremost", and "mutual development and benefit", our company will provide first class service for our customers. The exam prepare materials of PrepAwayExam is high quality and high pass rate, it is completed by our experts who have a good understanding of Real 1z0-1057-25 Exam and have many years of experience writing study materials. They know very well what candidates really need most when they prepare for the 1z0-1057-25 exam. They also understand the real exam situation very well. We will let you know what a real exam is like.

Oracle Project Management Cloud 2025 Implementation Professional Sample

Questions (Q62-Q67):

NEW QUESTION # 62

Your customer wants to see how quantity, cost, and revenue amounts are automatically distributed by using Spread Curve. Identify two period options that are available for this purpose. (Choose two.)

- A. PA Calendar
- B. Calendar Types
- C. Accounting Periods
- D. Project Accounting Periods
- E. PA-GL Periods

Answer: C,D

Explanation:
Reference https://fusionhelp.oracle.com/helpPortal/topic
/TopicId_P_87F467307D50416BE040D30A68816855
Spread curves let you distribute quantity, cost, and revenue amounts automatically across accounting or project accounting periods. You assign a spread curve to each resource class. Planning resources (in the planning resource breakdown structure) inherit the spread curve setting from the associated resource class.
You can change the spread curve for the planning resource and for any corresponding task assignments, or budget or forecast lines.

NEW QUESTION # 63

You are managing a project based on a Waterfall model. You define a project and a project plan in Oracle Project Management with tasks and subtasks applicable to each of the phases of the project: Initiation, Discovery, Design, Build, Test, and Deploy. As a project manager, you want to define deliverables for your project requirements that are elucidated during the Discovery phase of your project. You now want to understand how the inheritance between requirements, tasks, and deliverables works.
Which two are correct statements in this scenario? (Choose two.)

- A. A deliverable associated with a requirement is automatically associated with the tasks created for that requirement.
- B. A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement.
- C. You associate a deliverable with a task independent of associating a requirement with a task.
- D. The association of a deliverable with a task is dependent on associating a requirement with a task.

Answer: B,C

Explanation:
According to Oracle sources1, the inheritance between requirements, tasks, and deliverables works as follows:
* You can associate a deliverable with a task independent of associating a requirement with a task. You can also associate a deliverable with a requirement independent of associating a task with a requirement
1.
* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. You must manually associate the deliverable with the tasks that produce it1.
Therefore, the correct answer is B and D.
1: Can deliverables for projects and tasks be inherited from associated requirements? - docs.oracle.com (index
1)
In Oracle Project Management, you can define requirements, tasks, and deliverables for your project based on your project methodology and lifecycle. Requirements are statements of needs or expectations that must be met by the project outcome. Tasks are units of work that must be performed to complete the project.
Deliverables are products or services that are produced or provided as part of a task or requirement. Two correct statements about how the inheritance between requirements, tasks, and deliverables works are:
* You associate a deliverable with a task independent of associating a requirement with a task. This means that you can create a deliverable for a task regardless of whether the task is linked to a requirement or not.
* A deliverable associated with a requirement is not automatically associated with the tasks created for that requirement. This means that you have to manually associate a deliverable with a task even if both the deliverable and the task are linked to the same requirement.

NEW QUESTION # 64

Identify three correct statements about project types. (Choose three.)

- A. Summarization options can be specified at project type.
- B. Project type can be used as a source in subledger accounting.
- C. Project type can be enabled for both billing and capitalization.
- D. Project type can be associated with multiple project units.
- E. Classifications can be assigned at project type.

Answer: A,B,D

Explanation:
Project type is a classification that defines the common attributes and processing options for projects. Some of the correct statements about project type are:
* Project type can be used as a source in subledger accounting. This allows you to create accounting rules based on the project type attribute.
* Summarization options can be specified at project type. This allows you to control how the project transactions are summarized for reporting and performance purposes.
* Project type can be associated with multiple project units. This allows you to share the same project type across different business units or organizations. Project type cannot be enabled for both billing and capitalization, as these are mutually exclusive options. Classifications cannot be assigned at project type, but at project or task level. NEW QUESTION # 65
You have a billable project for which the following details are provided:
Associated Inception-To-Date (ITD) Project Actual Cost: USD 60
Associated Project Budgeted Cost: USD 300
Contract Amount: USD 1000
Project Funded Amount: USD 750
Sum of Existing Revenue Events: USD 80
Identify the Associated Project Spent revenue that will get generated based on the preceding details. (Choose the best answer.)

- A. USD 134
- B. USD 70
- C. USD 184
- D. USD 120

Answer: B

Explanation:
Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapjb/manage-project-contract-revenue.html#OAPJB164173 Associated Project Percent Spent Example The following formula calculates the percent spent revenue for the associated project.
((Sum of ITD Actual Cost for every subtask that is part of the associated task / Sum of Total Budgeted cost for every task that is part of associated task) x Associated Project Funded Amount) - Sum of Existing Invoice Event Amounts for the Associated Project ((60/300) x 750) - 80 = 70 ((Actual Cost / Budgeted Cost) x Budgeted Revenue) - Sum of Revenue Event Amount

NEW QUESTION # 66
Identify the precedence order in which cost rates are determined for a planning resource when deriving raw costs for rate-based planning resources. (Choose the best answer.)

- A. Job rate schedule > Resource class rate schedule > Override rate > Person rate schedule
- B. Override rate > Person rate schedule > Job rate schedule > Resource class rate schedule
- C. Resource class rate schedule > Override rate > Job rate schedule > Person rate schedule
- D. Override rate > Job rate schedule > Resource class rate schedule > Person rate schedule
- E. Person rate schedule > Job rate schedule > Resource class rate schedule > Override rate

Answer: B
