Pass Guaranteed 2026 Authoritative PCCP: Valid Palo Alto Networks Certified Cybersecurity Practitioner Exam Cost

With all PCCP practice questions being brisk in the international market, our PCCP exam materials are quite catches with top-ranking quality. But we do not stop the pace of making advancement by following the questions closely according to exam. So our experts make new update as supplementary updates. So that our PCCP study braindumps are always the latest for our loyal customers and we will auto send it to you as long as we update it.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q77-Q82):

NEW QUESTION # 77

Which product functions as part of a SASE solution?

- A. Prisma Cloud

- B. Kubernetes
- C. Cortex
- **D. Prisma SD-WAN**

Answer: D

Explanation:

Prisma SD-WAN is a key component of a SASE (Secure Access Service Edge) solution. It provides intelligent routing, traffic optimization, and secure connectivity between users and applications, supporting the networking part of SASE alongside security services like those in Prisma Access.

NEW QUESTION # 78

Which technique uses file sharing or an instant messenger client such as Meebo running over Hypertext Transfer Protocol (HTTP)?

- A. Port hopping
- B. Use of non-standard ports
- C. Hiding within SSL encryption
- **D. Tunneling within commonly used services**

Answer: D

Explanation:

Tunneling is a method of transporting data across a network using protocols that are not supported by that network. Tunneling works by encapsulating packets: wrapping packets inside of other packets. Tunneling within commonly used services is a technique that uses file sharing or an instant messenger client such as Meebo running over HTTP to bypass firewalls or other network restrictions. The data packets are encapsulated within HTTP packets and sent as normal web traffic. This way, the data packets can reach their destination without being blocked or detected by the network. NEW QUESTION # 79

What is a reason IoT devices are more susceptible to command-and-control (C2) attacks?

- A. Higher attack surface due to mobility
- B. Decreased connection quality within a local area network
- C. Limited battery/ life preventing always-on security
- **D. Increased sharing of data through the internet**

Answer: D

Explanation:

IoT devices often have constant internet connectivity and increased data sharing, making them more vulnerable to command-and-control (C2) attacks. Their limited security features and exposure to external networks provide attackers more opportunities to compromise and control them remotely.

NEW QUESTION # 80

When signature-based antivirus software detects malware, what three things does it do to provide protection? (Choose three.)

- A. remove the infected file's extension
- **B. delete the infected file**
- **C. quarantine the infected file**
- **D. alert system administrators**
- E. decrypt the infected file using base64

Answer: B,C,D

Explanation:

Signature-based antivirus software is a type of security software that uses signatures to identify malware.

Signatures are bits of code that are unique to a specific piece of malware. When signature-based antivirus software detects a piece of malware, it compares the signature to its database of known signatures¹². If a match is found, the software can do three things to provide protection:

* Alert system administrators: The software can notify the system administrators or the users about the malware detection, and provide information such as the name, type, location, and severity of the malware. This can help the administrators or the users to take appropriate actions to prevent further damage or infection³.

* Quarantine the infected file: The software can isolate the infected file from the rest of the system, and prevent it from accessing or modifying any other files or processes. This can help to contain the malware and limit its impact on the system⁴.

* Delete the infected file: The software can remove the infected file from the system, and prevent it from running or spreading. This can help to eliminate the malware and restore the system to a clean state⁴.

What is a signature-based antivirus? - Info Exchange

What is a Signature and How Can I detect it? - Sophos

NEW QUESTION # 81

How does Prisma SaaS provide protection for Sanctioned SaaS applications?

- A. Prisma SaaS does not provide protection for Sanctioned SaaS applications because they are secure
- B. Prisma access uses Uniform Resource Locator (URL) Web categorization to provide protection and sharing visibility
- C. Prisma SaaS connects to an organizations internal print and file sharing services to provide protection and sharing visibility
- **D. Prisma SaaS connects directly to sanctioned external service providers SaaS application service to provide protection and sharing visibility**

Answer: D

Explanation:

Prisma SaaS connects directly to the applications themselves, therefore providing continuous silent monitoring of the risks within the sanctioned SaaS applications, with detailed visibility that is not possible with traditional security solutions.

NEW QUESTION # 82

.....

According to the candidate's demand, Actual4Dumps will update Palo Alto Networks PCCP dumps. Actual4Dumps is a composite of top IT experts, certified trainers and competent authors for Palo Alto Networks PCCP exam. They collate the braindumps, guarantee the quality! No matter how the times change, Actual4Dumps good quality will never change. After the majority of candidates purchase our products, they passed Palo Alto Networks PCCP Certification Exam, which indicates Actual4Dumps has high quality.
