NCP-US Pass Guaranteed & Valid NCP-US Test Online

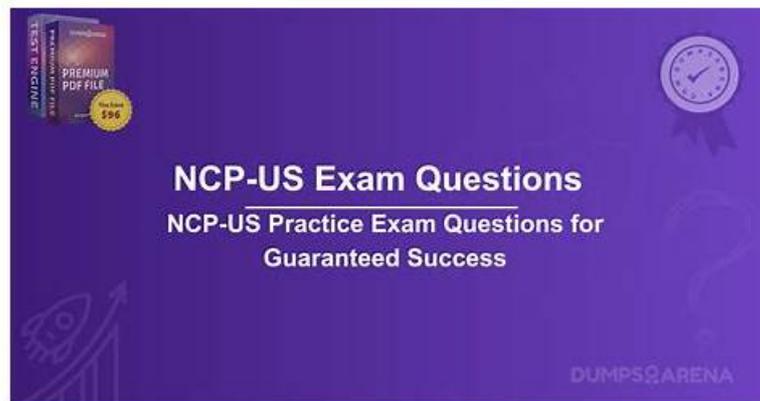

2026 Latest DumpsReview NCP-US PDF Dumps and NCP-US Exam Engine Free Share: https://drive.google.com/open?id=1AcIcV7yiNGAzXdDoqyY67yf2KdEgd5d9

There is always a fear of losing the NCP-US exam and this causes you may loss your money and waste the time. There is no such issue if you study our NCP-US exam questions. Your money and exam attempt is bound to award you a sure and definite success if you study with our NCP-US Study Guide to prapare for the exam. According to our data, our pass rate of the NCP-US practice engine is high as 98% to 100%. So if you choose our NCP-US learning quiz, you will pass for sure.

Nutanix NCP-US certification exam is a comprehensive exam that covers a wide range of topics related to unified storage. NCP-US exam is designed to test the skills and knowledge of candidates in various areas such as storage architecture, storage management, data protection, and disaster recovery. NCP-US exam is designed to validate the skills and expertise of IT professionals who are interested in integrating, managing, and deploying Nutanix solutions. The Nutanix NCP-US certification exam is a globally recognized certification that is designed to validate the skills and expertise of IT professionals who are interested in integrating, managing, and deploying Nutanix solutions.

Nutanix Certified Professional - Unified Storage (NCP-US) v6 exam is a certification test designed for individuals who want to prove their knowledge and expertise in Nutanix unified storage. NCP-US Exam is one of the certification exams offered by Nutanix, a leader in the hyper-converged infrastructure (HCI) industry.

Valid Nutanix NCP-US Test Online & Composite Test NCP-US Price

To give you an idea before the DumpsReview exam questions purchase, we are offering a free Nutanix NCP-US exam questions demo facility. This demo download facility is available for all three DumpsReview exam question formats. Moreover, we also offer up to 1 year of NCP-US Free Exam Questions updates. If you think the NCP-US exam questions can help you in NCP-US exam preparation then take your buying decision and start preparation. Best of luck!!!

Nutanix NCP-US (Nutanix Certified Professional - Unified Storage (NCP-US) v6) Certification Exam is an industry-recognized certification that validates the skills and knowledge of IT professionals in managing and maintaining Nutanix storage solutions. NCP-US Exam is designed for individuals who have experience in administering Nutanix storage solutions and want to demonstrate their expertise in this area.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q27-Q32):

NEW QUESTION # 27
An administrator is building a new application server and has decided to use post-process compression for the file server and inline compression for the database components.
The current environment has these characteristics:
Two Volume Groups named VGI and VG2.
A Storage Container named SCI with inline-compression.
A Storage Container named SC2 with post-process compression.

Which action should the administrator take to most efficiently satisfy this requirement?

- A. Wfithin VG1, create one vDisk in SC1 and one vDisk in Sc2.
- B. Writhin VG1, create one vDisk in SC1 and within VG2, create one vDisk in SC2.
- C. Wthin SC1, create one vDisk in VG1 and one vDisk in VG2,
- D. Within SC1, create one Wisk in VG1 and within SC2. create one Disk in VG2

Answer: B

Explanation:
Volume Groups (VGs) are collections of vDisks that can be attached to VMs1. vDisks are virtual disks that reside on Storage Containers2. Storage Containers are logical entities that provide storage services with different compression options3.
To use post-process compression for the file server and inline compression for the database components, you need to create two vDisks on different Storage Containers with different compression options. Then you need to attach those vDisks to different VGs.

NEW QUESTION # 28
Which feature ensures that a host failure's impact on a Files cluster will be minimal?

- A. VM-VM affinity rules
- B. VM-Host anti-affinity rules
- C. VM-Host affinity rules
- D. VM-VM anti-affinity rules

Answer: B

Explanation:
These rules ensure that VMs are distributed across different hosts in a cluster, so that if one host fails, the impact on the VMs and their data will be minimal1. Nutanix Files also supports DFS-N (Distributed File System - Namespaces), which allows multiple file servers hosting the same data to support a common folder and provide site affinity for users2.

NEW QUESTION # 29
An administrator has determined that adding File Server VMs to the cluster will provide more resources.
What must the administrator validate so that the new File Server VMs can be added?

- A. Sufficient storage container space is available to host the volume groups.
- B. Ensure Files Analytics is installed.
- C. Sufficient nodes in the cluster is greater than current number of FSVMs.
- D. Ensure network ports are available.

Answer: C

NEW QUESTION # 30
A company's IT security policy requires that all network traffic must be secure, and no web browser certificate error warnings should be accepted by end users.
An administrator is tasked with configuring Objects so that it uses a certificate from an internal Certificate Authority (CA), How should the administrator configure Objects to meet the security policy?

- A. Import the Private key and certificate files from the internal CA.
- B. Regenerate the self-signed certificate with RSA 2048 as the bit type
- C. Import the Private key with Subject Alternate Name of the company donmain.
- D. Regenerate the CSR and download certificates from the internal CA

Answer: D

Explanation:
According to Nutanix Support & Insights1, "To set the SSL certificate, do the following: ... Under SSL Certificates, click Replace SSL Certificate. Click Regenerate CSR. Copy and save the generated CSR text. Use this text to request a certificate from your

CA." Therefore, the administrator should regenerate the CSR and download certificates from the internal CA to replace the self-signed certificate that Objects uses by default.

NEW QUESTION # 31

An administrator has an existing four-node Nutanix cluster at a primary site with three FSVM instances deployed. They want to configure Smart DR on a five-node Nutanix cluster at the recovery site.

How many FSVMs should be deployed on the recovery site for Smart DR?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

NEW QUESTION # 32

......
