

What are reliable sources for Salesforce Mule-Arch-201 certification exam preparation?

P.S. Free 2026 Salesforce Mule-Arch-201 dumps are available on Google Drive shared by Itcerttest:
<https://drive.google.com/open?id=15AKNz4MtqI8vJckDYxMsVPNsKL8Ds4Hd>

Our Mule-Arch-201 real dumps was designed by many experts in different area, they have taken the different situation of customers into consideration and designed practical Mule-Arch-201 study materials for helping customers save time. Whether you are a student or an office worker, we believe you will not spend all your time on preparing for Mule-Arch-201 Exam. With our simplified information, you are able to study efficiently.

If you buy our Mule-Arch-201 exam questions, we will offer you high quality products and perfect after service just as in the past. We believe our consummate after-sale service system will make our customers feel the most satisfactory. Our company has designed the perfect after sale service system for these people who buy our Mule-Arch-201 practice materials. We can promise that we will provide you with quality products, reasonable price and professional after sale service on our Mule-Arch-201 learning guide.

>> **Reliable Mule-Arch-201 Exam Practice** <<

Newest Reliable Mule-Arch-201 Exam Practice - Best Accurate Source of Mule-Arch-201 Exam

Our Mule-Arch-201 study materials can help you achieve your original goal and help your work career to be smoother and your family life quality to be better and better. There is no exaggeration to say that you will be confident to take part in you exam with only studying our Mule-Arch-201 practice dumps for 20 to 30 hours. And thousands of candidates have achieved their dreams and ambitions with the help of our outstanding Mule-Arch-201 training materials.

Salesforce Certified MuleSoft Platform Architect Sample Questions (Q55-Q60):

NEW QUESTION # 55

A Mule application exposes an HTTPS endpoint and is deployed to three CloudHub workers that do not use static IP addresses.

The Mule application expects a high volume of client requests in short time periods. What is the most cost-effective infrastructure component that should be used to serve the high volume of client requests?

- A. A customer-hosted load balancer
- B. An API proxy
- **C. The CloudHub shared load balancer**
- D. Runtime Manager autoscaling

Answer: C

Explanation:

Correct Answer: The CloudHub shared load balancer

The scenario in this question can be split as below:

>> There are 3 CloudHub workers (So, there are already good number of workers to handle high volume of requests)

>> The workers are not using static IP addresses (So, one CANNOT use customer load-balancing solutions without static IPs)

>> Looking for most cost-effective component to load balance the client requests among the workers.

Based on the above details given in the scenario:

>> Runtime autoscaling is NOT at all cost-effective as it incurs extra cost. Most over, there are already 3 workers running which is a good number.

>> We cannot go for a customer-hosted load balancer as it is also NOT most cost-effective (needs custom load balancer to maintain and licensing) and same time the Mule App is not having Static IP Addresses which limits from going with custom load balancing.

>> An API Proxy is irrelevant there as it has no role to play w.r.t handling high volumes or load balancing.

So, the only right option to go with and fits the purpose of scenario being most cost-effective is - using a CloudHub Shared Load Balancer.

NEW QUESTION # 56

Which three tools automate the deployment of Mule applications?

Choose 3 answers

- A. Mule Maven plugin
- **B. Runtime Manager**
- C. Anypoint Studio
- **D. Anypoint Platform CLI**
- E. API Community Manager
- **F. Platform APIs**

Answer: B,D,F

Explanation:

MuleSoft offers various tools to automate the deployment of Mule applications, which can streamline deployment and management processes. Here's how each tool supports automated deployment:

Runtime Manager:

Anypoint Runtime Manager is MuleSoft's web-based interface that allows users to deploy, manage, and monitor applications directly. It provides deployment automation through its user-friendly interface.

Anypoint Platform CLI:

The Anypoint CLI enables scripting of deployment and management tasks, making it possible to automate deployments via command-line scripts. This tool is ideal for CI/CD pipelines as it integrates with automated processes.

Platform APIs:

MuleSoft's Platform APIs allow programmatic access to deployment functions, enabling integration with external automation tools and CI/CD systems. These APIs facilitate deployment through RESTful calls, which can be automated for continuous delivery.

of Incorrect Options:

Option D (Anypoint Studio) is primarily for development and does not support deployment automation.

Option E (Maven Plugin) can be used for building and deploying Mule applications but isn't classified as a platform tool for deployment.

Option F (API Community Manager) is unrelated to deployment and instead focuses on managing API communities.

Reference

For detailed steps on automating deployments with these tools, refer to MuleSoft documentation on Runtime Manager, CLI, and Platform APIs.

NEW QUESTION # 57

Refer to the exhibit. An organization needs to enable access to their customer data from both a mobile app and a web application, which each need access to common fields as well as certain unique fields.

The data is available partially in a database and partially in a 3rd-party CRM system.

What APIs should be created to best fit these design requirements?

- A) A Process API that contains the data required by both the web and mobile apps, allowing these applications to invoke it directly and access the data they need thereby providing the flexibility to add more fields in the future without needing API changes
- B) One set of APIs (Experience API, Process API, and System API) for the web app, and another set for the mobile app
- C) Separate Experience APIs for the mobile and web app, but a common Process API that invokes separate System APIs created for the database and CRM system
- D) A common Experience API used by both the web and mobile apps, but separate Process APIs for the web and mobile apps that interact with the database and the CRM System

- **A. Option C**
- B. Option A
- C. Option B
- D. Option D

Answer: A

Explanation:

Correct Answer: Separate Experience APIs for the mobile and web app, but a common Process API that invokes separate System APIs created for the database and CRM system

As per MuleSoft's API-led connectivity:

- >> Experience APIs should be built as per each consumer needs and their experience.
- >> Process APIs should contain all the orchestration logic to achieve the business functionality.
- >> System APIs should be built for each backend system to unlock their data.

NEW QUESTION # 58

When using CloudHub with the Shared Load Balancer, what is managed EXCLUSIVELY by the API implementation (the Mule application) and NOT by Anypoint Platform?

- **A. The SSL certificates used by the API implementation to expose HTTPS endpoints**
- B. The logging configuration that enables log entries to be visible in Runtime Manager
- C. The number of DNS entries allocated to the API implementation
- D. The assignment of each HTTP request to a particular CloudHub worker

Answer: A

Explanation:

Correct Answer: The SSL certificates used by the API implementation to expose HTTPS endpoints

- >> The assignment of each HTTP request to a particular CloudHub worker is taken care by Anypoint Platform itself. We need not manage it explicitly in the API implementation and in fact we CANNOT manage it in the API implementation.
- >> The logging configuration that enables log entries to be visible in Runtime Manager is ALWAYS managed in the API implementation and NOT just for SLB. So this is not something we do EXCLUSIVELY when using SLB.
- >> We DO NOT manage the number of DNS entries allocated to the API implementation inside the code. Anypoint Platform takes care of this.

It is the SSL certificates used by the API implementation to expose HTTPS endpoints that is to be managed EXCLUSIVELY by the API implementation. Anypoint Platform does NOT do this when using SLBs.

NEW QUESTION # 59

When should idempotency be taken into account?

- A. When storing the results of a previous request for use in response to subsequent requests
- B. When sending concurrent update requests for the same entity

- C. When preventing duplicate processing from multiple sent requests
- D. When making requests to update currently locked entities

Answer: C

Explanation:

Understanding Idempotency:

Idempotency is a concept in APIs where an operation can be performed multiple times without changing the result beyond the initial application. This is particularly important for operations that may be repeated due to network retries or client errors.

When to Consider Idempotency:

Idempotency should be taken into account when there is a risk of duplicate processing due to multiple requests being sent (e.g., retries or errors). This ensures that repeated requests do not result in unintended side effects, such as creating multiple records or processing the same transaction more than once.

Evaluating the Options:

Option A: While locked entities may need special handling, this is not directly related to idempotency.

Option B: Storing results for future responses could be useful but does not relate to idempotent operations.

Option C: Concurrent requests for the same entity might require handling for conflicts, but this scenario is better suited for transaction management or concurrency control.

Option D (Correct Answer): Preventing duplicate processing from multiple requests is a key reason to implement idempotency, ensuring that repeat requests have no adverse effects.

Conclusion:

Option D is the correct answer as idempotency is specifically used to handle scenarios where duplicate requests might be sent, preventing unintended processing.

Refer to MuleSoft's documentation on best practices for idempotency in API design for more details.

NEW QUESTION # 60

.....

We are pretty confident that thousands of Mule-Arch-201 exam candidates have passed their dream Mule-Arch-201 certification exam and if you start today you will be the next successful Mule-Arch-201 exam candidate. Three formats of our Mule-Arch-201 practice test material come with free demos and up to 1 year of free updates. So choose the right Icerttest Salesforce Certified MuleSoft Platform Architect (Mule-Arch-201) exam questions format and download it after paying reasonable charges and start Mule-Arch-201 exam preparation without wasting further time.

Mule-Arch-201 Pass4sure: https://www.icerttest.com/Mule-Arch-201_braindumps.html

We have built a strong and professional team devoting to the research of Mule-Arch-201 valid practice torrent, Salesforce Reliable Mule-Arch-201 Exam Practice ITCertKey will offer all customers the best service, The PDF works on all smart devices, which means you can go through Salesforce Mule-Arch-201 dumps at your convenience, Salesforce Reliable Mule-Arch-201 Exam Practice Our experts have compiled a detailed study guide for the users who can't find time to prepare for the exams.

Click a file that the application can open, and the Open button is enabled, Our Mule-Arch-201 pdf demo with key knowledge points will help you clear exam easily, but in case you failed to get passing score with our Mule-Arch-201 PDF VCE, we promise you to full refund to reduce your economic loss.

Pass Guaranteed Quiz 2026 Salesforce Perfect Reliable Mule-Arch-201 Exam Practice

We have built a strong and professional team devoting to the research of Mule-Arch-201 valid practice torrent, ITCertKey will offer all customers the best service, The PDF works on all smart devices, which means you can go through Salesforce Mule-Arch-201 dumps at your convenience.

Our experts have compiled a detailed study guide Mule-Arch-201 Pass4sure for the users who can't find time to prepare for the exams, Our experts check daily whether there is an update to the Salesforce Certified MuleSoft Platform Architect Mule-Arch-201 torrent prep, and if there is an update system, we will automatically send it to you.
