

C1000-189資訊 - C1000-189最新考題

P.S. Testpdf在Google Drive上分享了免費的2026 IBM C1000-189考試題庫：<https://drive.google.com/open?id=1E9qzMucXBrNTnEeJvjP3FquazHKAss33>

在這個都把時間看得如此寶貴的社會裏，選擇Testpdf來幫助你通過IBM C1000-189 認證考試是划算的。如果你選擇了Testpdf，我們承諾我們將盡力幫助你通過考試，並且還會為你提供一年的免費更新服務。如果你考試失敗，我們會全額退款給你。

IBM C1000-189 考試大綱：

主題	簡介
主題 1	• Installation: This section of the exam measures the skills of System Implementation Specialists and focuses on installing and deploying Instana across different environments. It includes installing the Instana backend, deploying and configuring agents, and migrating existing Instana setups. Candidates will also demonstrate their ability to implement Synthetic Monitoring and manage Points of Presence (PoPs) effectively for end-to-end performance validation.
主題 2	• Security and Compliance: This section of the exam measures the skills of IT Security Analysts and focuses on the data protection and compliance aspects of Instana deployment. Candidates must describe and implement data retention policies, plan for regulatory compliance, secure APIs, manage user access, and interpret audit logs. The goal is to ensure secure system configurations that align with organizational and regulatory standards.
主題 3	• Planning: This section of the exam measures the skills of Cloud Monitoring Engineers and covers the foundational planning tasks required for successful Instana deployment. Candidates must understand the installation prerequisites, the architectural design of Instana for on-premises environments, and the platform core capabilities and use cases. It also assesses knowledge of different agent modes, supported sensors and tracers, and the distinctions between cloud service agents and serverless agents essential for scalable implementation.

C1000-189最新考題 - C1000-189考試資料

選擇了Testpdf提供的最新最準確的關於IBM C1000-189考試產品，屬於你的成功就在不遠處。

最新的 IBM Instana Observability C1000-189 免費考試真題 (Q46-Q51):

問題 #46

What happens when multiple agent configuration files are created and put alongside the main configuration.yaml?

- A. An error is thrown since only one configuration file is allowed at any time.
- B. All configuration files are merged in alphabetical order.
- C. Only the first file is processed while other files are silently ignored.
- **D. The configuration file is read in alphabetical order.**

答案：D

解題說明：

IBM Instana Observability's agent supports modularized configuration through multiple YAML configuration fragments within its configuration directory. As described in the documentation: "When multiple configuration files exist alongside the main configuration.yaml, the agent reads each in alphabetical order and applies configurations sequentially." This mechanism supports composable and layered configuration management, allowing base settings in configuration.yaml to be overridden or extended by secondary fragments. The key design principle is deterministic merge order-guaranteeing predictable configuration hierarchies across deployments. This method improves maintainability in large environments by facilitating separation of sensitive and technology-specific settings while maintaining a consistent merge process. IBM warns not to name multiple files with overlapping keys unless intentional overrides are desired. The merge is additive and case-sensitive, processed lexicographically, providing administrators both flexibility and traceability for troubleshooting and auditing. There is no error generated when multiple files are present; rather, Instana agent gracefully integrates them during initialization, a behavior that promotes advanced configuration modularity for complex deployments.

問題 #47

How can OTLP be enabled?

- A. In the settings.hcl
- **B. Using Helm**
- C. By configuring multiple tracers
- D. In the params.yaml

答案：B

解題說明：

OTLP (OpenTelemetry Protocol) enables modern, standards-based telemetry with Instana for traces and metrics. The official IBM Instana documentation explains that enabling OTLP support should be done during installation or upgrade via Helm, using either values set in a YAML file or via the --set command line argument. This method is described as, "To enable OTLP, use Helm with the provided chart and set OTLP values in your values.yaml or with the --set flag." Helm automation allows administrators to easily manage, update, and version-control agent and collector configuration at scale-especially in Kubernetes environments. It is favored because it is compatible with Instana's operator and dynamic config approaches. Manual edits in settings.hcl or params.yaml are not recommended or officially documented for enabling OTLP streams. Multiple tracers relate to instrumentation and are not for enabling the protocol itself. Using Helm provides a streamlined, repeatable and supported approach - per IBM Instana deployment best practices.

問題 #48

Which protocol is used by the Grafana Plugin for Instana to fetch data?

- **A. HTTP**
- B. JDBC

- C. SOP
- D. gRPC

答案： A

解題說明：

When integrating Grafana with Instana, the plugin communicates using RESTful interactions over the HTTP protocol. IBM's integration guide clearly explains: "The Instana DataSource Plugin for Grafana communicates with the Instana backend via HTTP-based REST APIs to query metrics and event data." This ensures secure TLS-encrypted data transport and allows compatibility with Grafana's native data source management features. HTTP is chosen due to its simplicity, standardization, and suitability for web API integrations, allowing Grafana to query time-series data from Instana and automatically populate dashboards. The plugin retrieves metrics, trace-level summaries, and service health states over HTTP GET and POST requests. Other options such as gRPC are used only internally between microservices, SOP is not a standard communication protocol, and JDBC is limited to databases. The HTTP choice makes integration straightforward across networked environments, requiring only API tokens or basic authentication per Instana API access configuration.

問題 #49

When are issues or incidents triggered in Instana while using .Net sensor?

- A. When a user logs in
- B. Based on failing health signatures or custom metric thresholds
- C. When a sensor goes offline
- D. During regular maintenance

答案： B

解題說明：

Instana triggers Issues and Incidents based on dynamic health signatures and custom metric thresholds established for .NET applications. The official documentation clarifies: "Issues are generated automatically when health signatures fail or when custom metric thresholds are breached for .NET sensors, indicating performance or reliability degradation." This includes transaction latency, error rates, resource exhaustion, or process failure detection. Health signatures are built-in, algorithmic checks using expected baselines and historical data. Custom thresholds may be established by users for business-specific metrics (e.g., request time or throughput), further enriching early warning detection. Offline sensors or regular maintenance only lead to downtime or muted alerts, not issues/incidents. User logins reflect authentication flow monitoring and do not prompt system-wide issues in Instana's event model unless login failure ties to health impacts.

問題 #50

Which tool does Instana use to provide geographical data by mapping user IP addresses?

- A. Geo Application Service
- B. GeoLite2 database
- C. Google Maps API
- D. Universal Geo database

答案： B

解題說明：

IBM Instana leverages the open-source and widely recognized GeoLite2 database for mapping user IP addresses to their approximate physical locations in synthetic and real user monitoring scenarios. The documentation details: "Instana provides geographical and location metadata based on the GeoLite2 database, which is regularly updated for improved accuracy and privacy compliance." GeoLite2 is a MaxMind-developed database providing country, city, region, and sometimes ISP-level information from IP addresses. Using an on-premise and regularly-curated geo database ensures no end-user data is ever transmitted to external or third-party web mapping services (such as Google Maps), maintaining strong data privacy and compliance for enterprise customers. Other listed tools are not native to Instana's geo lookup implementation.

問題 #51

.....

要想通過IBM C1000-189考試認證，選擇相應的培訓工具是非常有必要的，而關於IBM C1000-189考試認證的研究材料是很重要的一部分，而我們Testpdf能很有效的提供關於通過IBM C1000-189考試認證的資料，Testpdf的IT專家個個都是實力加經驗組成的，他們的研究出來的材料和你真實的考題很接近，幾乎一樣，Testpdf是專門為要參加認證考試的人提供便利的網站，能有效的幫助考生通過考試。
