

# Pass Guaranteed Quiz 2026 Saviynt SCAIP: Saviynt Certified Advanced IGA Professional (Level 200) High Hit-Rate Reliable Study Plan

Actual4Dumps provides you with free demos of its Saviynt Certified Advanced IGA Professional (Level 200) SCAIP exam product. You can try a free demo to eliminate any confusion regarding the authenticity of our Saviynt Certified Advanced IGA Professional (Level 200) SCAIP PDF and practice tests (web-based & desktop software). It is also our policy to facilitate you with SCAIP free actual dumps updates in case of new Saviynt Certified Advanced IGA Professional (Level 200) SCAIP test changes within three months of your shopping. Contact us any time, if you need any guidance about our Saviynt SCAIP exam product. There is only one way to get all these amazing SCAIP exam dumps offers and that is purchasing our product today.

The objective of Saviynt SCAIP is to assist candidates in preparing for the Saviynt SCAIP certification test by equipping them with the actual SCAIP questions PDF and SCAIP practice exams to attempt the SCAIP Exam successfully. The Saviynt SCAIP practice material comes in three formats, desktop SCAIP practice test software, web-based SCAIP practice exam, and SCAIP Dumps PDF that cover all exam topics.

## Pass Guaranteed Quiz Saviynt - SCAIP - Valid Reliable Saviynt Certified Advanced IGA Professional (Level 200) Study Plan

With our SCAIP exam materials, you will have more flexible learning time. With our SCAIP practice prep, you can flexibly arrange your study time according to your own life. You don't need to be in a hurry to go to classes after work as the students who take part in a face-to-face class, and you also never have to disrupt your schedule for learning. Just use your computer, IPAD or phone, then you can study with our SCAIP Practice Questions.

### Saviynt Certified Advanced IGA Professional (Level 200) Sample Questions (Q22-Q27):

#### NEW QUESTION # 22

An EIC Administration has a requirement to configure a separate password policy for service accounts along with the password policy for regular accounts. How can this be achieved in EIC?

- A. Define a separate Password Policy for Service Account and select it in Policy Rule Service Account field under Global Configurations
- B. Define a separate Password Policy for Service Account and select the checkbox Password Policy Service Account field under Password Policy configurations
- C. Define a separate Password Policy for Service Account and select it in Policy Rule Service Account field under Security System
- D. Only one Password Policy can be defined in the Security System which applies to both regular and service accounts

**Answer: C**

Explanation:

In Saviynt EIC, password management is highly configurable, allowing organizations to define separate password policies for different account types, including service accounts and regular user accounts. This requirement is achieved by creating a dedicated password policy specifically for service accounts and associating it appropriately within the system.

Option A is correct because Saviynt allows administrators to define a separate Password Policy for Service Accounts and map it using the Policy Rule Service Account field under the Security System configuration.

This ensures that when service account operations such as password resets or provisioning occur, the system enforces the correct policy distinct from regular user accounts.

Option B is incorrect since Saviynt supports multiple password policies and does not restrict to a single policy. Option C is incorrect because simply selecting a checkbox in password policy configuration does not link it to service account usage. Option D is incorrect as Global Configurations do not directly assign password policies for service accounts at the execution level.

Thus, configuring and mapping the policy at the Security System level ensures correct enforcement for service accounts.

#### NEW QUESTION # 23

In the Saviynt App for ServiceNow, what options are available to refresh the RITM status in the ServiceNow app based on the respective Saviynt's status? (Multi-Select)

- A. It will be automatically updated in 1 minute via Request item history job in ServiceNow
- B. Click Refresh button on the RITM page in ServiceNow
- C. Regenerate application catalog item
- D. Make a Postman API call

**Answer: A,B**

Explanation:

In Saviynt-ServiceNow integration, the synchronization of RITM (Request Item) status between Saviynt and ServiceNow is handled through both manual and automated mechanisms.

Option B is correct because users or administrators can manually click the Refresh button on the RITM page in ServiceNow to immediately fetch the latest status from Saviynt. This is useful for real-time validation when monitoring request progress.

Option C is also correct as ServiceNow includes a Request Item History Job, which runs periodically (commonly every minute) to automatically sync and update the RITM status based on the latest state in Saviynt. This ensures near real-time consistency between

both systems without manual intervention.

Option A is incorrect because Postman API calls are not a standard or supported operational method for end users to refresh RITM status. Option D is unrelated, as regenerating catalog items does not impact ticket status synchronization. Thus, the correct answers are manual refresh and automated job-based synchronization.

#### NEW QUESTION # 24

What are the different features available under Role Intelligence? (Multi-Select)

- A. Role Governance
- B. Role Mining
- C. Entitlement Discovery
- D. Role-Access Mismatches

**Answer: A,B,C**

#### NEW QUESTION # 25

An EIC Administrator wants to retrieve a report of users and their assigned SAV Roles. What are the ways in which it can be achieved? (Multi-Select)

- A. Create analytics with the SQL Query to get the data and select the checkbox 'Send Email As Attachment' in analytics configuration
- B. Using enhanced query
- C. Run a SQL Query to retrieve the data in Data Analyzer
- D. Create an analytics with the SQL Query to get the data and export as CSV/Excel

**Answer: A,C,D**

#### NEW QUESTION # 26

During a User Import, to define the maximum number of records to be processed in each page, specify the value of the MAX\_PAGINATION\_SIZE parameter. If this value is not defined, what is the default value?

- A. 0
- B. No default value, it's based on MAX\_PAGINATION\_SIZE
- C. 1
- D. 2

**Answer: D**

Explanation:

In Saviynt EIC REST connector configurations, pagination is a critical mechanism used during user import (identity reconciliation) to efficiently process large datasets from target systems. The parameter MAX\_PAGINATION\_SIZE determines how many records are fetched and processed per API call (per page).

If MAX\_PAGINATION\_SIZE is not explicitly defined, Saviynt uses a default value of 1000 records per page.

This default is designed to balance performance and system stability. Fetching too many records in a single API call can lead to performance bottlenecks, API timeouts, or memory issues, while too few records can increase the number of API calls and slow down the overall import process.

Option A (50000) and C (10000) are incorrect because these values are typically too large for default settings and must be explicitly configured if required. Option B is incorrect because Saviynt does provide a default fallback value rather than leaving it undefined. Therefore, when MAX\_PAGINATION\_SIZE is not specified, Saviynt defaults to 1000, ensuring efficient and stable data import operations.

#### NEW QUESTION # 27

.....

Our website is a leading dumps provider worldwide that offers the latest valid test questions and answers for certification test, especially for Saviynt practice test. We paid great attention to the study of SCAIP vce braindumps for many years and are

specialized in the questions of actual test. You can find everything that you need to pass test in our SCAIP learning materials.

**SCAIP Exam Engine:** <https://www.actual4dumps.com/SCAIP-study-material.html>

You can get Saviynt SCAIP exam dumps questions instantly right after purchase, SCAIP PDF & Practice Test Software comes with latest exam questions, These SCAIP real questions and answers contain the latest knowledge points and the requirement of the certification exam, Saviynt Certified Advanced IGA Professional (Level 200) SCAIP test questions and answers are worked out by Actual4Dumps professional experts who have more than 8 years in this field, Actual4Dumps Saviynt SCAIP exam pdf dumps are specially designed to enhance your knowledge and increase your skills required to take the Saviynt Advanced IGA Professional exam.

And once you've got the shot, show it off, Leonardo SCAIP Exam Engine Simao, Chief Executive, Joachim Chissano Foundation, Mozambique, You can get Saviynt SCAIP exam dumps questions instantly right after purchase, SCAIP PDF & Practice Test Software comes with latest exam questions.

## **100% Pass Quiz Saviynt SCAIP - Saviynt Certified Advanced IGA Professional (Level 200) Marvelous Reliable Study Plan**

These SCAIP real questions and answers contain the latest knowledge points and the requirement of the certification exam, Saviynt Certified Advanced IGA Professional (Level 200) SCAIP test questions and answers are worked out by Actual4Dumps professional experts who have more than 8 years in this field.

Actual4Dumps Saviynt SCAIP exam pdf dumps are specially designed to enhance your knowledge and increase your skills required to take the Saviynt Advanced IGA Professional exam.

In order to enhance your skills in the Actual4Dumps SCAIP world, one has to be efficient enough to keep his/her Actual4Dumps skills updated.
