EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q582-Q587):

NEW QUESTION # 582

IT control objectives are useful to IT auditors as they provide the basis for understanding the:

- A. Technique for securing information
- B. Security policy
- C. Desired results or purpose of implementing specific control procedures.
- D. The audit control checklist

Answer: C

NEW QUESTION # 583

Who is responsible for securing networks during a security incident?

- A. Security Operations Center (SO)
- **B. Incident Response Team (IRT)**
- C. Disaster Recovery (DR) manager
- D. Chief Information Security Officer (CISO)

Answer: B

NEW QUESTION # 584

An application vulnerability assessment has identified a security flaw in an application. This is a flaw that was previously identified and remediated on a prior release of the application. Which of the following is MOST likely the reason for this recurring issue?

- **A. Lack of version/source controls**
- B. Lack of change management controls
- C. High turnover in the application development department
- D. Ineffective configuration management controls

Answer: A

NEW QUESTION # 585

Scenario: An organization has recently appointed a CISO. This is a new role in the organization and it signals the increasing need to address security consistently at the enterprise level. This new CISO, while confident with skills and experience, is constantly on the defensive and is unable to advance the IT security centric agenda.

Which of the following is the reason the CISO has not been able to advance the security agenda in this organization?

- A. Lack of a security awareness program
- B. Lack of business continuity process
- **C. Lack of influence with leaders outside IT**
- D. Lack of identification of technology stake holders

Answer: C

NEW QUESTION # 586

When would it be more desirable to develop a set of decentralized security policies and procedures within an enterprise environment?

- A. When it results in an overall lower cost of operating the security program.
- B. When there is a variety of technologies deployed in the infrastructure.
- C. When there is a need to develop a more unified incident response capability.
- **D. When the enterprise is made up of many business units with diverse business activities, risks profiles and regulatory requirements.**

Answer: D

Explanation:

When Decentralized Policies Are Beneficial:

* In organizations with varied business units, a one-size-fits-all approach may not be effective.

Decentralized policies allow tailoring to specific risks, operations, and regulatory demands of individual units.

Advantages of Decentralization:

* Greater flexibility to meet unit-specific needs.

* Improved compliance with diverse regulatory environments.

Why Other Options Are Incorrect:

* A. Unified Incident Response: Requires centralized, not decentralized, coordination.

* C. Technology Variety: Centralized policies ensure consistency in handling diverse technologies.
