Our desktop software is customizable so you can change the duration and CSI questions of CSC2 Practice Tests according to your learning requirements. Since this software requires installation on Windows computers, you can take the Canadian Securities Course Exam2 (CSC2) practice exam offline.

## CSI Canadian Securities Course Exam2 Sample Questions (Q31-Q36):

### NEW QUESTION # 31

Which fiscal policy measure was designed to encourage individuals to save?

- A. Dividend tax credit.
- B. Capital gain inclusion rate.
- C. First Home Savings Account.

- **D. Tax Free Savings Account.**

**Answer: D**

Explanation:

The Tax-Free Savings Account (TFSA) is a fiscal policy measure introduced by the Canadian government to encourage individuals to save. Unlike other savings mechanisms, the TFSA provides a unique tax advantage:

any income earned within the account, whether from interest, dividends, or capital gains, is completely tax-free. This structure incentivizes saving by maximizing the growth potential of the funds invested without the burden of tax erosion.

\* Nature of the TFSA

\* Introduced in 2009, the TFSA allows Canadians aged 18 or older to contribute a specific annual limit (indexed to inflation) to the account. Contributions are made with after-tax dollars, meaning withdrawals, including investment income, are not taxed.

\* Comparison to Other Measures in the Options:

\* First Home Savings Account (FHSA): This is a targeted saving vehicle to assist first-time homebuyers and is more restrictive in its purpose.

\* Capital Gain Inclusion Rate: Although it reduces taxable income by allowing only a portion of capital gains to be taxed, it doesn't offer the complete tax-exempt growth and withdrawal benefits of a TFSA.

\* Dividend Tax Credit: This offsets taxes on eligible dividends but is designed to encourage investment in Canadian corporations rather than promote individual saving per se.

\* Economic Impact: By encouraging Canadians to save, the TFSA bolsters household financial security and indirectly supports the broader economy by increasing available investment capital.

\* Volume 2, Chapter 24: Canadian Taxation - Section on Tax-Free Savings Accounts.

\* Volume 2, Chapter 13: Macroeconomic Analysis - Fiscal Policy Measures.

### NEW QUESTION # 32

Which ratio gauges a company's ability to repay its debts using funds generated from operating activities?

- A. Debt-to-equity
- B. Interest coverage.
- **C. Cash flow-to-total debt**
- D. Asset coverage.

**Answer: C**

Explanation:

The cash flow-to-total debt ratio assesses a company's ability to repay its debts using cash generated from its operating activities. It is calculated by dividing operating cash flow by total debt. A higher ratio indicates better capacity to cover debts. This metric is crucial for evaluating financial health and understanding a firm's liquidity position. Other ratios listed have different focuses:

\* Interest coverage (B) measures a company's ability to pay interest with operating income.

\* Asset coverage (C) measures the protection provided to creditors.

\* Debt-to-equity (D) evaluates capital structure but not immediate debt repayment ability.

\* CSC Volume 2, Chapter 14: Company Analysis - Risk Analysis Ratios, p. 14-12 to 14-16.

### NEW QUESTION # 33

Institutional clients tend to be more sophisticated than retail clients. What benefit does this translate into for CIBC dealer members?

- A. They are free of fiduciary obligations to their clients.
- **B. They can organize their firms based specifically on client needs.**
- C. They are subject to few, if any, investment restrictions.
- D. They are permitted to make trades on a discretionary basis for their clients.

**Answer: B**

### NEW QUESTION # 34

What is a structured product?

- A. A credit card receivable
- B. An equity index.
- C. A mortgage loan.
- **D. A principle-protected note.**

**Answer: D**

Explanation:

A structured product is a pre-packaged investment strategy often involving derivatives and fixed-income securities to offer a combination of protection and growth potential.

\* **Principal-Protected Note (PPN):** A PPN is a common type of structured product that guarantees the return of the original investment (principal) at maturity while offering potential upside linked to the performance of an underlying asset or index.

\* **Why Other Options Are Incorrect:**

\* A. A mortgage loan: This is a form of debt, not a structured product.

\* C. An equity index: An index tracks the performance of a market but is not a structured product itself.

\* D. A credit card receivable: This is a financial asset used in securitization, not a structured product.

References:

\* CSC Volume 2, Chapter 23: Structured products and their features.

### NEW QUESTION # 35

A client recently sold her holdings in JKL Equity Fund. The client's transactions in the fund are summarized below:

Year	Description	Amount (\$)
1	Bought 500 JKL Equity Fund @ \$10.50 per unit (no load)	5,250.00
2	Reinvested distribution (75% capital gains; 25% Canadian dividends) Bought 20.5 JKL Equity Fund @ \$11.50 per unit	235.75
3	Reinvested distribution (80% capital gains; 20% Canadian dividends) Bought 35.5 JKL Equity Fund @ \$12.25 per unit	434.88
4	Sold 556 JKL Equity Fund @ \$12.75 per unit	7,089.00

What is the client's capital gain from the sale of the fund in Year 4?

- A. \$1,839.00
- B. \$2,509.63
- C. \$1,155.25
- **D. \$1,168.37**

**Answer: D**

### NEW QUESTION # 36
