Valid Dumps H12-521_V1.0-ENU Ppt | Exam H12-521_V1.0-ENU Sample

Our company is a professional certification exam materials provider, we have occupied in the field for more than ten years, and therefore we have rich experiences. In addition, H12-521_V1.0-ENU Exam Materials have free demo, and you can have a try before buying, so that you can have a deeper understanding for H12-521_V1.0-ENU exam dumps. We are pass guarantee and money back guarantee, and if you fail to pass the exam, we will give you full refund. You can receive your download link and password within ten minutes, so that you can start your learning as quickly as possible. We have online and offline chat service, if you have any questions for the exam, you can consult us.

Huawei H12-521_V1.0-ENU exam is a computer-based test that is available in English and Chinese languages. It consists of 60 multiple-choice questions, and candidates have 90 minutes to complete the exam. H12-521_V1.0-ENU exam covers a wide range of topics, including video surveillance system architecture, network design, video encoding and decoding, video analytics, storage management, and network security.

Huawei H12-521_V1.0-ENU (HCIP-Intelligent Vision V1.0) Certification Exam is a professional-level certification exam designed for individuals who want to demonstrate their expertise in intelligent vision technologies. H12-521_V1.0-ENU exam covers a wide range of topics related to intelligent vision, including image processing, computer vision, machine learning, and deep learning.

Huawei HCIP-Intelligent Vision V1.0 Sample Questions (Q28-Q33):

NEW QUESTION # 28

By configuring the camera video quality diagnosis plan, which of the following screen abnormalities can be automatically identified? (Multiple choice)

- A. The video screen freezes
- B. Snow noise

- C. Color cast
- D. Jitter

Answer: A,B,C,D

NEW QUESTION # 29

Which of the following tasks need to be completed before pole erection and setting during site installation?

- A. Adjust the camera's shooting angle
- B. Install lithium batteries
- C. Connect the ground cable of the function module to the ground bar
- D. Install a lightning rod

Answer: D

Explanation:

The correct answer is B . The training content identifies pole erection as a distinct step and separately highlights a prerequisite safety point that "The lightning rod must be secured" . This indicates that the lightning rod installation is treated as a preparation requirement associated with the pole before or during erection safety control, rather than as a later commissioning activity.

By contrast, the other options clearly belong to later installation phases. Lithium batteries are part of the pole-mounted functional equipment and are installed after the pole structure is already in place. Camera shooting angle adjustment is a post-installation alignment task performed only after the camera has been mounted. Connecting the ground cable of the function module to the ground bar is also a module-level electrical integration task that depends on the module and pole already being installed. In actual outdoor intelligent vision deployment, structural safety and lightning protection are handled first because they affect lifting, erection, and long-term site protection. Therefore, among the given options, the task that must be completed before pole erection and setting is installing the lightning rod .

NEW QUESTION # 30

The volume of video network sharing services will affect the number of hard drives, and thus the number of single servers.

- A. False
- B. True

Answer: B

NEW QUESTION # 31

If the two intelligent vision platforms are in a superior-subordinate relationship, the subordinate platform actively initiates registration to the superior platform, and then pushes the directory and device information under its jurisdiction after the superior authentication.

- A. False
- B. True

Answer: B

NEW QUESTION # 32

The implementation process of video summarization technology is mainly divided into the following stages: video segmentation, target detection, background extraction, background deletion, and summary completion.

- A. False
- B. True

Answer: B

NEW QUESTION # 33
