Avaya Aura Communication Applications Implement Sample Questions (Q56-Q61):

NEW QUESTION # 56

Refer to the exhibit. With Dynamic Licensing configured in the Avaya Session Border Controller for Enterprise (ASBCE), when will the ASBCE issue a request to the WebLM server to allocate additional licenses based on "Fetch Count" value?

Licensing Configuration

Use Local WebLM Server

External WebLM Server URL

Dynamic Licensing Configuration

	Fetch Count	Low Watermark (%)	High Watermark (%)
Standard Sessions	<input type="text" value="10"/>	<input type="text" value="30"/>	<input type="text" value="50"/>
Advanced Sessions	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
Scopia Video Sessions	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>
CES Sessions	<input type="text" value="0"/>	<input type="text" value="0"/>	<input type="text" value="0"/>

- A. when the percentage of free (available) standard sessions licenses reaches 50% (High Watermark)
- **B. when the percentage of free (available) standard sessions licenses drops below 30% (Low Watermark)**
- C. when the percentage of free (available) standard sessions licenses reaches 30% (Low Watermark)
- D. when the percentage of free (available) standard sessions licenses drops below 50% (High Watermark)

Answer: B

Explanation:

Dynamic Licensing in the Avaya Session Border Controller for Enterprise (ASBCE) uses a "watermark" system to manage license allocation automatically from a WebLM server:

Low Watermark: This value (set to 30% in the exhibit) triggers the ASBCE to request more licenses. When the percentage of available (unused) licenses drops below this threshold, the SBC contacts the WebLM server to fetch additional licenses.

Fetch Count: This is the number of licenses the SBC will request once the Low Watermark is hit.

In your exhibit, the SBC will request 10 additional standard session licenses.

High Watermark: This value (set to 50% in the exhibit) acts as the release trigger. When the percentage of available licenses rises above this threshold-indicating they are no longer needed-the SBC returns the excess licenses to the WebLM pool to be used by other devices.
