You can control the kinds of questions and some of the problems and the time of each test. In the site of Exam4PDF, you can prepare for the exam without stress and anxiety. At the same time, you also can avoid some common mistakes. So you will gain confidence and be able to repeat your experience in the actual test to help you to pass the exam successfully.

Microsoft SC-100 Certification Exam is an essential certification for cybersecurity architects who are seeking to advance their careers. Microsoft Cybersecurity Architect certification is designed to equip professionals with the skills and knowledge required to design, build and maintain secure computing environments using Microsoft technologies.

Microsoft SC-100, also known as the Microsoft Cybersecurity Architect exam, is designed to validate the skills and knowledge of professionals in the field of cybersecurity architecture. SC-100 exam focuses on assessing the candidate's ability to design and implement secure computing solutions using Microsoft technologies. SC-100 Exam covers various topics such as security principles, identity and access management, threat protection, information protection, and data governance.

Microsoft SC-100 exam is intended for individuals who have experience in IT security, including security professionals, system administrators, network administrators, and security architects. SC-100 exam is aimed at individuals who are responsible for designing, implementing, and maintaining security solutions in organizations that use Microsoft technologies.

Without doubt, your success is 100% guaranteed with our SC-100 training guide. You will be quite surprised by the convenience to have an overview just by clicking into the link, and you can experience all kinds of SC-100 versions.

### Microsoft Cybersecurity Architect Sample Questions (Q309-Q314):

#### NEW QUESTION # 309

You have an on-premises network that has several legacy applications. The applications perform LDAP queries against an existing directory service. You are migrating the on-premises infrastructure to a cloud-only infrastructure.

You need to recommend an identity solution for the infrastructure that supports the legacy applications. The solution must minimize the administrative effort to maintain the infrastructure.

Which identity service should you include in the recommendation?

- A. Azure Active Directory (Azure AD)
- B. Azure Active Directory (Azure AD) B2C
- **C. Azure Active Directory Domain Services (Azure AD DS)**
- D. Active Directory Domain Services (AD DS)

**Answer: C**

#### NEW QUESTION # 310

Your company plans to deploy several Azure App Service web apps. The web apps will be deployed to the West Europe Azure region. The web apps will be accessed only by customers in Europe and the United States.

You need to recommend a solution to prevent malicious bots from scanning the web apps for vulnerabilities.

The solution must minimize the attack surface.

What should you include in the recommendation?

- A. Azure Firewall Premium
- **B. Azure Application Gateway Web Application Firewall (WAF)**
- C. Azure Traffic Manager and application security groups
- D. network security groups (NSGs)

**Answer: B**

#### NEW QUESTION # 311

Your company uses Microsoft Defender for Cloud and Microsoft Sentinel. The company is designing an application that will have the architecture shown in the following exhibit.

You are designing a logging and auditing solution for the proposed architecture. The solution must meet the following requirements.

\* Integrate Azure Web Application Firewall (WAF) logs with Microsoft Sentinel.

\* Use Defender for Cloud to review alerts from the virtual machines.

What should you include in the solution? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 312

A customer has a hybrid cloud infrastructure that contains a Microsoft 365 E5 subscription and an Azure subscription.

All the on-premises servers in the perimeter network are prevented from connecting directly to the internet.

The customer recently recovered from a ransomware attack.

The customer plans to deploy Microsoft Sentinel.

You need to recommend configurations to meet the following requirements:

\* Ensure that the security operations team can access the security logs and the operation logs.

\* Ensure that the IT operations team can access only the operations logs, including the event logs of the servers in the perimeter network.

Which two configurations can you include in the recommendation? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. a custom collector that uses the Log Analytics agent
- **B. the Azure Monitor agent**
- **C. resource-based role-based access control (RBAC)**
- D. Azure Active Directory (Azure AD) Conditional Access policies

**Answer: B,C**

### NEW QUESTION # 313

You have 50 Azure subscriptions.

You need to monitor resource in the subscriptions for compliance with the ISO 27001:2013 standards. The solution must minimize the effort required to modify the list of monitored policy definitions for the subscriptions.

NOTE: Each correct selection is worth one point.

- **A. Assign a policy to each subscription.**
- B. Assign a policy to a management group.
- C. Assign an initiative to a management group.
- D. Assign an initiative to each subscription.
- **E. Assign a blueprint to a management group.**
- F. Assign a blueprint to each subscription.

**Answer: A,E**

### NEW QUESTION # 314

.....
