

新版CRT-450題庫 - CRT-450最新題庫

P.S. Testpdf在Google Drive上分享了免費的、最新的CRT-450考試題庫：https://drive.google.com/open?id=1u_Fm9jLabKjI5NP7ut7CfWopiqWJpvnX

Testpdf為通過CRT-450考試提供最完整有效的方案，幫祝廣大考生在考試中獲得更多的優勢。確保你只獲得最新的和最有效的Salesforce CRT-450考古題，我們也希望客戶能隨時隨地的訪問，于是有了多個版本的題庫資料。PDF版的題庫方便你閱讀，為你真實地再現CRT-450考試題目，軟件版本的題庫作為一個測試引擎，可以幫你模擬真實的CRT-450考試環境，為考生做好充足的考前準備。通過Salesforce CRT-450考試不再是夢想，我們的考古題就可以確保你成功。

Salesforce CRT-450 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Logic and Process Automation	46%	- Apex control flow statements - Apex primitive and complex data types - Apex classes and interfaces - Roll-up summary fields capabilities and use cases - Apex triggers - Formula fields capabilities and use cases - Exception handling - Apex variables, constants, and expressions - Declarative process automation features - Governor limits - SOQL, SOSL, and DML
Topic 2: User Interface	10%	- Lightning components - Visualforce controllers - Visualforce pages
Topic 3: Testing	12%	- Apex test classes - Execute anonymous vs. unit tests - Test coverage requirements - Test data creation

Topic 4: Salesforce Fundamentals	10%	- Core CRM objects capabilities - MVC pattern mapping - Declarative customization use cases - AppExchange application extension - Multi-tenant environment considerations
Topic 5: Data Modeling and Management	12%	- Schema Builder - Relationship types - Data import and export - Custom objects and fields
Topic 6: Debug and Deployment Tools	10%	- Debug logs monitoring - Developer Console, Workbench, and Force.com IDE - Metadata and business data deployment - Development and deployment environments

Salesforce 新版CRT-450題庫：Salesforce Certified Platform Developer I幫助您壹次通過CRT-450考試

當你進入Testpdf網站，你看到每天進入Testpdf網站的人那麼多，不禁感到意外。其實這很正常的，我們Testpdf網站每天給不同的考生提供培訓資料數不勝數，他們都是利用了我們的培訓資料才順利通過考試的，說明我們的Salesforce的CRT-450考試認證培訓資料真起到了作用，如果你也想購買，那就不要錯過我們Testpdf網站，你一定會非常滿意的。

最新的 Salesforce Developers CRT-450 免費考試真題 (Q20-Q25):

問題 #20

What are two valid options for iterating through each Account in the collection List<Account> named AccountList? (Choose two.)

- A. for (List L : AccountList) {...}
- B. for (Account theAccount : AccountList) {...}
- C. for(AccountList) {...}
- D. for (Integer i=0; i < AccountList.Size(); i++) {...}

答案：B,D

問題 #21

AW Computing (AWC) handles orders in Salesforce and stores its product inventory in a field, inventory__c, on a custom object, Product__c. When an order for a Product__c is placed, the inventory__c field is reduced by the quantity of the order using an Apex trigger.

```
public void reduceInventory(Id prodId, Integer qty) {
    Integer newInventoryAmt = getNewInventoryAmt(prodId, qty);
    Product__c p = new Product__c(Id = prodId, Inventory__c = newInventoryAmt);
    update p;

    // code goes here
}
```

AWC wants the real-time inventory reduction for a product to be sent to many of its external systems, including some future systems the company is currently planning.

What should a developer add to the code at the placeholder to meet these requirements?

A)

```
InventoryReductionEvent__e ev = new InventoryReductionEvent__e(ProductId__c =
prodId, Reduction__c = qty);
EventBus.publish(ev);
```

B)

```
InventoryReductionEvent__e ev = new InventoryReductionEvent__e(ProductId__c =  
prodId, Reduction__c = qty);  
insert ev;
```

C)

```
InventoryReductionEvent__c ev = new InventoryReductionEvent__c(ProductId__c =  
prodId, Reduction__c = qty);  
EventBus.publish(ev);
```

D)

```
InventoryReductionEvent__c ev = new InventoryReductionEvent__c(ProductId__c =  
prodId, Reduction__c = qty);  
insert ev;
```

- A. Option
- B. Option
- **C. Option**
- D. Option

答案： C

問題 #22

A developer wants to display all of the picklist entries for the Opportunity StageName field and all of the available record types for the Opportunity object on a Visualforce page.

Which two actions should the developer perform to get the available picklist values and record types in the controller? (Choose two.)

- A. Use Schema.RecordTypeInfo returned by RecordType.SObjectType.getDescribe().getRecordTypeInfos().
- B. Use Schema.PicklistEntry returned by Opportunity.StageName.getDescribe().getPicklistValues ().
- **C. Use Schema.RecordTypeInfo returned by Opportunity.SObjectType.getDescribe().getRecordTypeInfos().**
- **D. Use Schema.PicklistEntry returned by Opportunity.SObjectType.getDescribe().getPicklistValues ().**

答案： C,D

解題說明：

Explanation

問題 #23

Which declarative method helps ensure quality data? (Choose 3)

- **A. Page Layouts**
- **B. Validation Rules**
- C. Workflow alerts
- D. Exception Handling
- **E. Lookup Filters**

答案： A,B,E

問題 #24

A developer identifies the following triggers on the Expense __c object:

The triggers process before delete, before insert, and before update events respectively.

Which two techniques should the developer implement to ensure trigger best practices are followed?

```
deleteExpense,  
applyDefaulttoExpense,  
validateExpenseCreate;
```

Choose 2 answers

- A. Unify all three triggers in a single trigger on the Expense__c object that includes all events.
- B. Unify the before insert and before update triggers and use Flow for the delete action.
- C. Maintain all three triggers on the Expense__c object, but move the Apex logic out of the trigger definition.
- D. Create helper classes to execute the appropriate logic when a record is saved.

答案: C,D

解題說明:

According to the Salesforce Platform Developer I learning objectives and documents, best practices for triggers include modularizing code by using helper classes and ensuring that the trigger only contains logic to determine which records to process. The actual processing should be done in a separate class. This makes the code more organized, reusable, and easier to test. So options A and D are correct.

* Option A suggests creating helper classes to execute the appropriate logic when a record is saved, aligning with best practices of modularizing code.

* Option D suggests maintaining all three triggers but moving the Apex logic out of the trigger definition, which also aligns with best practices.

Option B is incorrect because unifying before insert and before update triggers and using Flow for delete action is not a standard practice mentioned in the learning materials.

Option C is incorrect because although it's often a good practice to have one trigger per object, it's not about including all events but about organizing code execution properly.
