問題 #76

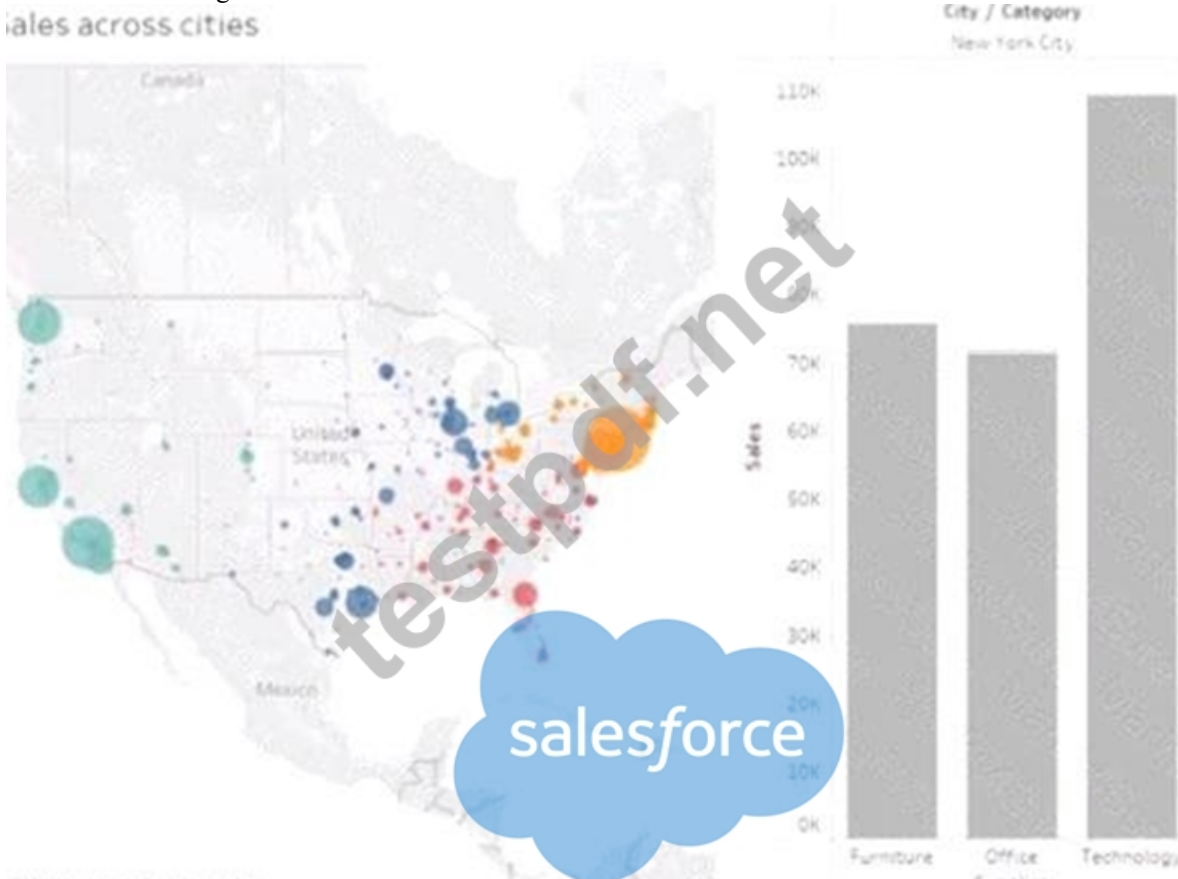

You create a worksheet named Sales by Region and hide the title of the worksheet. You print the worksheet as a PDF and notice that the worksheet title appears. You need to prevent the title from appearing when you print the worksheet as a PDF. Which settings should you configure from the File menu in Tableau Desktop?

- A. Share
- B. Export As PowerPoint
- C. Print
- **D. Page Setup**
- E. Export As Version

答案: D

問題 #77

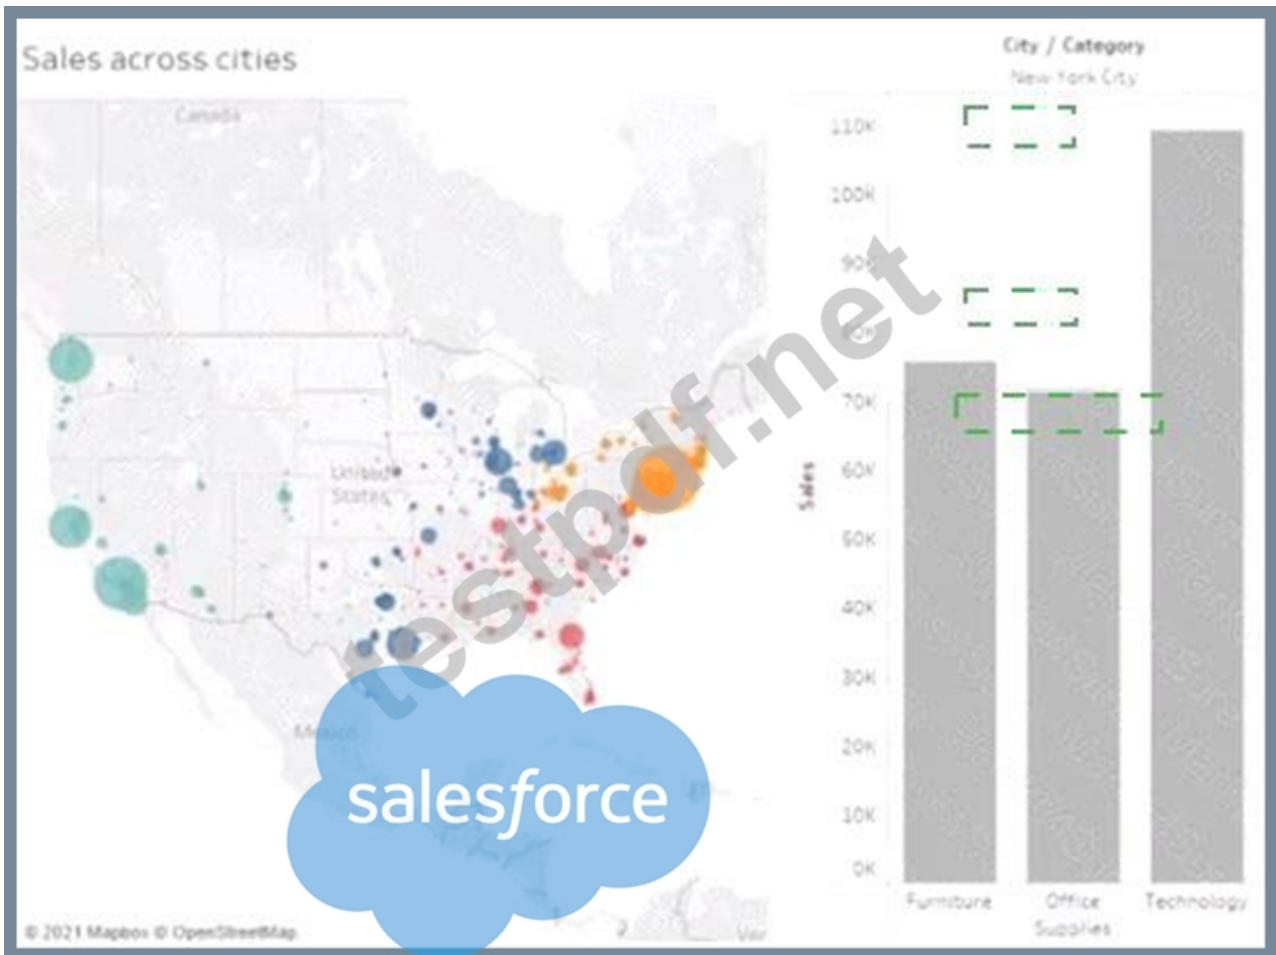

You have the following dashboard.

When a user selects a city on the map the data on the bar chart must show only the data for the selected city. The data in the bar chart must change only when the user selects a different city. How should you configure the dashboard action? (Use the dropdowns in the Answers Area to select the correct options.)

答案:

解題說明:

Explanation:

To configure the dashboard action, you should select Filter as the action type, Select as the run action on option, and All Fields as the target filters option. This will ensure that when a user selects a city on the map, the bar chart will show only the data for the selected city based on all fields in common between the two worksheets. The action will run only when the user selects a different city. References: <https://help.tableau.com/current/pro/desktop/en-us/actions.htm>

問題 #78

You have a dashboard that contains two sheets named Sheet 1 and Sheet 2.

You want to add an object to the dashboard that users can click to switch to a different dashboard in the workbook.

Which object should you add to the dashboard?

Answer Area

答案:

解題說明:

Answer Area

Explanation:

The object that you should add to the dashboard to allow users to switch to a different dashboard in the workbook is Navigation. Navigation objects are used to create links between dashboards or sheets in a workbook. You can add a navigation object to a dashboard by dragging it from the list of objects and dropping it on the dashboard. You can then configure the navigation object to specify the destination dashboard or sheet that you want users to navigate to when they click on it. You can learn more about navigation objects and how to use them in this article: https://help.tableau.com/current/pro/desktop/en-us/dashboards_navigation.htm
