

# Valid DEP-2025 Exam Syllabus - Valid Exam DEP-2025 Blueprint

Download Valid DEP-2025 Exam Dumps For Best Preparation

1. What links a device to an MDM solution?

- A. APNs
- B. A firewall
- C. A restriction
- D. An enrollment profile

**Answer:** D

**Explanation:**

Mobile Device Management (MDM) solutions are used to manage and secure Apple devices remotely. To link a device to an MDM solution, an enrollment profile is required. This profile is a configuration file that, once installed on the device, establishes a connection between the device and the MDM server, allowing the server to send commands and policies to the device. The enrollment profile contains information such as the MDM server's URL and authentication details, enabling secure communication via Apple Push Notification service (APNs). While APNs (option A) facilitates communication between the MDM server and the device after enrollment, it is not the mechanism that links the device to the MDM solution. A firewall (option B) is a network security tool and unrelated to linking a device to MDM, and a restriction (option C) is a policy applied via MDM, not the linking mechanism itself. According to Apple's official documentation, such as the Apple Platform

Deployment Guide, the enrollment profile is the foundational step for MDM enrollment. Reference: Apple Platform Deployment Guide (Chapter: Mobile Device Management).

2. What does MDM need to operate, specifically for APNs and SSL?

- A. Certificates
- B. Restrictions
- C. Enrollment profiles

**Answer:** A

**Explanation:**

For an MDM solution to operate effectively, it relies on certificates, particularly for secure communication with Apple Push Notification service (APNs) and for establishing encrypted connections via SSL/TLS. An APNs certificate is required to authenticate the MDM server with Apple's APNs infrastructure, enabling it to send push notifications to managed devices. Additionally, an SSL certificate secures the communication channel between the MDM server and the devices, ensuring data privacy and integrity. Restrictions (option B) are policies enforced by MDM but are not prerequisites for its operation. Enrollment profiles (option C) are necessary to link devices to MDM, as discussed in Question 1, but they do not specifically address the APNs and SSL requirements. Apple's documentation, such as the MDM Protocol Reference, explicitly states that certificates are essential for APNs and SSL functionality in MDM deployments.

Reference: MDM Protocol Reference (Section: Certificates and Authentication).

3. Which Apple device capability allows MDM to secure devices?

- A. Location Services
- B. Enrollment profiles
- C. Built-in device security features

**Answer:** C

**Explanation:**

2 / 7

The Apple wants to win the trust of Apple DEP-2025 exam candidates at any cost. To do this the Apple is offering some important features with Apple DEP-2025 exam. These DEP-2025 Exam Questions features are valid, updated, and real Apple DEP-2025 exam questions, availability of Apple DEP-2025 exam questions in three different formats.

A certificate means a lot for people who want to enter a better company and have a satisfactory salary. DEP-2025 exam dumps of us will help you to get a certificate as well as improve your ability in the processing of learning. DEP-2025 study materials of us are high-quality and accurate. We also pass guarantee and money back guarantee if you fail to pass the exam. We offer you free demo to have a try. If you have any questions about the DEP-2025 Exam Dumps, just contact us.

## Valid Exam Apple DEP-2025 Blueprint, Knowledge DEP-2025 Points

Are you still silly to spend much time to prepare for your test but still fail again and again? Do you find that some candidates pass exam easily with Apple DEP-2025 exam dumps questions? If your goal is passing exams and obtain certifications our DEP-2025 exam dumps can help you achieve your goal easily, why not choose us? Only dozen of money and 20-35 hours' valid preparation

before the test with DEP-2025 Exam Dumps questions will make you clear exam surely. So why are you still wasting so many time to do useless effort?

## Apple Deployment and Management Exam Sample Questions (Q100-Q105):

### NEW QUESTION # 100

Which threat does Managed Device Attestation help protect against?

- A. A compromised device disabling Activation Lock
- B. An unauthorized user inserting malicious code during a software update
- C. Bypassing kernel permissions to allow writability of critical system files
- **D. Private key extraction for use on a rogue device**

**Answer: D**

Explanation:

Managed Device Attestation verifies device authenticity. The Apple Platform Security Guide states, "Managed Device Attestation protects against private key extraction by validating the device's hardware and software integrity, preventing rogue devices from impersonating legitimate ones." Options B, C, and D are unrelated to attestation's scope.

References:

Apple Platform Security Guide, "Managed Device Attestation" section.

iOS Deployment Reference, "Security Features" section.

### NEW QUESTION # 101

What is required for a user to upgrade their macOS software?

- A. A Managed Apple Account
- B. Local administrator rights
- C. An MDM bootstrap token
- **D. Volume ownership**

**Answer: D**

Explanation:

On Macs with Apple silicon and T2 security chips, Apple requires volume ownership to perform major macOS upgrades and certain system-level changes. Volume ownership is granted during setup to the first account created, and it provides the secure entitlement to authorize system updates, OS reinstalls, and recovery options. Apple Learning materials emphasize that administrator rights alone are insufficient; a user may be an admin without volume ownership and still be blocked from upgrading. The bootstrap token is relevant to FileVault and SecureToken provisioning, but not directly tied to OS upgrades. Managed Apple Accounts also do not control OS upgrades unless combined with MDM restrictions. This requirement ensures that only authorized users with secure entitlements can modify or upgrade macOS, protecting device integrity and reducing unauthorized system alterations.

References: Apple Platform Security - "Volume ownership and macOS upgrades."

### NEW QUESTION # 102

Which roles in Apple Business Manager or Apple School Manager can add a location?

- A. Administrator and People Manager
- B. Device Enrollment Manager and Content Manager
- **C. Administrator and Location Manager**
- D. Device Enrollment Manager and Location Manager

**Answer: C**

Explanation:

Apple divides administrative responsibilities into roles with specific privileges. According to the Apple Business Manager and School Manager role matrix, only the Administrator and Location Manager roles can create and manage locations. Locations in ABM are critical for organizing apps, books, and device assignments, especially for large institutions with multiple campuses or departments. Device Enrollment Managers focus only on device enrollment tasks, while People Managers handle user accounts. Content Managers can distribute apps and books but cannot add new locations. Apple's training emphasizes that locations are tied directly to

license management and content distribution, so Apple restricts this privilege to higher-trust roles like Administrators and Location Managers. This ensures organizational structure remains consistent and controlled.

References: Apple Business Manager User Guide - "Roles and privileges in Apple Business Manager."

### NEW QUESTION # 103

Which declarative device management declarations can an MDM server use to store values on a device?

- A. Devices
- B. Enrollments
- C. Security
- **D. Activations**

**Answer: D**

Explanation:

Activations store values. The Mobile Device Management Protocol Reference states, "Declarative Device Management uses Activations declarations to store values on a device, enabling proactive state management." References: Mobile Device Management Protocol Reference, "Declarative Management" section. Apple Platform Deployment Guide, "DDM" section.

### NEW QUESTION # 104

Which type of device supports Automated Device Enrollment?

- **A. All of the above**
- B. Mac
- C. iPad
- D. iPhone

**Answer: A**

Explanation:

Automated Device Enrollment (ADE), managed through Apple Business Manager (ABM) or Apple School Manager (ASM), is supported on iPads, iPhones, Macs, and Apple TVs purchased from Apple or authorized resellers. It enables automatic MDM enrollment and supervision during setup. Options A, B, and C are all correct, and D encompasses them, aligning with ADE's broad compatibility as per the Apple Platform Deployment Guide.

Reference: Apple Platform Deployment Guide (Chapter: Automated Device Enrollment).

### NEW QUESTION # 105

.....

We are proud that our Apple DEP-2025 exam preparation material is one of the best in the market. You should buy our Apple Deployment and Management Exam (DEP-2025) valid dumps and start preparation now because of some amazing offers. These offers are up to 1 year of Free DEP-2025 Dumps updates, free demos of our DEP-2025 exam product, and a full refund guarantee. What are you waiting for? Buy actual Apple DEP-2025 now at discount and start your preparation.

**Valid Exam DEP-2025 Blueprint:** <https://www.pass4surequiz.com/DEP-2025-exam-quiz.html>

The pages of our products lists many important information about our DEP-2025 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our DEP-2025 study materials and the discounts, If you have any questions about the DEP-2025 braindumps2go pdf, you can contact us anytime, and you can also contact us by email.
