Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q10-Q15):

NEW QUESTION # 10

Your organization is using Password Sync to sync passwords from Active Directory to Google Workspace. A user changed their network password and cannot log in to Google Workspace with the new password. What steps should you take to troubleshoot this issue?

- A. Reinstall Password Sync on all domain controllers.
- B. Reauthorize the Password Sync tool in the Google Workspace Admin Console.
- C. **Confirm that the Password Sync service is running on all domain controllers.**
- D. Reset the user's password in Active Directory.

Answer: C

Explanation:

https://support.google.com/a/answer/11237847?hl=en&ref_topic=4498019

The network password is determined to be with AD. In this case, you must verify that password sync is installed on all domain controllers. This is the initial troubleshooting. After this troubleshooting, the logs of these connectors are taken

NEW QUESTION # 11

Your-company.com recently started using Google Workspace. The CIO is happy with the deployment, but received notifications that some employees have issues with consumer Google accounts (conflict accounts).

You want to put a plan in place to address this concern.

What should you do?

- A. Use the conflict account remove tool to remove the accounts from Google Workspace.
- B. Rename the accounts to temp@your-company.com, and recreate the accounts.
- C. Ask users to request a new Google Workspace account from your local admin.
- D. **Use the Transfer tool for unmanaged users to find the conflict accounts.**

Answer: D

Explanation:

* Access the Transfer Tool:

* In the Google Workspace Admin console, navigate to "Users" > "Transfer tool for unmanaged users".

* Identify Conflict Accounts:

* Use the tool to search for unmanaged users (conflict accounts) that have email addresses matching your company domain.

* Send Transfer Requests:

* Send transfer requests to the identified unmanaged users, asking them to transfer their accounts to your Google Workspace domain.

* Complete the Transfer:

* Guide the users through the transfer process to ensure their accounts are moved to the managed Google Workspace environment.

* Verify the transfer completion and resolve any remaining conflicts.

NEW QUESTION # 12

Your-company.com finance departments want to create an internal application that needs to read data from spreadsheets. As the collaboration engineer, you suggest using App Maker. The Finance team is concerned about data security when creating applications with App Maker.

What security measures should you implement to secure data?

- A. Change owner access permissions to allow internal usage only.
- B. **Use Roles, Script, and Owner access permissions for operations on records and data relations.**
- C. Enable App Maker access only for the Finance department Organization Unit.
- D. Use a service account with limited permissions to access each data source.

Answer: B

Explanation:

* When developing the application in App Maker, define roles that correspond to the different levels of access needed by users.

* Use scripts to control access to data based on user roles. This ensures that only authorized users can perform certain operations.

* Set the owner access permissions appropriately to ensure that data can only be accessed or modified by those with the necessary permissions.

* Regularly review and update roles and permissions to adapt to any changes in the organization or the application's usage.

Implementing these security measures ensures that data in your internal application is accessed and managed securely, mitigating risks associated with unauthorized access.

NEW QUESTION # 13

Employees at your organization frequently and mistakenly delete important emails that they receive from your payroll department. The employees have to file support tickets for the IT team to find and restore these emails. You must provide an automated solution that minimizes IT overhead and prevents these emails from being permanently deleted from their inboxes. What should you do?

- A. Create an Apps Script project that uses the Gmail API to find any recently deleted emails and automatically restore them to the inboxes. Set the script trigger to be time-driven and run every hour.
- B. Create an activity rule by using Gmail log events with two conditions one for the event of an email deletion and another that matches the header address to the payroll department's email. Create an action that restores messages. Set the rule to run every hour.
- C. Create a content compliance rule that targets internal messages. Use an advanced content match for the sender header to match the payroll department's email. Quarantine the message so that administrators can review the email before they release it to the user.
- D. Create a content compliance rule that targets all internal messages that are sent from the payroll department. Modify the message by prepending a custom subject line to all payroll emails so that employees know not to delete them.

Answer: B

Explanation:

Access Admin Console: Go to the Google Admin console and navigate to the 'Reports' section.

Activity Rule Setup: Select 'Manage Rules' and create a new rule.

Define Conditions:

Condition 1: Event equals 'Email Deletion'.

Condition 2: Header address matches the payroll department's email address.

Set Action: Define the action to restore the messages to the inbox.

Schedule the Rule: Set the rule to run every hour.

Test and Monitor: Ensure the rule is working as expected by monitoring the results and making adjustments if necessary.

NEW QUESTION # 14

Your company has received help desk calls from users about a new interface in Gmail that they had not seen before. They determined that it was a new feature that Google released recently. In the future, you'll need time to review the new features so you can properly train employees before they see changes.

What action should you take?

- A. Apps > Google Workspace > Gmail > Uncheck "Enable Gmail Labs for my users"
- B. Device Management > Chrome > Device Settings > Stop auto-updates
- C. Company Profile > Profile > New User Features > Enable "Scheduled Release"
- D. Company Profile > Profile > New User Features > Enable "Rapid Release"

Answer: C

Explanation:

Access Admin Console:

Sign in to the Google Admin console.

Navigate to Company Profile:

Go to "Company Profile."

Enable Scheduled Release:

Click on "Profile."

Find the "New User Features" section.

Enable the "Scheduled Release" option to ensure new features are released on a scheduled basis rather than immediately.

Inform Users:

Communicate with users about the scheduled release and the timing of new features.

Prepare training materials and sessions based on the upcoming features.
