

AI-102 Test Preparation - Free PDF Quiz 2026 AI-102: Designing and Implementing a Microsoft Azure AI Solution First-grade Latest Test Dumps

P.S. Free 2026 Microsoft AI-102 dumps are available on Google Drive shared by ValidTorrent: https://drive.google.com/open?id=13spc0WiA_ul9NZnJBM-g6lWGDsYLKT0k

You can hardly grow by relying on your own closed doors. Our AI-102 preparation materials are very willing to accompany you through this difficult journey. You know, choosing a good product can save you a lot of time. And choose our AI-102 exam questions will save more for our AI-102 learning guide is carefully compiled by the professional experts who have been in this career for over ten years. So our AI-102 practice braindumps contain all the information you need.

For the purposes of covering all the current events into our AI-102 study guide, our company will continuously update our training materials. And after payment, you will automatically become the VIP of our company, therefore you will get the privilege to enjoy free renewal of our AI-102 practice test during the whole year. No matter when we have compiled a new version of our AI-102 Training Materials our operation system will automatically send the latest version of the AI-102 preparation materials for the exam to your email, all you need to do is just check your email then download it.

Free PDF Professional AI-102 - Designing and Implementing a Microsoft Azure AI Solution Test Preparation

New developments in the tech sector always bring new job opportunities. These new jobs have to be filled with the AI-102 certification holders. So to fill the space, you need to pass the AI-102 Exam. Earning the AI-102 certification helps you clear the obstacles you face while working in the Microsoft field.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q244-Q249):

NEW QUESTION # 244

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You create a web app named app1 that runs on an Azure virtual machine named vm1. Vm1 is on an Azure virtual network named vnet1.

You plan to create a new Azure Cognitive Search service named service1.

You need to ensure that app1 can connect directly to service1 without routing traffic over the public internet.

Solution: You deploy service1 and a public endpoint, and you configure an IP firewall rule.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

Scenario Recap:

* Goal: Ensure app1 (on VM1 in vnet1) can connect to service1 (Azure Cognitive Search) without routing over the public internet.

* Proposed Solution: Deploy service1 with a public endpoint, and configure an IP firewall rule.

Analysis:

* IP firewall rules restrict which public IPs can access a service.

* However, traffic still routes over the public internet. The firewall only filters access, it does not provide private connectivity.

* To avoid internet traffic, you must use Private Link (private endpoint).

The answer: B. No

Reference: Secure access to Cognitive Search with Private Link

NEW QUESTION # 245

You are developing the smart e-commerce project.

You need to design the skillset to include the contents of PDFs in searches.

How should you complete the skillset design diagram? To answer, drag the appropriate services to the correct stages. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/search/cognitive-search-concept-intro>

<https://docs.microsoft.com/en-us/azure/cognitive-services/computer-vision/overview-ocr>

NEW QUESTION # 246

You build a custom Form Recognizer model.

You receive sample files to use for training the model as shown in the following table.

Which three files can you use to train the model? Each correct answer presents a complete solution. (Choose three.) NOTE: Each correct selection is worth one point.

- A. File5
- B. File1
- C. File2
- D. File4
- E. File3
- F. File6

Answer: B,C,F

Explanation:

Explanation

Input requirements

Form Recognizer works on input documents that meet these requirements:

Format must be JPG, PNG, PDF (text or scanned), or TIFF. Text-embedded PDFs are best because there's no possibility of error in character extraction and location.

File size must be less than 50 MB.

Reference:

<https://docs.microsoft.com/en-us/azure/cognitive-services/form-recognizer/overview>

NEW QUESTION # 247

You are building a Language Understanding model for purchasing tickets.

You have the following utterance for an intent named PurchaseAndSendTickets.

Purchase [2 audit business] tickets to [Paris] [next Monday] and send tickets to [email@domain.com] You need to select the entity types. The solution must use built-in entity types to minimize training data whenever possible.

Which entity type should you use for each label? To answer, drag the appropriate entity types to the correct labels. Each entity type may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

Answer:

Explanation:

□ Explanation

Graphical user interface, application Description automatically generated

□ Box 1: GeographyV2

The prebuilt geographyV2 entity detects places. Because this entity is already trained, you do not need to add example utterances containing GeographyV2 to the application intents.

Box 2: Email

Email prebuilt entity for a LUIS app: Email extraction includes the entire email address from an utterance.

Because this entity is already trained, you do not need to add example utterances containing email to the application intents.

Box 3: Machine learned

The machine-learning entity is the preferred entity for building LUIS applications.

<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/luis-reference-prebuilt-geographyv2>

<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/luis-reference-prebuilt-email>

<https://docs.microsoft.com/en-us/azure/cognitive-services/luis/reference-entity-machine-learned-entity>

NEW QUESTION # 248

You are building a chatbot that will use question answering in Azure Cognitive Service for Language.

You have a PDF named Docl.pdf that contains a product catalogue and a price list You upload Docl.pdf and train the model.

During testing, users report that the chatbot responds correctly to the following question: What is the price of

< product > ?

The chatbot fails to respond to the following question: How much does < product* cost?

You need to ensure that the chatbot responds correctly to both questions.

Solution: From Language Studio, you create an entity for cost, and then retrain and republish the model.

Does this meet the goal?

- A. No
- B. Yes

Answer: A

Explanation:

In Azure Cognitive Service for Language (Question Answering), when users ask natural language questions, the service tries to match them to knowledge base content and synonyms.

In the scenario, the model correctly answers "What is the price of < product > ?" but fails on "How much does < product > cost?" .

This indicates that the service does not automatically recognize "price" and "cost" as equivalent terms.

Creating an entity for cost will not fix this issue. Entities in custom text classification or conversational language understanding are used for extracting structured data (like dates, names, or locations) from text, not for synonym matching in question answering.

The correct solution is to add alternate phrasing (synonyms/alternate questions) in the QnA project for each knowledge base entry.

For example, under the QnA pair that contains "What is the price of < product > ?" , you would add "How much does < product > cost?" as an alternate question. This way, both variations trigger the same answer.

Therefore, the proposed solution (create an entity for cost) does not meet the goal.

The Answer: B. No

NEW QUESTION # 249

.....

In traditional views, the AI-102 practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real AI-102 exam. However, our AI-102 learning questions are not doing that way. According to data from former exam candidates, the passing rate of our AI-102 learning material has up to 98 to 100 percent. There are adequate content to help you pass the exam with least time and money.
